MISSION, VISION **AND VALUES**

MISSION AND VALUES

In 2014, the Board of Trustees published the guidelines made available to the community in the document called “Lineamenta”, which defines the Vision Towards the 50th Anniversary and includes: Mission, Values, Vision, and guiding principles.

Mission

“To create currents of thought and form leaders that transform society in the search for Truth, integrating faith, science and life.”

Values

Along with truth, goodness and beauty, UPAEP holds as guiding values: the dignity of the human person, freedom, solidarity, subsidiarity, congruence, respect, love, and justice.

Derived from this Mission and with a view to the 50th anniversary, the Vision that will serve as a guide and inspiration for the next ten years was presented:

VISION TOWARDS THE 50TH ANNIVERSARY

We are a fraternal, congruent, joyful, and committed university community, that:

- Is a reference in the conjunction of Christian humanistic thought and the sciences.
- Forms leaders with high professional quality and social commitment.
- Contributes to the transformation of society with pertinent proposals, oriented to the achievement of the common good.
- Has presence and influence at the local, regional, national and international levels.
- Develop human talent and optimizes resources in the service of the institutional mission.

This Vision is accompanied by five Guiding Principles, which will govern the efforts, ideas, and projects of the university community.

1. To be congruent with our identity.
2. To propose a formation of excellence for a transformative leadership.
3. Consolidate academic systems of social relevance
4. To position the institution as an Intercultural University.
5. To guarantee an environment of trust, collaboration, and accountability.

MESSAGE FROM THE PRESIDENT

The Universidad Popular Autónoma del Estado de Puebla (UPAEP) is a private, non-profit Mexican institution of higher education, founded on May 7th, 1973 by a community of students and university professors, which arose from the support of broad sectors of Puebla's society, becoming an authentic model of social solidarity and whose educational proposal is anchored in Christian social teaching.

The institutional motto, "Culture at the Service of the People", frames the imprint of university activities, where by culture we understand the way of seeing the world, life, and the way of living it, from the valuation and promotion of the best expressions of human endeavor so that the University is involved through its being and work in teaching, research, and outreach, for the benefit of the local and global community it impacts.

At UPAEP we consider the institutional mission as the motivation that summons us to contribute the best of the talent of each one of us, namely: “To create currents of thought and form leaders who transform society in the search for truth, integrating faith, science, and life”.

These foundational references have been the driving forces behind an institution in constant evolution and growth. In its almost 50 years, UPAEP has become a key player in the space of higher education in Mexico, with a proposal of high quality accredited education, comprehensive training rooted in and promoting the dignity of the person, and perspective of “proximity” (see for and walk with “the other”), in the university work to catalyze social transformation for the common good.

UPAEP’s value proposition has led it to be the largest private university in southeastern Mexico, with a student community of nearly 17 000 students studying from high school to doctoral level. Its institutional quality is endorsed by its uninterrupted accreditation at its highest level by FIMPES (1), and by academic program with the accreditation of 100% of its undergraduate academic programs for grounded education by COPAES

(2) and CIEES (3), as well as by the offer of postgraduate programs with the largest number of programs in the National Register of Quality Programs of CONACYT (4) in the south-central region of Mexico among private universities. The forcefulness of its transformative perspective has also been recognized by international agents of the highest relevance, such as the designation as “Changemaker Campus” by Ashoka U, as well as being among the first places in the Social Impact Ranking of the Times Higher Education. The innovative impetus in the field of Internationalization is projected in the “UPAEP Global Campus” platform, which, due to the richness of its programs and options, has become a reference inside and outside the country. These features and many more, rooted in the institutional identity, are what support the strength of our value proposition.

This institutional catalog 2021-2022 shows information for applicants from all over Mexico and international students, to make the decision to consider UPAEP as an extraordinary option to crystallize their professional and life projects.

DOCTORATE DEGREE IN MANAGEMENT AND MARKETING

MODALITY: Grounded education

CAMPUS: PUEBLA

RVOE: SEP-SES/21/114/04/986/2013

ACADEMIC PROGRAM PURPOSE

It trains Doctors in management and marketing with a clear scientific-applied perspective based on solid methodological, organizational, strategic, ethical and socially responsible bases, through the development of market research, consumer behavior and management and marketing; innovating, developing and implementing market strategies in the national and international environment, to perform, evaluate and make decisions in the management and marketing processes in organizations, as well as contributing to the specialized academic training of high level with deep respect for the human person (customer).

ENTRY PROFILE

Knowledge

- Applies mathematical and statistical reasoning.
- Distinguishes the study of markets and marketing
- Infer solutions to problems in the marketing area based on strategic planning.
- Integrates the main currents of thought in order to have an integral vision of the process of market direction and management.
- Distinguishes and handles relevant bibliography on the thematic area in which the interest of the research is located.

Abilities And/Or Skills

- Argue clearly, in writing and orally their ideas.
- Applies reasoning, analysis and synthesis skills in the resolution of market organization and management problems.
- Researches solutions to established problems.

- Reads and understands scientific texts in their field of action.
- Designs projects based on an adequate conceptual management.
- Reads and listens to a foreign language

Attitudes And/Or Values

- Self-taught
- Assumes with responsibility his commitments.
- Confronts with interest, sensitivity and reflection the reality of social, political and economic movements.
- Works individually and collaboratively.
- Reflects on their own actions.
- Is independent and self-regulated.
- Values service to others.

Habits

- Studies autonomously.
- Researches and organizes information related to his/her graduate studies.
- Enjoys reading diverse texts.
- Adopts order and cleanliness behaviors.
- Orders resources and learning material.

THE GRADUATION PROFILE FOR THE DOCTOR IN MANAGEMENT AND MARKETING

- Manages established work schedules.

Systematizes, based on quantitative and qualitative research methodologies, economic, commercial and marketing processes at the business, industrial, local, regional or global level.

Develops marketing strategies, based on established methods in market management to implement innovations in the investigative process.

Discover consumer behaviors that allow you to evaluate, design and implement new options in solving market study and management problems.

Generates synergies in research groups that allow achieving comprehensive solutions to problems mainly related to marketing processes.

Carries out research studies with scientific rigor and academic excellence to analyze the growth and development of markets in the economic context of the country.

Applies in a consistent and systematic way the scientific method in the planning and testing of hypotheses and other methodological approaches to solve problems related to the sales process and market management.

Leads academic research teams and participates in interdisciplinary networks aimed at generating updated scientific knowledge of the highest level in studies and market management in a sustainable way

Contributes to the sustainable development of its environment, region, respecting it and participating in its improvement through its scientific work

Exercises moral and professional authority based on service to others, with solidarity and a spirit of social justice.

PROGRAM CURRICULAR LINES

The program has a number of 14 courses that can be studied in a flexible curriculum in 12 school periods.

It is composed of:

General Education: Leadership and Service Mission

Propedeutic Training: does not apply

Theoretical training Address and Marketing, Consumer Behavior, Market Research

Disciplinary Training that consists: Methodology for Decision Making, Marketing Intelligence, Strategic Direction, Human Capital, Sales and Trading Systems, Economy and Finance.

Research courses that consists: Research Seminars, Investigation

CURRICULAR MAP

The propaedeutic courses must be taken according to the results of your placement exams in English, Physics, Math and / or Computing, depending on your chosen academic program plan

The elective courses in the terminal curricular lines must be chosen according to your professional preferences.

DOCTORATE DEGREE IN ORGANIZATIONAL MANAGEMENT

MODALITY: Grounded education

CAMPUS: PUEBLA

RVOE: SEP-SES/21/114/04/1001/2013

ACADEMIC PROGRAM PURPOSE

It trains high-level Doctors who integrate scientific knowledge in the areas of organizational management through the diagnosis of business activities related to the areas of human development, social sciences, finance, marketing, in order to design management proposals based on logistic processes and information technologies, with the aim of contributing positively and in solidarity to the welfare and prosperity of organizations in their locality, the region and the country in research centers, higher education institutions and the productive sector.

ENTRY PROFILE

Knowledge

- Identifies research methodologies and tools.
- Distinguishes sectorial, national and international administrative theories and trends.
- Differentiates basic and applied concepts in management, leadership, negotiation, decision making.
- Analyzes general concepts applied in marketing and international trade.
- Identifies the economic, political and social variables that affect organizations.
- Distinguishes the various internal (human talent) and external (customers, shareholders, society) actors that interact within and outside organizations.
- Analyzes financial information necessary for the daily exercise and that guarantees the profitability of the organizations.
- Identifies products, services and ideas with potential for business, regional, national and international development.
- Analyzes and makes decisions.

Skills

- Handles virtual information.
- Proficient in English.
- Works and coordinates groups
- Analytical decision making.
- Creative capacity.
- Is directed towards multidisciplinary self-training.

Attitudes And Values:

- Leadership and entrepreneurship.
- Honesty and generosity.
- Tolerance and openness to different cultures.
- Ethics and social responsibility.
- Leadership and service mission.
- Sensitivity to social, local, regional and national needs.
- Prioritizes social problems related to the business sector.
- Taste for research.

Habits

- Systematic and effective study habits for the development of research projects.
- Works in a methodical and systematized way.
- Reading habits

THE GRADUATION PROFILE FOR THE DOCTOR IN ORGANIZATIONAL MANAGEMENT

Dimension research on management and direction in organizations from different sectors and contexts.

Disseminate rigorous research on organizational behavior and culture with an interdisciplinary approach.

Generate motivation, teamwork and communication strategies for efficient internal organizational processes and structure.

Have information on macroeconomic variables for the insertion of organizations in an international dynamic.

Design global strategies to strengthen organizations and their competitiveness through the use of statistics and information technologies.

Analyze financial resources and investment projects as variables that generate productivity and employment.

Provide market intelligence information and marketing strategies, which guarantee the creation of innovative products and services for the benefit of various national and international sectors.

PROGRAM CURRICULAR LINES

The program has a number of 14 courses that can be taken in a flexible curriculum in 12 school four-month periods.

It is composed of:

General Education: A general course that is one that emphasizes the training of the student under the profile of the UPAEP.

Propedeutic Training: does not apply

Theoretical training which shows courses of the area that allow students a training of a disciplinary nature.

Disciplinary Training that consists: It concentrates optional courses, in terms of specialized training in some complementary area of the discipline.

Research courses that consists: The purpose of this lies in the development of skills for the preparation of students in their completion and graduation phase of the academic program.

CURRICULAR MAP

The propaedeutic courses must be taken according to the results of your placement exams in English, Physics, Math and / or Computing, depending on your chosen academic program plan

The elective courses in the terminal curricular lines must be chosen according to your professional preferences.

DOCTORATE DEGREE IN MANAGEMENT AND FINANCE

MODALITY: Online education

CAMPUS: PUEBLA

RVOE: SEP-SES/21/114/01/1250/2015

ACADEMIC PROGRAM PURPOSE

It trains Doctors in Management and Finance competent in the design and development of research in areas related to financial management, through the application of quantitative or qualitative scientific methodological elements that respond to the public and private financial needs of society, in order to promote the creation of lines of research that help to face the problems and challenges of the financial environment with a humanistic, ethical, moral, competitive and sustainable approach.

ENTRY PROFILE

Knowledge

- Distinguishes theories of economic and financial development.
- Differentiates financial analysis methodologies
- Explain the principles of business administration
- Compares information related to economic and financial events
- Analyzes the economic and financial environment
- Categorizes the most commonly used software applications in the financial field.

Skills and/or Abilities

- Manages the most used software applications in the financial field.
- Solves problems and makes decisions with the support of mathematical and statistical tools.
- Applies critical and creative thinking
- Achieves synergy in team work.
- Manages conflicts through negotiation techniques

- Reads and writes texts in English
- Solves problems with an interdisciplinary approach
- Manages mathematical tools for problem solving.

Values and/or Attitudes:

- Research oriented
- Adaptable to changing circumstances
- Is honest.
- Shows social commitment and service mission
- Respects the dignity of others
- Seeks and adheres to the truth
- Appreciates human values
- Acts with generosity
- Shows openness to processes of improvement and change

Habits

- Proactive
- Works under established goals and plans
- Continuous improvement
- Adherence to research, analysis and consultation

THE GRADUATION PROFILE FOR THE DOCTOR IN MANAGEMENT AND FINANCE

Develop research projects focused on detecting the financial needs of the company and the environment in which it participates.

Provide new knowledge that contributes to the generation of financial decision-making models.

Propose solutions to the problems and financial needs existing in the different spaces and sectors of society based on various theories and methodologies of the discipline.

Contribute improvements in the financial, budgeting and investment systems to the development of organizations.

Generate risk models to respond to national and international financial and economic changes.

Propose investment portfolio management models that respond to the needs and stock market requirements of investors.

Propose solutions to financial and investment problems through technical and theoretical knowledge with scientific rigor, applied to reality.

Build modern financial hedging instruments to minimize the effects of adverse economic movements on the company.

Generate quantitative and qualitative research in the economic and financial area by applying technological resources and databases.

Assume an ethical and moral commitment for the honest and responsible management of financial resources that leads to a social impact.

PROGRAM CURRICULAR LINES

The program has a number of 16 courses that can be studied in a flexible curriculum ranging from 12 to 18 school periods.

General Education: General Courses, which consists of incorporating in our students the humanistic seal of our institution based on the common good

Propaedeutic Training: does not apply

Theoretical training which consist of providing the financial bases related to research for the choice of flexible courses related to your doctoral thesis project

Disciplinary Training that consists which consists of developing students in the disciplinary area that provides knowledge for the preparation of their doctoral thesis

Research courses that consists: which consists of working on research methodologies for the adjustment and application of your doctoral protocol in a thesis.

CURRICULAR MAP

The propaedeutic courses must be taken according to the results of your placement exams in English, Physics, Math and / or Computing, depending on your chosen academic program plan

The elective courses in the terminal curricular lines must be chosen according to your professional preferences.

PROGRAM CURRICULAR LINES

The program has a number of 62 courses that can be taken in a flexible curriculum in 10 school periods.

The structure of the Bachelor degree in Architecture, seeks the incorporation of courses in different curricular lines and curricular lines whose purposes favors the development of institutional, professional and individual competencies from a flexible and integrative approach.

The curricular lines represent the graduation of the courses in the course of the curricular project and are made up of various curricular lines or areas of knowledge.

General Education. It emphasizes the training of the student under the profile of the UPAEP. It has 3 curricular lines:

- a) Humanist Training
- b) Entrepreneurship
- c) Languages

Professional basic curricular lines. It concentrates elementary courses of the curricular project and they are chosen for their multidisciplinary criteria. It has 5 curricular lines:

- a) Architectural Design
- b) Physics-Mathematics

c) Graphic Communication

d) History

e) Theory

Professional curricular lines. They show courses of the area that allow students a training of a disciplinary nature. It has 9 curricular lines:

a) History

b) Architectural Design

c) Graphic Communication

d) Sustainability

e) Construction

f) Facilities

g) Structures

h) Administration and Management

i) Urbanism

Elective curricular lines. It concentrates optional courses, in terms of specialized training in some complementary area of the discipline. It is made up of four curricular lines:

a) Entrepreneurship

b) Disciplinary area

c) Academic systems of social relevance

d) General education

The student will choose two lines of the four existing taking 4 courses, the 2 of each selected line.

Terminal Curricular lines: The purpose of this lies in the development of skills for the preparation of students in their completion and graduation phase of the academic program. It is made up of 1 curricular line:

a) Research

The study plan for the Bachelor of Architecture is made up of 433 credits and 62 courses; which the student will take a minimum of 1 and a maximum of 7 courses per cycle, covering a minimum of 6 and a maximum of 56 credits per cycle.

CURRICULAR MAP

The propaedeutic courses must be taken according to the results of your placement exams in English, Physics, Math and / or Computing, depending on your chosen academic program plan.

The elective courses in the terminal curricular lines must be chosen according to your professional preferences.

- Promotes the development of a healthy and ethical organizational culture, through projects innovative and local and global transformation.
- Carries out Applied Research in the field of Work and Organizational Psychology.
- Practice Consultancy in Work and Organizational Psychology and present products that evidence the acquisition of the Graduate Profile.

PROGRAM CURRICULAR LINES

The program has a number of 12 courses that can be taken in a flexible curriculum in 6 school periods.

General Education. It emphasizes the training of the student under the profile of the UPAEP. It has 1 curricular line:

a) Leadership

Professional basic curricular line: It concentrates elementary courses of the curricular project and they are chosen for their multidisciplinary criteria. It has 4 curricular line:

a) Organizational culture and well-being

b) Talent management and development

c) Psychosocial Transformation

d) Integration of advanced consulting projects

Terminal curricular line: The purpose of this lies in the development of skills for the preparation of students in their completion and graduation phase of the academic program. It is made up of 1 curricular line:

a) Research

The study plan for the Master in Work and Organizational Psychology is made up of 75 credits and 12 courses; which the student will take a minimum of 1 and a maximum of 3 courses per cycle, covering a minimum of 6 and a maximum of 18 credits per cycle.

CURRICULAR MAP

The propaedeutic courses must be taken according to the results of your placement exams in English, Physics, Math and / or Computing, depending on your chosen academic program plan.

The elective courses in the terminal curricular lines must be chosen according to your professional preferences.

MASTER'S DEGREE IN HOUSING

MODALITY: Grounded education

CAMPUS: PUEBLA

RVOE: SEP-SES/21/114/04/1529/2016

ACADEMIC PROGRAM PURPOSE

It trains Housing Masters with a humanistic sense, who generate integral solutions to the housing problem at local, national and international levels, integrating the economic, political, social and environmental factors that affect it, in order to improve housing opportunities and therefore the quality of life of people.

ENTRY PROFILE

Knowledge

- Recognizes the problems in the real estate and construction sector.
- Identifies areas of opportunity in housing and its environment.
- Relates the business environment to housing.
- Recognizes housing production processes.

Abilities and/or skills

- Makes decisions based on the analysis of the context.
- Works in interdisciplinary teams to achieve projects.
- Proposes improvement solutions based on the user.
- Uses technology in the development of projects.

Attitudes and/or values

- Values the country's efforts to improve housing.
- Is concerned about the quality of life of society.
- Is empathetic.
- Is respectful.
- Assumes a spirit of self-improvement.

Habits

- Methodical and hierarchical work.
- Interest in constant updating.
- Autonomous work.
- Reading and analyzing information.

THE GRADUATION PROFILE FOR THE MASTER IN HOUSING

- Carries out the planning and strategic management of the real estate business environment.
- It raises proposals for the improvement of housing that integrate state and national policies.
- Develops housing projects from a comprehensive and transdisciplinary approach.
- Generates ergonomic, sustainable and quality spaces that transform the concept of minimal housing in Mexico.
- Implements economic and feasibility studies for the development and promotion of housing.
- Integrate technology in the intelligent design of environments and closed spaces.
- Incorporates international standards on the use of strategies aimed at the sustainability of buildings in project design.
- Demonstrates an ethical and responsible stance in proposals that address the housing problem in Mexico.

PROGRAM CURRICULAR LINES

The program has a number of 12 courses that can be taken in a flexible curriculum in 4 school periods.

These new areas of opportunity generate the need for specific studies on the course of housing, with the consequent preparation of professionals who deal in a specialized way with the housing problem in Mexico.

General Education. It emphasizes the training of the student under the profile of the UPAEP. It has 1 curricular line:

a) Human Development

Fundamental, disciplinary and professional curricular line. It concentrates elementary courses of the curricular project and they are chosen for their multidisciplinary criteria. It has 4 curricular lines:

a) Financial planning, housing policies and management

b) Design, technology and sustainability

c) Housing and habitat

d) Update and integration seminar

Terminal Curricular line: The purpose of this lies in the development of skills for the preparation of students in their completion and graduation phase of the academic program. It is made up of 1 curricular line:

a) Research

The study plan for the Master in Housing program is made up of 77 credits and 12 courses; which the student will take a minimum of 1 and a maximum of 3 courses per cycle, covering a minimum of 6 and a maximum of 18 credits per cycle.

CURRICULAR MAP

The propaedeutic courses must be taken according to the results of your placement exams in English, Physics, Math and / or Computing, depending on your chosen academic program plan.

The elective courses in the terminal curricular lines must be chosen according to your professional preferences.

MASTER'S DEGREE IN SUSTAINABLE HABITAT

MODALITY: Grounded education

CAMPUS: PUEBLA

RVOE: SEP-SES/21/114/01/1248/2015

ACADEMIC PROGRAM PURPOSE

To train Masters in sustainable habitat that address the environmental, socio-economic and cultural problems generated by the phenomenon of human habitation, through the development of sustainable habitat projects that provide interdisciplinary solutions from a systemic approach, to contribute to improve, in an ethical manner, the environmental, social, economic and developmental processes of people in their habitat.

ENTRY PROFILE

Knowledge

- Recognizes social, economic and environmental problems of the habitat.
- Identifies areas of opportunity in the generation of sustainable projects in the public and private sector.
- Interprets the business environment.
- Distinguishes technological tools.

Abilities and/or skills

- Visualizes spaces in a three-dimensional way.
- Observes social, economic and environmental phenomena of habitat.
- Proposes solutions to the phenomenon of human habitat.
- Generates creative ideas.
- Works in teams.

Attitudes and/or values

- Shows sensitivity to social needs.
- Communicates assertively.
- Is empathetic.
- Shows willingness to learn.
- Is honest.
- Shows vocation of service.
- Is congruent.
- Is respectful.
- Assumes a spirit of self-improvement.
- Shows an attitude of constant search.

Habits

- Methodical and hierarchical work.
- Interest in constant updating.
- Autonomous work.
- Reading and analyzing information.

THE GRADUATION PROFILE FOR THE MASTER IN SUSTAINABLE HABITAT

- Implement sustainable habitat projects in a transdisciplinary manner based on strategic planning within the business environment.
- Manages habitat projects that improve the social and economic development of communities.
- Manages federal, state and municipal funds and resources for the development of habitat improvement projects.
- Make proposals that address the social problems of the habitat, considering the environmental and humanistic approach.
- It proposes environmental urban development projects that generate business opportunities.
- Applies the methodology of participatory design in the development of projects to raise awareness of the social needs of the habitat.
- Demonstrates an ethical and responsible stance in the structuring, development and management of sustainable habitat projects.

PROGRAM CURRICULAR LINES

The program has a number of 12 courses that can be taken in a flexible curriculum in 4 school periods.

General Education. It emphasizes the training of the student under the profile of the UPAEP. It has 1 curricular line:

MASTER'S DEGREE IN DESIGN AND INNOVATION MANAGEMENT

MODALITY: Grounded education

CAMPUS: PUEBLA

RVOE: SEP-SES/21/114/04/1532/2016

ACADEMIC PROGRAM PURPOSE

It trains Masters, with an ethical and humanistic vision, who manage design and innovation processes, through the application of theories, methodologies, technologies and iterative and innovative processes of design thinking and strategic designs focused on the user experience, to generate solutions that meet the needs of the recipients of products and services of the creative and cultural industries that produce value within the creative economy.

- Interprets management processes.
- Describes concepts, theories and methodologies of the design thinking discipline.

Abilities and/or skills

- Proposes creative and innovative solutions to typical design problems.
- Uses language, oral and written, in Spanish in an academic manner.
- Demonstrates reading and listening comprehension of the English language at an advanced level.
- Performs in a self-taught manner.
- Applies observation and listening skills to detect user needs.
- Plans his/her personal and professional time.

Attitudes and/or values

- Is interested in inquiry and experimentation.
- Acts according to what he/she says, feels and thinks.
- Is fair, upright and upright.
- Assumes an ethical, responsible and respectful position.
- Motivates his collaborators to take the initiative and give their best in their work.
- Takes a proactive stance to create and maintain a work/life balance for both self and co-workers.

ENTRY PROFILE

Knowledge

- Identifies basic concepts of strategic design.
- Recognizes creative process management methodologies.
- Enunciates the phases of user-centered design.

Habits:

- Attachment to reference reading.
- Habit of observation and reflection.
- Openness to continuous updating.
- Habit of independent study.
- Habit of effective communication.

- Demonstrates reading comprehension and listening to the English language at an advanced level.
- He works in a self-taught way.
- It applies its ability to observe and listen to the detection of user needs.

PROGRAM CURRICULAR LINES

The program has a number of 12 courses that can be taken in a flexible curriculum in 4 school periods.

General Education. It emphasizes the training of the student under the profile of the UPAEP. It has 1 curricular line:

a) Human Development

Fundamental, disciplinary and professional curricular line. It concentrates elementary courses of the curricular project and they are chosen for their multidisciplinary criteria. It has 5 curricular lines:

a) Theories of design and innovation

b) Strategic design for the creative economy

c) Management of the creative and cultural industry

d) Design focused on user experience

THE GRADUATION PROFILE FOR THE MASTER IN DESIGN AND INNOVATION MANAGEMENT

- Identify basic concepts of strategic design.
- Recognizes creative process management methodologies.
- State the phases of user-centered design.
- Interpret management processes.
- Describes concepts, theories, and methodologies of the discipline of design thinking.
- It proposes creative and innovative solutions to typical design problems.
- Employs the language, oral and written, in Spanish academically.

e) Projects for the creative and cultural industry

Terminal Curricular line: The purpose of this lies in the development of skills for the preparation of students in their completion and graduation phase of the academic program. It is made up of 1 curricular line:

a) Research

The study plan for the Master Innovation Design and Management is made up of 77 credits and 12 courses; which the student will take a minimum of 1 and a maximum of 3 courses per cycle, covering a minimum of 6 and a maximum of 18 credits per cycle.

MASTER'S DEGREE IN INNOVATION AND EDUCATIONAL QUALITY

MODALITY: Grounded education

CAMPUS: PUEBLA

RVOE: SEP-SES/21/114/01/1268/2015

ACADEMIC PROGRAM PURPOSE

It trains Masters in Educational Innovation and Quality committed to education, characterized by the argumentation, design and development of pedagogical proposals, through the application of models of innovation, quality and research from a humanistic, innovative, multidisciplinary and transcendent approach, in order to have an impact on the improvement of educational processes.

ENTRY PROFILE

Knowledge

- Explains the basic elements of statistics.
- Argues the nature and logical consistency of the knowledge he/she possesses.
- Analyzes texts in English.

Abilities and/or skills

- Uses oral and written language.
- Uses teaching and learning strategies.
- Leads educational processes of teaching, learning, evaluation and school management.

Attitudes and/or values

- Is interested in current educational and social needs.
- Shows empathy for teamwork.
- Possesses a spirit of service to society
- Values discipline in their activities.
- Shows responsibility in all its commitments

Habits

- Reading
- Writing
- Orderliness
- Punctuality

THE GRADUATION PROFILE FOR THE MASTER IN INNOVATION AND EDUCATIONAL QUALITY

- Adapts and develops study and research methods, to contrast the theoretical results with the reality that it intends to innovate.
- Explains educational problems, based on current educational theories of quality in education.
- It incorporates in a pedagogical way the current information and communication technologies in the processes of innovation and educational quality.
- Works collaboratively and participates in inter- and multidisciplinary academic networks for the development of educational research and innovation projects.
- Respects the members of the educational community as people, attending to their bodily, cognitive, affective and transcendent dimensions.

PROGRAM CURRICULAR LINES

The program has a number of 11 courses that can be taken in a flexible curriculum in 7 school periods.

General Education. It emphasizes the training of the student under the profile of the UPAEP. It has 1 curricular line:

a) Leadership

Professional basic curricular line. It concentrates elementary

courses of the curricular project and they are chosen for their multidisciplinary criteria. It has 3 curricular line:

- a) Educational processes
- b) Management and Social Development
- c) Ethics and autonomy

Terminal Curricular line: The purpose of this lies in the development of skills for the preparation of students in their completion and graduation phase of the academic program. It is made up of 1 curricular line:

a) Research

The study plan for the Master in Innovation and Educational Quality is made up of 84 credits and 11 courses; which the student will take a minimum of 1 and a maximum of 3 courses per cycle, covering a minimum of 6 and a maximum of 18 credits per cycle.

CURRICULAR MAP

The propaedeutic courses must be taken according to the results of your placement exams in English, Physics, Math and / or Computing, depending on your chosen academic program plan.

The elective courses in the terminal curricular lines must be chosen according to your professional preferences.

MASTER'S DEGREE IN PEDAGOGY

MODALITY: Grounded education

CAMPUS: PUEBLA

RVOE: SEP-SES/21/114/04/2667/2019

ACADEMIC PROGRAM PURPOSE

It trains Masters in Pedagogy with an ethical and humanistic vision, based on philosophical, anthropological and psycho-pedagogical foundations, through the reflection of its teaching practice and the valuation and inclusion of the main actors of the educational process in all its stages and modalities, to meet the educational needs of the context in which it operates.

ENTRY PROFILE

Knowledge

- Recognizes the phases of the educational process from its design to its evaluation.
- Distinguishes the need to professionalize their educational practice.
- Identifies social problems related to the educational field.

Abilities and/or skills

- Uses oral and written language effectively.
- Uses teaching, learning and evaluation strategies.
- Establishes interpersonal relationships and collaborative work.
- Shows basic use of technological tools (SCHOOL).
- Manages his/her learning process through technological tools (NOT SCHOOLED).

Attitudes and/or values

- Is committed to the integral development of the human being.
- Is interested in current educational and social needs.
- Possesses a spirit of service to society.
- Values discipline in their activities.
- Writing
- Orderliness
- Punctuality

THE GRADUATION PROFILE FOR THE MASTER IN PEDAGOGY

- Applies the reflective approach in their educational practice to address the complexity of education and its context.
- Employs strategies in educational processes from an inclusive vision, improving learning experiences and relationships of stakeholders in the educational community.
- Contributes to the construction of complex learning by making use of information and communication technology in academic environments.

Transform your teaching practice using intervention plans that solve educational problems in your context.

PROGRAM CURRICULAR LINES

The program has a number of 12 courses that can be taken in a flexible curriculum in 7 school periods.

The redesign in the Master's program focused its attention on only two lines to attend to the professionalization in the areas of teaching and inclusion. The modifications focus on contents that allow responding to the needs in the area of didactics (teaching) and the understanding of concepts related to inclusion that allow the necessary changes in educational institutions.

General Education. It emphasizes the training of the student under the profile of the UPAEP. It has 1 curricular line:

- a) Leadership

Professional basic curricular line. It concentrates elementary courses of the curricular project and they are chosen for their multidisciplinary criteria. It has 2 curricular line:

- a) Pedagogical foundations
- b) Current trends in education

Elective curricular line. It concentrates elementary courses of the curricular project and they are chosen for their multidisciplinary criteria. It has 2 curricular lines:

MASTER'S DEGREE IN MATHEMATICS EDUCATION

MODALITY: Grounded education

CAMPUS: PUEBLA

RVOE: SEP-SES/21/114/04/2668/2019

ACADEMIC PROGRAM PURPOSE

To train Mathematics Education Masters with an ethical, humanistic vision and with deep disciplinary and pedagogical knowledge, who promote ambitious and equitable teaching, learning and evaluation processes, reflecting on the influence that their teaching practice has on the learning of mathematics, in order to assume themselves as agents of change that respond to the educational needs of students in their context.

ENTRY PROFILE

Knowledge

- Distinguishes elementary math concepts in arithmetic, algebra, geometry and data management.

- Recognizes the development and learning processes of their students.
- Identifies the educational purposes, study contents and didactic approach of the mathematics course program at the level he/she teaches.

Abilities and/or skills

- Uses basic information and communication technologies, such as word processors, Internet browsers and e-mail.
- Communicates ideas effectively orally and in writing.
- Leads teaching, learning and evaluation processes in the course of mathematics in elementary, middle and high school classrooms.
- Plans teaching, learning and evaluation processes in the course of mathematics.
- Works collaboratively in educational and social environments.

Attitudes and/or values

- Assumes teaching as a personal and professional vocation.
- Is aware of the importance of their professionalization for the transformation of their teaching practice.
- Is concerned about the educational needs of their students.
- Values education as a means to meet current social needs.

THE GRADUATION PROFILE FOR THE MASTER IN MATHEMATICS EDUCATION

- Poses and solves complex mathematical problems that involve key concepts of the discipline.
- Reflects on their teaching practice to carry out transformations in the process of teaching, learning and evaluating mathematics that respond to the educational needs of their students in their context.
- Designs and implements ambitious forms of intervention in the classroom that promote mathematical learning with understanding in all its students.

PROGRAM CURRICULAR LINES

The program has a number of 12 courses that can be taken in a flexible curriculum in 7 school periods.

General Education. It emphasizes the training of the student under the profile of the UPAEP. It has 1 curricular line:

a) Leadership

Professional basic curricular line. It concentrates elementary courses of the curricular project and they are chosen for their multidisciplinary criteria. It has 3 curricular line:

- a) Mathematical Thinking
- b) Mathematics didactics

c) Topics in education

Terminal Curricular line: The purpose of this lies in the development of skills for the preparation of students in their completion and graduation phase of the academic program. It is made up of 1 curricular line:

MASTER'S DEGREE IN FAMILY ORIENTATION AND DEVELOPMENT

MODALITY: Grounded education

CAMPUS: PUEBLA

RVOE: SEP-SES/21/114/04/2669/2019

ACADEMIC PROGRAM PURPOSE

To train Masters in family orientation and development who, from their own reflection, accompany the members of the family in their environment as the basis of society, favoring the personal, socioemotional and healthy development of its members, from a psycho-pedagogical and social approach, with the purpose of promoting transformation in their context through the elaboration of educational projects of orientation at individual, group, community and institutional levels with an ethical and humanistic sense.

ENTRY PROFILE

Knowledge

- Identifies fundamental concepts of family theory.
- Recognizes the essential elements of the educational process.

Abilities and/or skills

- Manages basic computer elements (Word, Power Point, Excel, information search).
- Develops basic communicative processes (oral, written and technological).
- Plans their learning and actions in an autonomous manner.

Attitudes and/or values

- Is aware of the importance of the dignity of the person and of the family as the natural institution.
- Shows a spirit of service to society.
- Is empathetic with collaborative work.
- Perseveres in the achievement of goals.

THE GRADUATION PROFILE FOR THE MASTER IN FAMILY ORIENTATION AND DEVELOPMENT

- Relates the theoretical - practical foundations of the principles and the function of the family, with its guiding action from a pedagogical, philosophical, sociological, psychological and legal perspective with a comprehensive humanistic approach.
- Generate strategies and specific tools for monitoring the family guidance and accompaniment processes.
- Develops psychoeducational projects adapted to current needs, relating its guiding action to the instances of support for the diversity of family problems with an ethical and responsible attitude.
- Generate processes of personal and community improvement, valuing the dignity of the person, the family and their social environment.

PROGRAM CURRICULAR LINES

The program has a number of 12 courses that can be taken in a flexible curriculum in 7 school periods.

This UPAEP postgraduate course allows us to enter an area of professional action from the “orientation” with a psychopedagogical and social approach, where programs focused on family education are developed from the various areas where our graduates develop, allowing reflection,

prevention, proposal of real projects with concrete actions at the group level, as well as a first-rate accompaniment in the personal sphere.

General Education. It emphasizes the training of the student under the profile of the UPAEP. It has 1 curricular line:

a) Leadership

Professional basic curricular line. It concentrates elementary courses of the curricular project and they are chosen for their multidisciplinary criteria. It has 1 curricular line:

a) Anthropological and social foundations of the family

Fundamental, disciplinary and professional curricular line. It concentrates elementary courses of the curricular project and they are chosen for their multidisciplinary criteria. It has 4 curricular lines:

a) Professional topics

b) Auxiliary disciplines of family orientation

c) Family psychology

d) Education and family

Terminal Curricular line: The purpose of this lies in the development of skills for the preparation of students in their completion and graduation phase of the academic program. It is made up of 1 curricular line:

a) Research

The study plan for the MA in Counseling and Family Development program is made up of 75 credits and 12 courses; which the student will take a minimum of 1 and a maximum of 3 courses per cycle, covering a minimum of 6 and a maximum of 18 credits per cycle.

CURRICULAR MAP

The propaedeutic courses must be taken according to the results of your placement exams in English, Physics, Math and / or Computing, depending on your chosen academic program plan.

MASTER'S DEGREE IN VIRTUAL EDUCATION DESIGN AND MANAGEMENT

MODALITY: Online education

CAMPUS: PUEBLA

RVOE: 20200019

ACADEMIC PROGRAM PURPOSE

To train Masters in Virtual education design and management, from an ethical and humanistic approach, who develop digital teaching competencies, through the design, implementation and evaluation of programs in Virtual Education and with the management and integration of technologies to education, to meet educational challenges, satisfy current training needs and provide comprehensive advice to institutions and companies.

Knowledge

- Recognizes Information and Communication Technologies (ICT), elements to navigate the Internet and Office functions.
- Recognizes web 2.0 tools in educational environments.
- Analyzes the main characteristics of social networks.
- Distinguishes the different virtual educational environments.

Abilities and/or skills

- Displays skills to navigate the internet or the web.
- Interacts in groups in an active way.
- Shows decision-making skills in certain situations.
- Manages basic virtual learning environments.

Attitudes and/or values

- Shows service attitude.
- Is concerned about promoting the ethical use of the Internet and its applications.
- Shows leadership attitude.

THE GRADUATION PROFILE FOR THE MASTER IN VIRTUAL EDUCATIO DESIGN AND MANAGEMENT

- Integrates computer skills and knowledge related to the use of technology in education with his professional experience.
- Designs proposals and educational strategies to carry out projects in Virtual Education.
- Develops digital teaching materials, to apply them in the virtual context in which he/she works.
- Manages and interprets communication codes in digital media, to manage support systems in Virtual Education.
- Implements projects that involve the use of Technologies for Learning and Knowledge (TAC), promoting research in design or consulting in Virtual Education.
- Generates and implements strategies in virtual and digital learning environments, to promote the educational quality of its context.

CURRICULAR MAP

The propaedeutic courses must be taken according to the results of your placement exams in English, Physics, Math and / or Computing, depending on your chosen academic program plan.

The elective courses in the terminal curricular lines must be chosen according to your professional preferences.

DOCTORATE DEGREE IN EDUCATION

MODALITY: Grounded education

CAMPUS: PUEBLA

RVOE: SEP-SES/21/114/01/1270/2015

ACADEMIC PROGRAM PURPOSE

It trains Doctors of Education committed to quality, from a humanistic, innovative, prospective and transcendent vision, through the integration of different scientific methodologies, with the purpose of designing, developing and evaluating research from an interdisciplinary and multidisciplinary approach that promotes the improvement of education.

Knowledge

- Analyzes by means of statistical concepts problems related to education.
- Argues his writings and discourse of the current disciplines that study educational phenomena.
- Critically compares the main educational currents
- Identifies the relevant bibliography on the thematic area in which the interest of his/her research is located.

ENTRY PROFILE

- Analyzes academic texts in English in the educational area.

Abilities and/or skills

- Manages mathematical and statistical reasoning.
- Applies reasoning, analysis and synthesis skills to solve problems in the field of education.
- Argue in writing and orally their ideas.
- Evaluates scientific-pedagogical texts.
- Designs educational research projects based on conceptual management.
- Manages approaches, methods, techniques and elementary instruments of educational research.

Attitudes and/or values

- Assume with responsibility their commitments.
- Shows a favorable attitude towards research.
- Confronts with interest, sensitivity and reflection the reality of social, political and economic movements that have an impact on education.
- Works individually and collaboratively.
- Is independent and self-regulated.
- Values service to others.

Habits

- Reading and writing
- Punctuality
- Observation and reflection.

THE GRADUATION PROFILE FOR THE DOCTOR IN EDUCATION

- Constructs theoretical, global and coherent explanations from research methods that generate knowledge, to solve educational problems.
- Integrates creative, divergent, critical and reflective thinking in the research processes that it develops.
- Innovate, individually or as a team, the various resources used in the educational research processes in which it participates.
- Respect everyone involved in the research processes, recognizing them as people in their bodily, cognitive, affective and transcendent dimensions.
- Develops educational research, in which respect for cultural and theoretical diversity in interdisciplinary and transdisciplinary environments is assumed.

PROGRAM CURRICULAR LINES

The program has a number of 14 courses that can be taken in a flexible curriculum in 8 school periods.

The academic program was developed based on the requirements of the industry / organizations / government / corporations education of graduates with professional competencies in the area of education.

General Education. It emphasizes the training of the student under the profile of the UPAEP. It has 1 curricular line:

a) Human Development

Professional basic curricular line. It concentrates elementary courses of the curricular project and they are chosen for their multidisciplinary criteria. It has 4 curricular line:

a) Educational streams

b) Education

c) Ethics and autonomy

d) Educational processes

e) Management and social development

Terminal Curricular line: The purpose of this lies in the development of skills for the preparation of students in their completion and graduation phase of the academic program. It is made up of 1 curricular line:

a) Research

The study plan for the PhD in education is made up of 106 credits and 14 courses; which the student will take a minimum of 1 and a maximum of 3 courses per cycle, covering a minimum of 6 and a maximum of 18 credits per cycle.

CURRICULAR MAP

The propaedeutic courses must be taken according to the results of your placement exams in English, Physics, Math and / or Computing, depending on your chosen academic program plan.

The elective courses in the terminal curricular lines must be chosen according to your professional preferences.

BACHELOR'S DEGREE IN DENTISTRY

MODALITY: Grounded education

CAMPUS: PUEBLA

RVOE: SEP-SES/21/114/04/1433/2015

ACADEMIC PROGRAM PURPOSE

It trains Bachelors in Dentistry with a humanistic sense and professional ethics, capable of diagnosing, prognosticating and preventing oral cavity pathologies and their systemic effects as well as rehabilitating and intervening in surgical procedures; developing clinical practice, analysis techniques and dental procedures in prevention and rehabilitation, which allow them to educate and encourage habits in the population and solve the problems of each patient; all this being aware of their leadership and commitment to oral health in the regional, national and international environment for the benefit of the community.

ENTRY PROFILE

Knowledge

- Health Sciences
- English language
- Computer skills

Abilities and/or skills

- Ability to establish interpersonal relationships
- Observation and analysis skills
- Spatial sense

Attitudes and/or values

- Interest in aesthetics
- Service attitude
- Creative and dynamic personality
- Willingness to work collaboratively

Habits:

- Independent study
- Responsible and ethical
- Continuous search for solutions

THE GRADUATION PROFILE FOR THE BACHELOR IN DENTISTRY

- Applies the methods of dental clinical diagnosis.
- Diagnose the different pathologies from the dental disciplinary areas.
- Develops prevention and rehabilitation plans considering the different alternatives for oral health.
- Interacts with the areas of dental specialties in an interdisciplinary manner.
- Communicates to the patient his/her health condition and treatment alternatives.
- Executes clinical procedures to restore the health, function and esthetics of the oral cavity.
- Uses dental materials, instruments and equipment to develop the professional practice.
- Implements technology in dental equipment for their professional work.
- Applies the official norms that govern the dental profession.
- Develops administrative and management practices in the dental office.
- Designs research projects based on dental evidence.

- Becomes aware of the existing needs in their environment, recognizing their social commitment.
- Educates in prevention and promotes oral health in the population.
- Is permanently updated in the study of the dental area and specialization.
- Exercises his/her profession in a responsible, humanistic, ethical and professional manner.

BACHELOR'S DEGREE NUTRITION

MODALITY: Grounded education

CAMPUS: PUEBLA

RVOE: SEP-SES/21/114/04/1048/2013

ACADEMIC PROGRAM PURPOSE

It trains Bachelors in Nutrition using specific methodology in the evaluation, diagnosis and treatment of individuals and populations with particular needs, in addition to managing food programs and services, to generate proposals aimed at the implementation of actions to meet the needs of food and nutrition from the regional, national and international level with a humanistic vision and ethical sense.

ENTRY PROFILE

Knowledge

- Biology, chemistry and basic mathematics
- Basic English
- Basic computer skills
- General culture on universal and Mexican history

Abilities and/or skills

- Observe, analyze and synthesize texts.
- Lead work teams
- Expressing oneself orally and in writing
- Apply information technologies.
- Work in teams
- Think critically and creatively.
- Make decisions in an assertive manner.
- Affinity to topics related to health such as anatomy, physiology.
- Affinity to topics related to regional and global socio-cultural issues.

Attitudes and/or values

- Taste for health-related topics such as anatomy, physiology, chemistry, biochemistry and related courses.
- Interest in regional and global socio-cultural issues.
- Initiative and proactivity.
- Vocation of service and altruism.
- Sociability and empathy.
- Respect for their peers.
- Sense of responsibility.
- Ethical and moral sense.

Habits

- Habit of time organization.
- Habit of observation and appreciation of reality.
- Habit of personal leadership.
- Habit of effective communication.
- Habit of self-regulating their academic activities.

THE GRADUATION PROFILE FOR THE BACHELOR IN NUTRITION

1. Identifies the determinant factors in the health-disease process, such as psychological, social, economic and environmental factors.
2. Proposes differential diagnoses.
3. Interprets diagnostic tests.
4. Communicates the nature and severity of the condition.
5. Performs diagnostic and therapeutic procedures through anthropometric measurements.
6. Uses dietary evaluation instruments.
7. Interprets biochemical tests.
8. Prescribes nutritional treatments corresponding to each physiological or pathophysiological situation.
9. Uses scientific evidence in the practice of nutrition and development of research.
10. Applies statistical analysis of data.
11. Develops research projects related to nutrition and food.
12. Acts with curiosity, initiative and entrepreneurship.
13. Uses information and its technologies in a health context.
14. Uses nutrition software and platforms for evaluation, diagnosis, nutritional treatment as well as for research.
15. Applies ethical and legal principles in the practice of nutrition by obtaining and recording informed consent.
16. Maintains confidentiality, respects diversity and the rights of the patient, the health team and the community.
17. Provides nutritional treatment to the terminally ill patient.
18. Recognizes the different health and nutrition systems and services of the population.
19. Participates within the health team in the community.
20. Applies the health and nutrition policies and programs of the country.
21. Manages resources for health and nutrition care.
- 22.

22. Recognizes the epidemiological profile of the population and applies the principles of health promotion and disease prevention.

23. Respects the pertinent biosecurity norms and official standards.

24. Develops new technologies in food through the application of chemistry and food technology in sustainable development.

CURRICULAR MAP

The propaedeutic courses must be taken according to the results of your placement exams in English, Physics, Math and / or Computing, depending on your chosen academic program plan.

The elective courses in the terminal curricular lines must be chosen according to your professional preferences.

BACHELOR'S DEGREE IN PHYSICAL THERAPY

MODALITY: Grounded education

CAMPUS: PUEBLA

RVOE: SEP-SES/21/114/04/1393/2015

ACADEMIC PROGRAM PURPOSE

It trains Bachelors in Physical Therapy, who respond to the social needs related to the human body movement system and its alterations, applying the process of examination, evaluation, diagnosis, prognosis and intervention in the preservation, potentiation and restoration of body functions, to contribute to the bio-psycho-social welfare of the person and its context, in an integral, ethical and humanistic manner.

ENTRY PROFILE

Knowledge

- Recognizes the basic notions of Physics, Chemistry and Computers.
- Identifies main ideas in a text

Abilities and/or skills

- Analyzes texts
- Communicates orally and in writing
- Uses logical reasoning
- Shows creativity

Attitudes and/or values

- Values the dignity of the human person.
- Vocation of service.
- Interest in health sciences
- Demonstrates tolerance and openness to new ideas

Habits

- Observation and reflection
- Independent study and autonomous work
- Continuous search for solutions
- Shows openness to learning

THE GRADUATION PROFILE FOR THE BACHELOR IN PHYSICAL THERAPY

- Employs the intervention model in Physical Therapy with its components of examination, evaluation, diagnosis, prognosis and intervention.
- Applies the theoretical and methodological frameworks that support the application of methods and techniques of physical therapy.
- Performs the clinical reasoning process relating theory, research and physiotherapeutic practice.
- Promotes the well-being and health of the individual, family and community in relation to their functional potential and social participation.
- Prevents, diagnoses and treats dysfunctions related to the human body movement system in the individual and the community.
- Establishes verbal, non-verbal, written and electronic communication in their professional context.
- Establishes interdisciplinary relationships that facilitate patient/user centered collaboration.
- Engages in research activities related to Physical Therapy.

- Employs ethical, regulatory and legal principles in the professional practice of Physical Therapy.

CURRICULAR MAP

The propaedeutic courses must be taken according to the results of your placement exams in English, Physics, Math and / or Computing, depending on your chosen academic program plan.

The elective courses in the terminal curricular lines must be chosen according to your professional preferences.

SPECIALITY DEGREE IN RESTORATIVE DENTISTRY

MODALITY: Grounded education

CAMPUS: PUEBLA

RVOE: SEP-SES/21/114/04/2067/2017

ACADEMIC PROGRAM PURPOSE

To train specialists in Restorative Dentistry with ethical and humanistic sense that develop processes of prevention, diagnosis, prognosis, treatment and prosthetic rehabilitation, through the application of state-of-the-art technology in the development of fixed, removable and implant supported prosthesis, to effectively address complex oral and dental problems, focused on restoring oral function to patients with pathologies of the oral cavity.

Knowledge

- Biomedical, clinical and humanistic areas.
- Dental areas, especially restorative procedures.
- Cranio-maxillo-facial health problems within the context of the country's health.

ENTRY PROFILE

- Participates in the interdisciplinary management of the different stomatological areas for each patient.
- Scientific bases to practice the dental profession.
- Current regulations and health and environmental standards.

Abilities and/or skills

- Locate the problems of cranio-maxillo-facial health within the context of the country's health problems.
- Applies techniques to prevent damage to stomatological health, both individual and collective.
- Recognizes and identifies the prevalent stomatological pathologies.
- Plans treatments and issues prognosis on their evolution.
- Performs manual work and laboratory procedures.
- Plans and executes actions to promote dental health, participates in disease prevention, recovery and rehabilitation.
- Properly handles instruments, material and equipment of dental medical use necessary for the practice of their profession.
- Reading and comprehension of the English language.

Attitudes and/or values

- Understands oral health as one of the fundamental values of the individual and the community.
- Is interested in continuing education and updating in the discipline.

- Adopts the dental and regulatory provisions in force regarding health and environmental standards, conducting themselves according to their own ethical and humanistic principles that require the care of the biological, physical and psychological integrity of patients.
- Presents a firm and persuasive character of conviction in dealing with the patient, as well as presenting a serene, adaptable attitude and willingness to work.
- Has full time, emotional stability and optimal health.

Habits

- Study habits.
- Habit of time organization.
- Habit of interest in discovering new knowledge.
- Habit of personal leadership.
- Habit of effective communication.

THE GRADUATION PROFILE FOR THE SPECIALIST IN RESTORATIVE DENTISTRY

- Applies the basic medical theoretical knowledge of the stomatognathic system to treat in a timely manner the different diseases related to the restoration of oral health.
- Diagnoses alterations and pathologies of the oral cavity and stomatognathic system.
- Treats the diseases of restorative dentistry and implant

dentistry in the systemic and local aspects in its different diagnostic and maintenance phases.

- Applies the surgical techniques of treatment
- Actively participates in the interdisciplinary health team, emphasizing the restorative health point of view.
- Executes comprehensive rehabilitation treatments to restore functionality, esthetics and dentomaxillofacial harmony.
- Applies the methods, techniques, instruments and procedures of scientific research, which allow him/her to propose proposals for scientific medical discovery in the area of restorative dentistry.

SPECIALITY DEGREE IN PERIODONTICS

MODALITY: Grounded education

CAMPUS: PUEBLA

RVOE: SEP-SES/21/114/04/2071/2017

ACADEMIC PROGRAM PURPOSE

To train specialists in Periodontics with ethical and humanistic sense to prevent and detect the etiology of periodontal disease, establishing a diagnosis, prognosis and treatment plan, in order to generate alternatives to restore the health of the supporting tissues.

Knowledge

- Identifies cranio maxillofacial health problems within the health context of the country.
- Points out dental preventive and surgical procedures.
- Recognizes the stomatognathic physiological processes.
- Relates the disciplines that integrate the basic dental science.
- Distinguishes the regulations in force in the area of dentistry, as well as the health standards

ENTRY PROFILE

Abilities and/or skills

- Applies preventive methods to avoid periodontal diseases.
- Plans dental treatments.
- Develops follow-up plans to solve oral health problems.
- Performs dental surgical procedures.
- Proposes actions for the promotion of oral health.
- Handles instruments, material and equipment of dental medical use.

Attitudes and/or values

- Is interested in the development of techniques for the treatment of periodontal disease.
- Is concerned about the improvement of oral health of patients.
- Appreciates interdisciplinary work to help maintain oral health.
- Acts ethically in the application of dental treatments.
- Is interested in continuing education in his/her area of training.

Habits

- Hygiene habit.
- Habit of reading and consultation.
- Habit of observation and reflection.
- Habit of patient service.
- Habit of effective communication.

THE GRADUATION PROFILE FOR THE SPECIALIST IN PERIODONTOLOGY:

- Develops medical processes in the biomedical and clinical areas, with the necessary scientific basis to make the diagnosis and therapy of periodontal disease.
- Systematically examines the clinical history to obtain a presumptive diagnosis of the supporting tissues.
- Proposes the necessary periodontal and interdisciplinary treatment plan according to the patient's characteristics in order to avoid consequent complications.
- Applies treatments according to the periodontal disease in the systemic and local aspects in its different phases of diagnosis and maintenance.
- Uses different surgical techniques of periodontal treatment.
- Actively participates in the interdisciplinary health team, emphasizing the periodontal health point of view.
- Implements methods, techniques, instruments and procedures of scientific research, which allow him/her to make proposals of scientific medical discovery in the area of Periodontics.

CURRICULAR MAP

The propaedeutic courses must be taken according to the results of your placement exams in English, Physics, Math and / or Computing, depending on your chosen academic program plan.

The elective courses in the terminal curricular lines must be chosen according to your professional preferences.

SPECIALITY DEGREE IN ORTHODONTICS

MODALITY: Grounded education

CAMPUS: PUEBLA

RVOE: SEP-SES/21/114/04/1947/2017

ACADEMIC PROGRAM PURPOSE

It trains Orthodontic Specialists, with ethical and humanistic sense, who attend to the prevention and/or correction of dentoalveolar, skeletal or skeletal dental malocclusion problems, through the design of a global orthodontic diagnosis, in order to apply a specific treatment plan appropriate to the problems presented by the patient.

ENTRY PROFILE

Knowledge

- Recognizes the elements that integrate the clinical sciences of the dental discipline.
- Identifies the problems of cranio-maxillo-facial health within the context of the country's health.
- Continuously reviews the information generated in his/her professional field in order to be updated.

- Master the scientific concepts to practice their dental profession.
- Enunciates the rules in force, as well as the health and environmental norms in the area of orthodontics.
- Identifies the prevalent stomatological pathologies.

Abilities and/or skills

- Detects (classifies) cranio-maxillo-facial health problems within the context of the country's health problems.
- Applies techniques for the prevention of damage to stomatological health, both individual and collective.
- Executes health promotion actions.
- Manages the instruments, material and equipment of dental medical use necessary for the exercise of their profession.
- Plans the treatment to be followed in the face of detected stomatological pathologies.
- Participates in the interdisciplinary management of the different stomatological areas in patient, such as Periodontics, Maxillofacial Surgery, Restorative Dentistry and Pediatric Stomatology treatment needs.

Attitudes and/or Values

- Is interested in the oral health of the individual and the community.
- Respects the dental and regulatory provisions in force regarding health and environmental standards.

- Is aware of the ethical and humanistic principles required to care for the biological, physical and psychological integrity of patients.
- Willingness to work in multi- and interdisciplinary health teams.

Habits

- Reading habit
- Hygiene habits
- Habit of cleanliness.

THE GRADUATION PROFILE FOR THE SPECIALIST IN ORTHODONTICS:

- Develops a bioethical sense based on the care of the individual and his/her community.
- Applies the basic dental sciences of growth and development of the individual according to his/her age.
- Applies knowledge of anatomy to recognize the tissues and structures in which orthodontic treatment is applied.
- Performs orthodontic diagnostics according to the detected needs.
- Interprets the functions and cellular components to take advantage of this knowledge in the diagnosis.
- Differentiates normal maxillofacial characteristics from

pathological ones in order to make an accurate diagnosis.

- Applies orthodontic clinical techniques for comprehensive analysis.
- Proposes an adequate treatment plan for the diagnosed pathology.
- Interacts in multidisciplinary teams to perform integral treatments.
- Performs research related to the orthodontic area to innovate clinical and technological procedures.

CURRICULAR MAP

The propaedeutic courses must be taken according to the results of your placement exams in English, Physics, Math and / or Computing, depending on your chosen academic program plan.

The elective courses in the terminal curricular lines must be chosen according to your professional preferences.

MASTER'S DEGREE IN CLINICAL NUTRITION

MODALITY: Grounded education

CAMPUS: PUEBLA

RVOE: SEP-SES/21/114/04/1374/ 2015

ACADEMIC PROGRAM PURPOSE

It trains Masters in Clinical Nutrition who develop in interdisciplinary health teams, using the process of nutritional care individually or in groups and basic and applied research in nutrition, to generate strategies that contribute to the improvement of the health status of the individual in situations related to various pathologies.

ENTRY PROFILE

Knowledge

- Distinguishes the basic concepts in biochemistry.
- Describes the basic concepts in physiology.
- Identifies the basics in epidemiology.
- Recognizes basic computer science concepts.

Abilities and/or skills

- Analyzes and synthesizes ideas and processes.
- Manages diverse information.
- Communicates orally and in writing in the native language.
- Reads texts in English.
- Applies verbal and mathematical reasoning.
- Exposes ideas with clarity and ease.
- Listens actively.
- Integrates in team work.
- Observes in a systematized way.
- Expresses interest in the community.

Attitudes and Values

- Is aware of the importance of honesty.
- Demonstrates responsibility.
- Respects the individuality of the person.
- Acts with discipline to achieve goals.
- Manifests an ethical commitment
- Empathizes for personal contact.

Habits

- Daily reading
- Planning of activities
- Organization
- Attention to detail
- Personal and environmental hygiene

THE GRADUATION PROFILE FOR THE MASTER IN CLINICAL NUTRITION

- Evaluates the patient who presents malnutrition or nutritional risk, to diagnose the impact on metabolic expenditure.
- Estimates the nutritional requirements of the patient according to his/her clinical condition.
- Indicates nutritional therapy according to the patient's pathology in coordination with the multidisciplinary medical team.
- Proposes dietary modifications, according to the organic disorders that present the prevalent pathologies in the patient.
- Applies the latest scientific advances in nutritional therapy of prevalent pathologies in the different stages of life, but especially in the most vulnerable who are children and adults.
- Designs research in Clinical Nutrition, from a scientific approach.
- Participates in training and discussion spaces representing the specific nutritional knowledge within the health team.
- Participates actively within the health team and in the community with the principles of health promotion and prevention.

CURRICULAR MAP

The propaedeutic courses must be taken according to the results of your placement exams in English, Physics, Math and / or Computing, depending on your chosen academic program plan.

The elective courses in the terminal curricular lines must be chosen according to your professional preferences.

----	----

MASTER'S DEGREE IN HEALTH SCIENCES

MODALITY: Grounded education

CAMPUS: PUEBLA

RVOE: SEP-SES/21/114/04/1400/ 2015

ACADEMIC PROGRAM PURPOSE

It trains Masters in the area of health sciences, within an ethical and humanistic framework, researchers capable of solving health problems, through the integration of scientific research in relation to the structure and functions of the organism at molecular, cellular and systemic levels, with the purpose of contributing to raise the level of awareness and strategies that generate greater welfare in the population in the field of health.

ENTRY PROFILE

Knowledge

- Distinguishes the basic concepts in biochemistry.
- Describes the basic concepts in physiology.
- Identifies the basics in epidemiology.
- Recognizes basic computer science concepts.

Abilities and/or skills

- Uses verbal and mathematical reasoning.
- Shows facility in interpersonal relationships
- Demonstrates communication skills
- Willingness to work in a team
- Performs systematized observation
- Shows interest in the community
- Demonstrates critical and analytical thinking

Attitudes and Values

- Acts with honesty in his/her work and personal life.
- Performs responsibly in diverse environments
- Respects the individuality of the person
- Appreciates human values
- Acts with discipline to achieve goals
- Manifests an ethical commitment.

Habits

- Reading
- Research
- Independent study.
- Of continuous learning.

THE GRADUATION PROFILE FOR THE MASTER IN HEALTH SCIENCES

- Proposes scientifically based research projects from a complex perspective.
- Proposes solutions to diseases derived from poverty, natural disasters, epidemiological pathologies and by population sector, from a scientific, ethical and humanistic approach.
- Designs and executes programs related to health, focused on the patient or the institution.
- Communicates oral and written conclusions before specialized and non-specialized audiences.
- Acts respecting the ethical aspects of research and professional activities.
- Proposes public health projects for the prevention and control of diseases.
- Evaluates epidemiological trends to prevent risks and make decisions to improve the treatment of a pathology.
- Makes decisions, in patient care or project management, based on health sciences.

CURRICULAR MAP

The propaedeutic courses must be taken according to the results of your placement exams in English, Physics, Math and / or Computing, depending on your chosen academic program plan.

The elective courses in the terminal curricular lines must be chosen according to your professional preferences.

----	----

MASTER'S DEGREE IN PUBLIC HEALTH

MODALITY: Grounded education

CAMPUS: PUEBLA

RVOE: SEP-SES/21/114/04/1449/ 2015

ACADEMIC PROGRAM PURPOSE

To train Masters in Public Health who intervene with proposals for policies, plans and programs of action within the framework of the essential functions of public health, through the application of methodological, social and ethical aspects that respect the human person in his dignity and freedom, in order to promote the strengthening and consolidation of health systems with an interdisciplinary approach.

ENTRY PROFILE

Knowledge

- Explains articles in English.
- Describes public health problems.

- Explains scientific texts.
- Identifies the elements of basic statistics.
- Distinguishes programs in the area of health.

Abilities and/or skills

- Uses basic computer software.
- Has the capacity to synthesize information.
- Formulates solutions to problems.
- Works in multidisciplinary teams.

Attitudes and Values

- Is committed to continuous work.
- Is an ethical, responsible and respectful person.
- Vocation for the pursuit of the welfare of individuals and groups, without discrimination.
- Is interested in public health problems.

Habits

- Critical, logical and creative thinking.
- Habit of reading in the area of public health.
- Habit of observation and reflection.
- Works in a methodical and hierarchical way.
- Habit of independent study.

THE GRADUATION PROFILE FOR THE MASTER IN PUBLIC HEALTH:

- Designs public health research projects.
- Evaluates public health programs in different contexts.
- Applies communicative strategies and proposes actions to improve the level of health based on the health diagnosis of the population.
- Designs intervention strategies promoting the improvement of healthy lifestyles.
- Develops research and divulgation articles in the area of public health.
- Assesses the distribution of environmental, biological and cultural risks.

CURRICULAR MAP

The propaedeutic courses must be taken according to the results of your placement exams in English, Physics, Math and / or Computing, depending on your chosen academic program plan.

The elective courses in the terminal curricular lines must be chosen according to your professional preferences.

MASTER'S DEGREE IN HEALTHCARE MANAGEMENT

MODALITY: Grounded education

CAMPUS: PUEBLA

RVOE: SEP-SES/21/114/04/1602/2016

ACADEMIC PROGRAM PURPOSE

It trains Masters in Healthcare management, with an integral vision, to manage organizations in the medical area, improving their competitiveness with the application of administrative strategies and the necessary skills to improve the quality of service, within an ethical and humanistic framework.

ENTRY PROFILE

Knowledge

- Identifies basic mathematical concepts.
- Recognizes basic concepts of Administration.
- Enunciates basic accounting concepts.
- Describes the basic elements and the registration of operations.
- Distinguishes the programs in the health area.

Abilities and/or skills

- Manages Statistical concepts.
- Uses computer packages.
- Communicates orally and in writing.
- Analyzes and synthesizes texts.
- Uses basic administrative techniques and processes.
- Formulate solutions to diverse problems.
- Works in multidisciplinary teams.

Attitudes and Values

- Commits to multidisciplinary work.
- Manages with responsibility.
- Is respectful in his/her actions with patients, colleagues and peers.
- Shows vocation for the pursuit of the welfare of individuals and groups, without discrimination.

Habits

- Critical and logical thinking.
- Habit of reading in the area of health and administration.
- Habit of observation and reflection.
- Habit of independent study.

THE GRADUATION PROFILE FOR THE MASTER IN MANAGEMENT OF HEALTH INSTITUTIONS

- Generates strategies to improve customer service by applying administrative and medical tools through research.
- Makes improvement decisions through the analysis of public health problems at state, national and global levels.
- Manages health institutions under ethical and humanistic principles for the achievement of institutional goals.
- Establishes administrative and organizational processes, through research in health units, that enhance the human and professional capacities of their team.
- Evaluates and applies quality norms and standards of the health area in the medical units.
- Establishes competitive advantages that allow him/her to reach, sustain and improve a certain position of the organization in public or private health, lucrative or not, in the socioeconomic environment.
- Manages material and financial resources and human capital effectively and efficiently in health institutions.
- Promotes an organizational culture based on a value system in which diversity is respected, open to the link with the community.

CURRICULAR MAP

The propaedeutic courses must be taken according to the results of your placement exams in English, Physics, Math and / or Computing, depending on your chosen academic program plan.

The elective courses in the terminal curricular lines must be chosen according to your professional preferences.

BACHELOR'S DEGREE IN BIONIC ENGINEERING

MODALITY: Grounded education

CAMPUS: PUEBLA

RVOE: SEP-SES/21/114/04/1534/2016

ACADEMIC PROGRAM PURPOSE

It trains Bionic Engineering Bachelors, who integrate interdisciplinary improvement programs in health institutions and apply science and technology in biomedical instrumentation, in people and veterinary medicine, through innovation, design, operation and maintenance of systems and hospital equipment for diagnosis and rehabilitation, to generate proposals aimed at the implementation of technological actions that meet the needs in the field of health, in the regional, national and international context, with a humanistic vision and professional ethics.

ENTRY PROFILE

Knowledge

- Defines the basic fundamentals of the natural sciences.
- Recognizes basic science notions of mathematics, physics and chemistry.

- Identifies basic computer programs.
- Interprets basic English language.

Skills

- Observes, analyzes and synthesizes information.
- Employs analytical and synthetic reasoning.
- Solves physical-mathematical problems.
- Creativity and imagination.

Attitudes and/or values

- Values the dignity of living beings.
- Inclination for the exact sciences.
- Values collaborative and multidisciplinary work.
- Responsibility.

Habits

- Systematizes responsible actions.
- Openness to continuous learning.
- Observation and reflection.
- Order and disciplin.

THE GRADUATION PROFILE FOR THE BACHELOR IN BIONIC ENGINEERING

Solve problems related to bionic instrumentation.

Develop prosthetics and osteoses.

Provide technical support and maintenance to health-related equipment.

Prepare reports that meet the technical, safety and environmental requirements of the health sector.

Design bionic instrumentation and equipment.

Develop bionic engineering projects related to the technology of prevention and rehabilitation in people and animals

Establish procedures for the prevention, technical support and conditioning of facilities to medical equipment.

PROGRAM CURRICULAR LINES

The program has a number of 64 subjects that can be taken on a flexible curriculum in 9 school periods.

This second point each academic program should be developed according to its structure. The intention is not to make a description of the contents of each of the courses, but an overview of each block.

It consists of:

General Education (institutional curricular line): General courses, which consist of the integral training of the student and the study of foreign languages.

FHU006: Person and Truth; FHU007: Person and Freedom; FHU008: Person, Family and Society; FHU009: Person and Transcendence; FHU010: Contemporary Person and Culture; FHU011: Mexican Person and Identity.

OPI001: Language and culture optional 01; OPI002: Language and culture optional 02; OPI003: Language and culture optional 03; OPI004: Language and culture optional 04.

Propaedeutic Training (if any): courses to help the student improve their deficiencies and continue their academic curriculum.

University Mathematics Basics; Basic English, Intermediate English 1, Intermediate English 2

Theoretical Training (basic professional curricular line): courses that develop the theoretical skills of the student through a common university curricular line.

FIS021: Static; FIS023: Material Mechanics; FIS031: Material Mechanics; FIS024: Materials Science; FIS025: Thermodynamics; QUI020: General Chemistry; TCDD101: Programming Basics; TCD102: Data Structure; TCD202: Advanced Programming; MIN003: Mathematics I; MIN004: Mathematics II; MIN005: Mathematics III; MIN006: Mathematics IV; MIN009: Linear Algebra; MN007: Probability and Statistics. LIB102:

Basics of Bionic Engineering; MEC105: Measurement and instrumentation; MEC104: Mechanical Drawing; BIO003: Molecular Biology; LIB103: Bioelectromagnetism.

Disciplinary training (professional curricular line and elective curricular line), specialization courses that make up the common curricular line and professional curricular line.

LIB205: Bioelectricity; LIB206: Signal Processing; LIB207: Bionic Instrumentation; LIB208: Clinical Engineering; LIB209: Biomaterials; LIB210: Biomechanics; LIB211: Prosthetic systems; LIB211: Prosthetic Design. MVZ106: Introduction to veterinary medicine and zootechnics; MED026: Skeletal Muscular Anatomy; IMA216: Metrology; IDA101: Computerized mechanical drawing, IMA002: Prototyping; MEC215: Machines and Mechanisms; MEC216: Mechanical Design; IQI005: Fluid mechanics; MEC219: Electro-Oleoneumatic Systems; IET102: Circuit analysis; IET201: Electronic Amplifiers; IET202: Electronic filters; IET400: Signal sensors and conditioners; MEC220: Electrical machines; MEC221: Power Electronics; IET204: Microprocessors and microcontrollers; MEC212: Digital Interfaces; MEC213: Embedded Systems; IET211: Fiber optic technology.

Research courses (terminal curricular line): courses with research profile and project development, which integrates a project or final work.

LIB405: Modeling of Bionic Systems.

CURRICULAR MAP

The propaedeutic courses must be taken according to the results of your placement exams in English, Physics, Math and / or Computing, depending on your chosen academic program plan

The elective courses in the terminal curricular lines must be chosen according to your professional preferences.

BACHELOR'S DEGREE IN CIVIL ENGINEERING

MODALITY: Grounded education

CAMPUS: PUEBLA

RVOE: 20192740

ACADEMIC PROGRAM PURPOSE

It trains Bachelors in Civil Engineering, with an ethical and humanistic sense, who plan, design, build, supervise, manage and provide maintenance to civil works in any public, private or research environment, through the observation, analysis, evaluation and optimization of material, financial and human resources of civil projects, to provide solutions to problems regarding infrastructure and construction.

ENTRY PROFILE

Knowledge

- Recognizes the basic notions of mathematics, physics and chemistry.
- Distinguishes the techniques and tools of engineering.
- Analyzes the tools of information technologies
- Lists physical/natural phenomena and their effects.

Skills

- Applies observation to identify social problems and needs
- Uses English language at a basic level
- Uses common sense, creativity and inventiveness

Attitude/value

- Interested in teamwork
- Works with responsibility
- Cares for the environment

THE GRADUATION PROFILE FOR THE BACHELOR IN CIVIL ENGINEERING

Design, build and supervise infrastructure works.

Plan, schedule and control civil engineering works and services.

Direct and execute the maintenance and rehabilitation of the buildings.

Assess and mitigate the environmental impact of infrastructure works.

Direct and lead human talent, as well as manage material and financial resources in civil engineering projects.

Propose solutions that contribute to the sustainable development and resilience of buildings.

Apply knowledge of the basic sciences and sciences of civil engineering.

Use information technologies, software and tools for civil engineering.

Interact with multidisciplinary groups and provide comprehensive civil engineering solutions.

PROGRAM CURRICULAR LINES

The program has a number of 62 courses that can be taken on a flexible curriculum in 9 school periods.

This second point each academic program should be developed

according to its structure. The intention is not to make a description of the contents of each of the courses but an overview of each block.

It consists of:

General Education (institutional curricular line): General courses, which consist of emphasizing student training under the UPAEP profile.

Person and Truth

Person and Freedom

Person, Family and Society

Person and Contemporary Culture

Person and the Mexican Identity

Person and Transcendence

Entrepreneurship

Advanced English I

Advanced English II

Global Perspective

Propedeutic Training (if you contemplate it) consisting of... (same in each case)

Introduction to University Mathematics

Basic Physics

Basic English I

Basic English II

Intermediate English I

Intermediate English II

Theoretical training (basic professional curricular line), consisting of multidisciplinary elementary courses that provide the theoretical foundations of the basic sciences of engineering.

Differential calculus of one variable

Integral calculus of one variable

Multivariable calculus

Ordinary Differential Equations

Statistical methods for engineering

Linear Algebra with applications

Statics

Dynamics

Electromagnetism

Civil Engineering Tools for Analysis I

Civil Engineering Tools for Analysis II

General Chemistry

Fundamentals of Civil Engineering

Construction Materials

Concrete Technology

Engineering Drawing

Topography

Structural Behavior I

Disciplinary training (professional curricular line and elective curricular line), consisting of courses typical of the formation of civil engineering and focus on 6 curricular lines. (Construction, structures, geotechnical, hydraulics, land roads and construction management)

Construction Procedures

Electrical Installations

Sustainable Development in Civil Engineering

Executive Project Design

Planning, programming and control of the work site

Construction Project Management

Cost and Estimating

Formulation and Evaluation of Construction Projects

Structural Behavior II

Structural Analysis
 Structural Design Criteria
 Concrete Structure Design
 Steel Structure Design
 Design of Masonry Structures
 Earthquake Engineering
 Geology
 Soil behavior
 Soil Mechanics
 Soil Mechanics Laboratory
 Geotechnical Design of Foundation
 General Hydraulics
 Hydraulic Channels
 Hydraulic and Sanitary Facilities
 Hydrology
 Hydraulic Works
 Highways I
 Highways II
 Highways Laboratory
 Transportation

Selected Topics in Civil Engineering I

Selected Topics in Civil Engineering II

Selected Topics in Entrepreneurship I

Selected Topics in Entrepreneurship II

Integrative Project of Social Relevance I

Integrative Project of Social Relevance II

General Education Electives 1

General Education Electives 2

Research courses (terminal curricular line), which consists of recognizing and applying methodological tools to raise, carry out and develop reports of research work.

Civil Engineering Pre-Graduation Seminar

CURRICULAR MAP

The propaedeutic courses must be taken according to the results of your placement exams in English, Physics, Math and / or Computing, depending on your chosen academic program plan

The elective courses in the terminal curricular lines must be chosen according to your professional preferences.

BACHELOR'S DEGREE IN INDUSTRIAL ENGINEERING

MODALITY: Grounded education

CAMPUS: PUEBLA

RVOE: 20192585

ACADEMIC PROGRAM PURPOSE

It trains Bachelors in Industrial Engineering with a humanistic and ethical sense, who design and manage production processes in companies with a global and sustainable vision, through the application of continuous improvement and optimization philosophies, to increase efficiency and competitiveness in organizations.

ENTRY PROFILE

Knowledge

- Relates basic knowledge of mathematics, physics and chemistry.
- Identifies the logical sequence of a process.
- Analyzes how things are created.

Abilities and/or skills

- Communicates effectively orally and in writing
- Works as part of a team.
- Manages Information and Communication Technologies (ICT's) for academic study.

Attitudes and/or values

- Is interested in quality and manufacturing processes.
- Acts with responsibility to take care of the environment.
- Is inclined to the organization and measurement of processes.
- Appreciates creativity as a characteristic of the engineer.

THE GRADUATION PROFILE FOR THE BACHELOR IN INDUSTRIAL ENGINEERING

Develop innovative and sustainable production processes in an environment of flexibility, continuous improvement and safety.

Execute and manage multidisciplinary projects in organizations ensuring stakeholder satisfaction.

Evaluate and design supply chains in a globalized environment from an efficiency perspective.

Generate the audit processes of the Organizational Quality Management System.

PROGRAM CURRICULAR LINES

The program has a number of 60 courses that can be taken on a flexible curriculum in 9 school periods.

It consists of:

General Education (institutional curricular line) : General courses, consisting of courses of language training and humanist seal.

Propedeutic training (if you look at it) consisting of remedial courses of mathematics, physics and languages.

Theoretical training (basic professional curricular line), consisting of training courses in mathematics, physics, chemistry, computation and fundamentals of Industrial Engineering.

Disciplinary Training (professional curricular line and elective curricular line), consisting of materials related to training

in Information Technologies, Manufacturing Processes, Productivity, Optimization, Projects, Logistics and Quality, as well as terminal lines.

Research courses (terminal curricular line), consisting of a course on degree seminary.

CURRICULAR MAP

The propaedeutic courses must be taken according to the results of your placement exams in English, Physics, Math and / or Computing, depending on your chosen academic program plan

The elective courses in the terminal curricular lines must be chosen according to your professional preferences.

BACHELOR'S DEGREE IN MECHATRONICS ENGINEERING

MODALITY: Grounded education

CAMPUS: PUEBLA

RVOE: 20192780

ACADEMIC PROGRAM PURPOSE

It trains Bachelors in Mechatronics Engineering, capable of designing, updating and/or modifying production lines, components and sustainable, feasible and low-cost devices, as well as introducing new technologies to the industry-company according to its context, through the development of elements in mechatronic systems and approach of integral and multidisciplinary solutions in the mechanical, electronic and software areas; to diagnose, automate, innovate and implement solutions in the manufacturing, automotive and electrical sector, all this in an integral, ethical and humanistic way.

ENTRY PROFILE

Knowledge

- Recognizes the basic notions of mathematics, physics and chemistry.
- Identifies basic computer programs.
- Names the basic mechanical and electronic parts of machines.

Abilities and/or skills

- Uses observation, analysis and synthesis
- Uses creativity and inventiveness
- Solves physical-mathematical problems
- Communicates effectively

Attitudes and/or values

- Shows taste for experimental work
- Appreciates working in multidisciplinary teams
- Willingness to work in extended time sessions

THE GRADUATION PROFILE FOR THE BACHELOR IN MECHATRONICS ENGINEERING

Diagnose the needs of mechanical, electrical operation and software update of machines and appliances of the company.

Design maintenance plans and programs for the prevention and correction of faults in mechatronic systems.

Build mechanical and electronic elements using computational and simulation tools.

Develop electronic circuits using the interconnection of technological elements and devices.

Integrate computational, electronic, mechanical and control elements for the automation of manufacturing systems or processes.

Propose technological and manufacturing solutions for the integration of mechatronic models or prototypes.

PROGRAM CURRICULAR LINES

The program has a number of 68 courses that can be taken on a flexible curriculum in 9 school periods.

This second point each academic program should be developed according to its structure. The intention is not to make a description of the contents of each of the courses, but an overview of each block.

It consists of:

General Education (institutional curricular line): General courses, which consist of the integral training of the student and the study of foreign languages.

FHU006: Person and Truth; FHU007: Person and Freedom; FHU008: Person, Family and Society; FHU009: Person and Transcendence; FHU010: Contemporary Person and Culture; FHU011: Mexican Person and Identity.

OPI001: Language and culture optional 01; OPI002: Language and culture optional 02; OPI003: Language and culture optional 03; OPI004: Language and culture optional 04.

Propaedeutic Training (if any): courses to help the student improve their deficiencies and continue their academic curriculum.

University Mathematics Basics; Basic English, Intermediate English 1, Intermediate English 2

Theoretical Training (basic professional curricular line): courses that develop the theoretical skills of the student through a common university curricular line.

FIS021: Static; FIS023: Material Mechanics; FIS031: Material Mechanics; FIS024: Materials Science; FIS026: Electromagnetism; FIS025: Thermodynamics; FIS026:

Electromagnetism; QUI020: General Chemistry; TCDD101: Programming Basics; TCD102: Data Structure; TCD202: Advanced Programming; MIN003: Mathematics I; MIN004: Mathematics II; MIN005: Mathematics III; MIN006: Mathematics IV; MIN009: Linear Algebra; MN007: Probability and Statistics. MEC103: Fundamentals of Mechatronic Engineering; MEC105: Measurement and instrumentation; MEC104: Mechanical Drawing; IDA101: Computerized Mechanical Drawing; IMA216: Metrology; IET101: Digital systems; IET102: Circuit analysis.

Disciplinary training (professional curricular line and elective curricular line), specialization courses that make up the common curricular line and professional curricular line.

MEC211: Computer architecture; IET204: Microprocessors and Microcontrollers; MEC212: Digital interfaces; MEC213: Embedded systems; IET205: Digital signal processing; IET200: Electronic Devices; IET201: Electronic amplifiers; Amplify; IET202: Electronic filters; IET400: Sensors and signal conditioners; MEC220: Electrical machines; MEC221: Power Electronics; IET203: Advanced Circuit Analysis; IND011: Financial Engineering; IND012: Project management; IND103: Project engineering; IET306: Telemetry; MEC214: Telemetry; MEC215: Machines and Mechanisms; Mec216: Machine design; IAE206: Mechanical vibrations; MEC217: Modeling and simulation by finite elements; IMA220: Manufacturing processes; IMA303: Computer Aided Manufacturing; MEC218: Thermodynamic Analysis; IQI005: Fluid Mechanics; MEC219: Fluid Mechanics; MEC220: Electrical

machines; MEC221: Power Electronics; MEC222: Analog Control; MEC223: Digital control; Mec224: Programmable Logic Control.

Research courses (terminal curricular line): courses with a research and project development profile, which integrates a project or final work.

MEC406: Renewable Energy Technologies

CURRICULAR MAP

The propaedeutic courses must be taken according to the results of your placement exams in English, Physics, Math and / or Computing, depending on your chosen academic program plan.

The elective courses in the terminal curricular lines must be chosen according to your professional preferences.

Category	Percentage
Grey Bar	100%
Red Bar	90%

BACHELOR'S DEGREE IN SOFTWARE ENGINEERING

MODALITY: Grounded education

CAMPUS: PUEBLA

RVOE: 20192781

ACADEMIC PROGRAM PURPOSE

To train Bachelors in Software Engineering, with an ethical and humanistic sense that develop and manage interconnected software systems, through the use of software processes, to satisfy the current needs of the industrial, governmental and social sectors both nationally and internationally.

ENTRY PROFILE

Knowledge

- Recognizes basic concepts of English and mathematics
- Identifies various aspects of general culture.

Skills

- Applies basic mathematical logical reasoning processes.
- Shows creative ability.
- Inferences different ways to solve a problem.
- Works collaboratively.

Attitudes and/or values

- Acts in a participatory manner.
- Is interested in the handling, operation and use of computers at an ethical level.
- Demonstrates initiative and desire to learn.
- Is inclined to self-learning.

THE GRADUATION PROFILE FOR THE BACHELOR IN SOFTWARE ENGINEERING

Strategically direct activities involved in the phases of the software development lifecycle.

Use methodologies and paradigms to develop software systems appropriate to current needs.

Manage human and technological resources for the optimal development of software systems.

Apply technological trends to increase the competitive capacity of organizations.

PROGRAM CURRICULAR LINES:

The program has a number of 49 courses that can be taken on a flexible curriculum in 8 school periods.

It consists of:

General Education (institutional curricular line): General courses, consisting of the courses of humanist training and optional courses of language and culture.

Theoretical Training (basic professional curricular line), which consists of establishing the general concepts of the academic program.

Disciplinary Training (professional curricular line and elective curricular line), consisting of 4 elective lines: Entrepreneurship, Disciplinary Area, Academic Systems of Social Relevance and

General Education each of the lines is composed of 2 courses

Research courses (terminal curricular line), consisting of a single course called a software engineering degree seminar.

CURRICULAR MAP

The propaedeutic courses must be taken according to the results of your placement exams in English, Physics, Math and / or Computing, depending on your chosen academic program plan

The elective courses in the terminal curricular lines must be chosen according to your professional preferences.

Response	Percentage
U.S. should take more action to address climate change	85%
U.S. should take less action to address climate change	15%

Students must choose two elective lines from the four existing lines and study four courses, two for each selected line.

BACHELOR'S DEGREE IN COMPUTER SCIENCE AND SYSTEMS ENGINEERING

MODALITY: Grounded education

CAMPUS: PUEBLA

RVOE: 20192779

ACADEMIC PROGRAM PURPOSE

It trains Bachelors in Computer Science and Systems Engineering, with ethical and humanistic sense, who analyze, develop and implement solutions with computer systems, through the integration of elements of computing, networks, intelligent systems and mobile systems, in order to provide timely technological solutions to the needs in the software industry that arise at local, regional, national and international levels, with an attitude of service and professional responsibility.

ENTRY PROFILE

Knowledge

- Recognizes basic concepts of English, computer and mathematics.
- Identifies various aspects of general culture.

Abilities and/or skills

- Collaborates in work teams.
- Infer different ways to solve a problem.
- Analyzes and synthesizes information from different sources in an abstract way.
- Communicates adequately in oral and written form.
- Discriminates critically the information obtained from different sources.

Attitudes and/or values

- Interest in the handling, operation and use of computers.
- Demonstrates initiative and desire to learn.
- Seeks to remain updated in the technological trend through the discipline of self-learning.
- Values truth and justice.

THE GRADUATION PROFILE FOR THE BACHELOR IN COMPUTER SCIENCE AND SYSTEMS ENGINEERING

Implement computer and communications network projects

Minimize security vulnerabilities in systems and networks

Design and Implement AI-based solutions

Encourage technological innovation in problem solving in organizations.

The propaedeutic courses must be taken according to the results of your placement exams in English, Physics, Math and / or Computing, depending on your chosen academic program plan

The elective courses in the terminal curricular lines must be chosen according to your professional preferences.

PROGRAM CURRICULAR LINE

CURRICULAR MAP

General Education (institutional curricular line): General courses, consisting of the courses of humanist training and optional courses of language and culture.

Theoretical Training (basic professional curricular line), which consists of establishing the general concepts of the academic program.

Disciplinary Training (professional curricular line and elective curricular line), consisting of 3 optional lines: Entrepreneurship, Networking and Artificial Intelligence and each of the lines is composed of 3 courses.

Research courses (terminal curricular line), consisting of 2 curricular lines, one integration and one research where students are sought to carry out a project for their degree

Response	Percentage
U.S. should take more action to reduce global warming	80%
U.S. should take less action to reduce global warming	19%

TC MX	407
TC USA	204

BACHELOR'S DEGREE IN INDUSTRIAL CHEMISTRY ENGINEERING

MODALITY: Grounded education

CAMPUS: PUEBLA

RVOE: 20192918

ACADEMIC PROGRAM PURPOSE

It trains Bachelor Industrial Chemical Engineers with ethical and humanistic vision to design, operate and optimize chemical transformation processes, through the use of conservation principles, thermodynamic, kinetic and transport analysis, as well as the use of unitary operations; in order to develop consumer goods and sustainable industrial chemical engineering projects.

ENTRY PROFILE

Knowledge

- Recognizes the physical relationships between speed, force, mass and work.
- Identifies the properties of matter and its physical and chemical changes.

- Distinguishes the basic concepts of inorganic and organic chemistry.
- Interprets the elements of a mathematical functional relationship.

Abilities and/or skills

- Communicates effectively in oral and written form
- Manages basic algebra mathematical operations.
- Uses the English language to read texts.
- Uses basic principles of chemistry and physics to solve problems.

Attitudes and/or values

- Is aware of environmental care.
- Is inclined to perform laboratory experiments.
- Values the importance of congruence.
- Acts responsibly in the construction of their academic formation.

THE GRADUATION PROFILE FOR THE BACHELOR IN INDUSTRIAL CHEMISTRY ENGINEERING

Design new sustainable chemicals and processes to meet social and market demands.

Use control and optimization tools in industrial chemical processes

Demonstrate skills in the implementation and execution of projects in the transformation industry

Plan processes based on industrial safety standards and guidelines.

Assess the feasibility of using alternative energies to promote a culture of environmental protection.

Propose viable solutions to problems in your professional field based on research tasks and projects.

CURRICULAR MAP

The program has a number of 57 courses that can be taken on a flexible curriculum in 9 school periods.

Institutional curricular line. Emphasizes student training under the UPAEP profile. It has 3 curricular lines:

- a) Humanist Formation
- b) Entrepreneurship

c) Languages

Professional basic curricular line. They are elementary courses of the curriculum project and have 4 lines:

- a) Chemistry
- b) Mathematics
- c) Physics
- d) Basic engineering

Professional curricular line. These courses are typical of the area that allows students to be disciplined. It has 6 curricular lines:

- a) Analytical Chemistry
- b) Unit operations
- c) Reactors and Control-Instrumentation
- d) Project Design
- e) Industrial Management
- f) Emerging trends in Chemical Engineering

Optional curricular line. It concentrates elective courses, depending on specialized training in some complementary area of the discipline. It consists of 4 curricular lines:

- a) Entrepreneurship
- b) Discipline area

c) Academic Systems of Social Relevance

d) General Training

The student will choose one of the existing lines by taking the courses that make up it; this equates to 24 credits.

Terminal curricular line. It consists of a line.

a) Research

The Bachelor's Program in Industrial Chemical Engineering consists of 421 credits and 57 courses; which the student will take a minimum of 2 and a maximum of 8 courses per period, covering a minimum of 16 and a maximum of 56 credits per period.

The propaedeutic courses must be taken according to the results of your placement exams in English, Physics, Math and / or Computing, depending on your chosen academic program plan

The elective courses in the terminal curricular lines must be chosen according to your professional preferences.

BACHELOR'S DEGREE IN AUTOMOTIVE DESIGN ENGINEERING

MODALITY: Grounded education

CAMPUS: PUEBLA

RVOE: 20192778

ACADEMIC PROGRAM PURPOSE

It trains Bachelors in Automotive Design Engineering with an ethical and humanistic approach, leaders in the areas of design and production of parts, mechanical, electrical, electronic components and automotive products, through the application of analysis techniques in the use of state-of-the-art technology and the use of design and manufacturing computer programs, as well as evaluation and project management procedures, physical and material testing, to diagnose, optimize, build and implement solutions to problems inherent to the field of manufacturing and automation of automotive mechanics, all with quality and respect for the environment.

ENTRY PROFILE

Knowledge

- Analyzes the notions of basic sciences, such as mathematics, physics and chemistry.
- Recognizes the fundamentals of technical drawing.
- Identifies basic computer programs.

Abilities and/or skills

- Uses observation, analysis and synthesis
- Uses creativity and inventiveness.
- Solves physical-mathematical problems.
- Master the basic English language.

Attitudes and/or values

- Appreciates the dignity of the human person.
- Respects the environment.
- Demonstrates tolerance and openness to new ideas.
- Values multidisciplinary collaborative work.
- Shows responsibility.

THE GRADUATION PROFILE FOR THE BACHELOR IN AUTOMOTIVE DESIGN ENGINEERING

Apply CATIA Software, Working Model 2D, SolidWorks, Edgecam, LabVIEW, for automotive design.

Employ automotive design methodologies for the development and innovation of automotive systems and components.

Evaluate the life cycle of all automotive components including: design, engineering, validation, manufacturing, recycling and/or disposal.

Use tools for electronic part programming and physical infrastructure laboratories for the design, analysis, integration and validation of automotive systems and components.

Make innovations in automotive systems and components based on virtual modeling, computer-aided engineering and experimental analysis.

Evaluate technical and customer requirements to take into account the product lifecycle from concept generation to disposal and recycling.

Create companies focused on service, manufacturing or technical consulting related to the automotive industry.

Design electrical, electronic and mechanical components for the automotive industry.

PROGRAM CURRICULAR LINES

The program has a number of 60 Courses that can be taken on a flexible curriculum In 9 school periods.

It consists of:

General Education (institutional curricular line) : General courses, consisting of courses of language training and humanist seal.

Propedeutic training (if you look at it) consisting of remedial courses of mathematics, physics and languages.

Theoretical training (basic professional curricular line), consisting of training courses in mathematics, physics, computation and automotive foundation.

Disciplinary training (professional curricular line and elective curricular line), consisting of courses related to the analysis of automotive designs, with manufacturing systems and evaluation of automotive projects, with specialty lines in engines, complete vehicle and entrepreneurship.

Research courses (terminal curricular line), which are not counted in the current plan.

CURRICULAR MAP

The propaedeutic courses must be taken according to the results of your placement exams in English, Physics, Math and / or Computing, depending on your chosen academic program plan

The elective courses in the terminal curricular lines must be chosen according to your professional preferences.

CURRICULAR MAP

[illegible]

BACHELOR'S DEGREE IN AEROSPACE ENGINEERING

MODALITY: Grounded education

CAMPUS: PUEBLA

RVOE: 20192916

ACADEMIC PROGRAM PURPOSE

The Bachelors in aerospace engineering, who are able to analyze, systematize and design elements in aerostructures, avionics and aeronautical simulation systems, through the application of manufacturing processes and structural modeling of mechanical components, as well as techniques that integrate electronic-computational devices of aircraft, to optimize, innovate and create technological processes of the manufacturing-electronic industry in aerospace, all this with a responsible, supportive and humanistic commitment.

ENTRY PROFILE

Knowledge

- Recognizes the basic notions of Mathematics and Physics.
- Identifies the basic elements of Computer Science
- Interprets basic English language.Abilities and/or skills
- Observes physical phenomena
- Employs analytical and synthetic reasoning
- Demonstrates creativity and imagination
- Uses oral and written communication

Attitudes and/or values

- Appreciates collaborative and multidisciplinary work
- Shows an entrepreneurial and leadership attitude
- Demonstrates discipline, order and responsibility
- Shows honesty and professional ethics

THE GRADUATION PROFILE FOR THE BACHELOR IN AEROSPACE ENGINEERING

Systematize manufacturing processes.

Use computer-aided design software.

Use programs for electronic devices.

It uses project engineering to optimize manufacturing processes.

Develop electronic circuits.

Simulates aerospace processes from mathematical modeling.

Design machinery and machine elements for aerospace systems

Build aerospace systems

Design avionics systems

Use the English language

It uses measuring elements, mechanisms and tolerance tables for the development of mechanical designs.

PROGRAM CURRICULAR LINES

The program has a number of courses that can be taken on a flexible curriculum in 9 school periods.

It consists of:

General Education (institutional curricular line): General courses, which consist of the integral training of the student and the study of foreign languages.

FHU006: Person and Truth; FHU007: Person and Freedom; FHU008: Person, Family and Society; FHU009: Person and Transcendence; FHU010: Contemporary Person and Culture; FHU011: Mexican Person and Identity.

OPI001: Language and culture optional 01; OPI002: Language and culture optional 02; OPI003: Language and culture optional 03; OPI004: Language and culture optional 04.

Propaedeutic Training (if any): courses to help the student improve their deficiencies and continue their academic curriculum.

University Mathematics Basics; Basic English, Intermediate English 1, Intermediate English 2

Theoretical Training (basic professional curricular line): courses that develop the theoretical skills of the student through a common university curricular line.

FIS021: Static; FIS023: Material Mechanics; FIS031: Material Mechanics; FIS024: Materials Science; FIS026: Electromagnetism; FIS025: Thermodynamics; FIS026: Electromagnetism; QUI020: General Chemistry; TCDD101: Programming Basics; TCD102: Data Structure; TCD202: Advanced Programming; MIN003: Mathematics I; MIN004: Mathematics II; MIN005: Mathematics III; MIN006: Mathematics IV; MIN009: Linear Algebra; MN007: Probability and Statistics. IAE100: Fundamentals of Aerospace Engineering; MEC105: Measurement

and instrumentation; MEC104: Mechanical Drawing; IDA101: Computerized Mechanical Drawing; IET101: Digital systems; IET102: Circuit analysis.

Disciplinary training (professional curricular line and elective curricular line), specialization courses that make up the common curricular line and professional curricular line.

IET102: Circuit analysis; IET201: Electronic amplifiers; IET400: Sensors and signal conditioning; IET204: Microprocessors & Microcontrollers; MEC2213: Embedded systems; MEC222: Analog Control; MEC223: Digital control; IET206: Electromagnetic Theory; IET207: Telecommunications systems; IMA219: Electromagnetic Theory; IMA219: Manufacturing Processes I; IMA220: Manufacturing Processes II; IMA216: Metrology; IMA001: Adjustments and Tolerance; IAE200: Aeronautical Wiring; IAE201: Electric routing station; IAE202: Electrical design with CAD; IAE203: Aerostructure I; IAE204: Aerostructure II; IAE205: Flight aerodynamics; IAE206: Mechanical Vibrations; MEC215: Machines and mechanisms; MEC216: Mechanical Design; MEC217: Finite element modeling and simulation; IQI005: Fluid mechanics; IND011: Financial engineering; IND012: Project management; IND013: Project engineering,

Research courses (terminal curricular line): courses with research profile and project development, which integrates a project or final work.

CURRICULAR MAP

The propaedeutic courses must be taken according to the results of your placement exams in English, Physics, Math and / or Computing, depending on your chosen academic program plan

The elective courses in the terminal curricular lines must be chosen according to your professional preferences.

BACHELOR'S DEGREE IN INDUSTRIAL ENGINEERING

MODALITY: Semi-grounded education

CAMPUS: PUEBLA

RVOE: 20192098

ACADEMIC PROGRAM PURPOSE

It trains Bachelor's degree holders with a high humanistic and ethical sense, with competencies in the design, innovation, administration of productive and service systems; and the use of technological and financial resources of the organizations, through the implementation of optimization processes between material resources and human talent, in order to favor productivity and continuous improvement of the organizations.

ENTRY PROFILE

Knowledge

- Identifies basic knowledge of mathematics, physics, chemistry and computing.
- Recognizes the use of technological tools.
- Identifies the use of ICT's.

Abilities and/or Skills

- Shows creative, abstraction, analysis and synthesis skills.
- Demonstrates effective communication.

Attitudes and/or Values

- Shows interest in industrial processes in manufacturing and service companies.
- Maintains a positive attitude to learn new knowledge and implement it in the improvement of systems.
- Shows willingness for self-learning.
- Values truth and justice.
- Shows willingness to work as part of a team.

THE GRADUATION PROFILE FOR THE BACHELOR IN INDUSTRIAL ENGINEERING

Evaluates the different current technological processes to generate a good or service with quality.

Integrates the organization's resources to increase productivity and profitability by applying managerial skills.

Develops products and transformation processes applying chemical, physical, mechanical, electrical and environmental engineering fundamentals.

Proposes solutions to problems of production systems, applying tools of qualitative and quantitative analysis to increase productivity and profitability.

Quantitative analysis tools to optimize material, human and energy resources.

Develops plans for the supply of inputs to conveniently respond to the needs of society by using

The needs of society through the use of production and inventory analysis tools.

Inventories.

Analyzes the elements involved in a project and the main aspects of the economic, political, social and environmental sector to assess its viability.

Justifies the management of financial elements for the productive operations of a project using analysis tools, with

the objective of obtaining a high return on investment.

Develops projects for continuous improvement in organizations.

Proposes alternatives that promote better working conditions for the workers of a productive system using ergonomic analysis.

CURRICULAR MAP

The propaedeutic courses must be taken according to the results of your placement exams in English, Physics, Math and / or Computing, depending on your chosen academic program plan

The elective courses in the terminal curricular lines must be chosen according to your professional preferences.

BACHELOR'S DEGREE IN INDUSTRIAL PROJECT ENGINEERING

MODALITY: Online education

CAMPUS: PUEBLA

RVOE: SEP-SES/21/114/04/1713/2017

ACADEMIC PROGRAM PURPOSE

It trains graduates in Industrial Project Engineering with a high humanistic and ethical sense, with competencies in the management of industrial projects on production and service systems, through the implementation of optimization processes of material resources and human talent, to promote productivity and continuous improvement of organizations.

ENTRY PROFILE

Knowledge

- Recognizes the use of technology tools that allow access to new ways of learning.
- Analyzes mathematical and physical principles.

Abilities and/or skills

- Shows oral and written ability to manage information.
- Uses observation and analysis skills in production and service processes.

Attitudes and/or values

- Shows disposition for self-regulated learning.
- Shows interest in problem solving and decision making.
- Values the importance of honesty in their academic and professional life.

Habits

- Reading habits.
- Study habits.

THE GRADUATION PROFILE FOR THE BACHELOR IN INDUSTRIAL PROJECT ENGINEERING

Develops products and transformation processes applying fundamentals of engineering, physics and mechanics.

Develops industrial projects, according to updated methodologies, current regulations and optimization of resources.

Proposes alternatives for the organization of work in accordance with the organizational policy and culture.

Integrates the organization's resources to increase productivity and profitability.

Implements strategies on safety and health at work, with scientific and legal criteria.

Plans the process of incorporating projects and the development of people in accordance with company policies.

Proposes manufacturing projects, for the implementation and control of technical processes for the transformation of raw materials into goods.

Develops plans for the supply of inputs to conveniently respond to the needs of the organizations where he/she works, through the use of production and inventory analysis tools.

Supports his professional action in humanistic values and social responsibility throughout life.

CURRICULAR MAP

The propaedeutic courses must be taken according to the results of your placement exams in English, Physics, Math and / or Computing, depending on your chosen academic program plan

The elective courses in the terminal curricular lines must be chosen according to your professional preferences.

MASTER'S DEGREE IN**STRATEGIC PLANNING AND TECHNOLOGY MANAGEMENT**

MODALITY: Grounded education

CAMPUS: PUEBLA

RVOE: SEP-SES/21/114/04/980/2013

ACADEMIC PROGRAM PURPOSE

It trains Masters in Strategic Planning and Technology Management with development of competencies in the areas of decision analysis methodologies, finance, planning, technology management, sustainable development and human development; capable of making diagnoses based on the problems of the public, social and private sectors; and propose actions oriented to benefit society as a whole, working as consultants, academics, public servants or entrepreneurs of for-profit or non-profit organizations; to apply strategic actions towards innovation and decision making related to the nature of organizations.

ENTRY PROFILE*Knowledge*

- Basic concepts in decision making techniques.
- Identifies Microsoft Office techniques and management.

- Recognizes spoken, written and listening English language.
- Business management.

Abilities And/Or Skills

- Teamwork and group management.
- Analytical decisions.
- Creative ability.
- Analysis, synthesis and problem solving.
- Criticism and assertiveness.

Values And/Or Attitudes

- Personal and social responsibility and honesty.
- Tolerance to others.
- Leadership and service mission.
- Willingness to work.

Habits

- Technical reading.
- Acceptance of uncertainty and change.
- Service to society.

THE GRADUATION PROFILE FOR THE MASTER IN STRATEGIC PLANNING AND TECHNOLOGY MANAGEMENT

Strategic Management: Build action plans in complex environments to define organizational strategies from planning models.

Technological innovation models: Incorporates technological innovation models aligned to the organizational strategy to increase business productivity and competitiveness in the corresponding industrial sector.

Decision Process Analysis: Identifies analysis tools through the application of quantitative models to optimize the decision-making process in organizations.

PROGRAM CURRICULAR LINES

The program has a number of 79 credits that can be taken on a flexible curriculum in 6 school periods.

The curriculum of the Master's Degree in Strategic Planning and Technology Management ensures, through the curriculum map, strategies and thematic contents- the goals and the egress profile. This curriculum covers two main areas: Strategic Planning and Technology Management, which serve as the basis for the collegiate work of the Master's Degree and the development of students' degree work.

To earn a degree, students must credit at least 79 credits (12 courses) within 24 months.

The program is within two areas of knowledge: Economic-Administrative Sciences and Engineering Sciences. The structure of the Master's curriculum in Strategic Planning and Technology Management adequately fulfills the final purpose of training (egress profile) and, being a professionalizing master's degree, students make stays in any of the productive sectors, considering the assigned line of generation and application of knowledge (LGAC). These lines are registered with the National Graduate Quality Program (PNPC) of the National Council of Science and Technology (CONACYT) and are defined as follows:

1. **Strategies:** Analysis, improvement and application of planning models for the development of strategies within the macro and micro scenarios of organizations (finance, administration, production, sales, quality, logistics, human resources, sectoral integration), aligning them with the overall strategy of the organization.
2. **Technological Innovation:** Analysis of complex problems related to the technological strategies of the different

organizational scenarios, using innovation models, which provide support in decision making to generate greater value from the perception of the consumer.

3. Decision analysis: Analysis of competitive advantage in decision-making development that influence the entry of new markets, acquisition of new technologies, market expansion, merger of companies and design of new products; using mathematical models.

CURRICULAR MAP

The propaedeutic courses must be taken according to the results of your placement exams in English, Physics, Math and / or Computing, depending on your chosen academic program plan

The elective courses in the terminal curricular lines must be chosen according to your professional preferences.

MASTER'S DEGREE IN LOGISTICS AND SUPPLY CHAIN MANAGEMENT

MODALITY: Grounded education

CAMPUS: PUEBLA

RVOE: SEP-SES/21/114/04/982/2013

ACADEMIC PROGRAM PURPOSE

It trains Masters with a service attitude who are capable of evaluating and improving the behavior of the Logistics Processes along the Supply Chain under the premises of analysis, continuous improvement and managerial vision, through the application of optimization methods and models, simulation of industrial engineering systems and economic-administrative sciences, in order to design, develop and implement projects that provide solutions to logistics problems in different productive organizations.

ENTRY PROFILE

Knowledge

- Handles technological tools for the compilation and synthesis of content.
- Has knowledge of English language at least at an intermediate level.
- Has basic knowledge in Logistics.

Skills

- Manages quantitative logistics techniques.
- Has the ability of oral and written expression.
- Manages technological tools to analyze and make decisions.

Attitudes/values

- Works as part of a team to develop more complete projects.
- Is tolerant to diversity of opinions.
- Communicates with the values of responsibility, truth and transcendence.
- Willingness to work and research.
- Generates and contributes new ideas.

Habits

- Reads scientific information.
- Works methodically.
- Habit of independent study.

THE GRADUATION PROFILE FOR THE MASTER IN LOGISTICS AND SUPPLY CHAIN MANAGEMENT

Optimizes the different types of resources that make up the Supply Chain in the Organizations

Plan and manage projects ethically within organizations.

Design distribution networks considering from the supply of the raw material, processing of the product to its distribution.

Create and provide relevant solutions that result in logistics strategies and competitive advantages.

Design and apply inventory control models in the various contexts of organizations by rating different approaches to decision-making.

Structure an overview of a traditional Supply Chain to a Sustainable Supply Chain clarifying the feasibility of its transformation.

Analyzes Mexico's competitiveness to the world, as well as the Logistics Performance Index by identifying opportunities for improvement in the country to be more competitive.

Implement strategies to improve international logistics.

Develop an electronic business plan to improve the competitiveness of an organization.

Plan, execute, and control an organization's production and operations.

PROGRAM CURRICULAR LINES

The program has a number of 33 courses that can be taken on a flexible curriculum in 6 school periods.

The student must take 12 courses with a minimum of 81 credits to accredit the curriculum of the Master's Degree in Logistics and Supply Chain Management. You will take 3 mandatories and 9 elective courses: of which minimum 2 will be of the curricular lines of Logistics Processes and Supply Chain Management, one of each, and the remaining 7 complementary optionally can be taken from the following curricular lines: Logistics Processes, Supply Chain Management, Supply, Commercial Logistics, Optimization, Methodology for Decision Making.

It consists of:

General Education (institutional curricular line). These 2 courses help us measure whether students acquire the competencies proposed by the program.

Compulsory training (common curricular line). There are 3 key courses for the student to be characterized by having taken the postgraduate degree with UPAEP. These courses belong to the curriculum line of human development where the student acquires institutional stamp training. And to the supply line where students are provided with the basic knowledge needed to perform well in graduate school.

Disciplinary training (professional curricular line and elective curricular line). The 22 courses of the professional curricular

line are divided into the following curricular lines: Logistics Processes, Supply Chain Management, Supply, Commercial Logistics, Optimization and Methodology for Decision Making. These courses provide the logistics profile and select one of the 2 Lines of Generation and Application of Knowledge Logistics Management Systems. This line of research relates to the generation and/or application of knowledge about the use of models, methods and information technology to solve problems related to supply chain management, such as supplier selection and evaluation, logistics operators, strategic sourcing, supply chain risk and Humanitarian Logistics.

Supply Chain Optimization. This line of research relates to the generation and/or application of knowledge about the use of software, models and mathematical methods to solve problems related to the optimization of resources throughout the supply chain, such as Inventory Control, plant and warehouse layout, sales territory design, distribution center location and vehicle routing.

Research courses (terminal curricular line). There are 8 courses in the terminal curricular line, 3 of these courses belong to the curriculum line of update and integration seminars, and 5 the curriculum line of research. These courses help the student to update and specialize in a specific topic and thus develop the research topic, usually students apply their knowledge in the industry or to social situations.

CURRICULAR MAP

The propaedeutic courses must be taken according to the results of your placement exams in English, Physics, Math and / or Computing, depending on your chosen academic program plan

The elective courses in the terminal curricular lines must be chosen according to your professional preferences.

MASTER'S DEGREE IN INTEGRATED MANUFACTURING SYSTEMS AND QUALITY STRATEGIES

MODALITY: Grounded education

CAMPUS: PUEBLA

RVOE: SEP-SES/21/114/04/998/2013

ACADEMIC PROGRAM PURPOSE

It trains Masters in Integrated Manufacturing Systems and Quality Strategies with a service attitude, who are capable of generating, improving and optimizing product designs, manufacturing processes and production systems, through the identification and application of statistical techniques, software systems, planning and decision making methodologies, quality standards, and integration of manufacturing systems, in order to offer products that meet the expectations of quality and customer service, and support the financial and environmental sustainability of the company.

Knowledge

- Distinguishes the basic software tools for decision making.
- Identifies basic knowledge of computer programming.
- Recognizes basic knowledge of design software.
- Identifies advanced knowledge of the English language.

ENTRY PROFILE

Skills And/Or Abilities

- Demonstrates ability to work in design teams, planning and manufacturing processes.
- Manages quantitatively manufacturing systems.
- Executes mathematical models in the solution of production problems.
- Demonstrates clarity in oral and written expression.

Values And/Or Attitudes

- Assumes a responsible disposition at work.
- Adopts an assertive attitude in dealing with the work team.
- Is inclined to develop creativity and contribute new ideas.
- Is interested in participating with openness and ability to adapt to new people, ideas and circumstances.
- Values a participative and collaborative posture.
- Appreciates adherence to the truth.
- Is inclined to work with honesty.

Habits

- Constant study and reading habits.
- Personal organization and order.

THE GRADUATION PROFILE FOR THE MASTER IN INTEGRATED MANUFACTURING SYSTEMS AND QUALITY STRATEGIES:

Employs methodological tools and control statistics, and quality improvement.

Uses computer systems for the design and analysis of manufacturing processes.

Implements projects that solve problems in the areas of: assurance and improvement of the quality, planning and improvement of production systems, design and manufacture of products.

PROGRAM CURRICULAR LINES

The program has a number of 42 courses that can be taken on a flexible curriculum in 6 school periods.

It consists of:

Human Development (institutional curricular line) : UPAEP stamp course, consisting of Leadership and Service Mission.

Quality Basics (Required): Quality Systems

Basics of Manufacture (Required), which consists of. Computer Aided Design and Manufacturing and Production Systems Analysis and Design.

Disciplinary Training (professional curricular line and elective curricular line), consisting of courses grouped according to their specialty such as: Quality, Productive Systems, Design

and Manufacturing, Manufacturing Processes, Strategy and Organization; And Update and Integration Seminars.

Research courses (terminal curricular line), consisting of Professional Stay, Professional Project, Master's Thesis I, Master's Thesis II.

CURRICULAR MAP

The propaedeutic courses must be taken according to the results of your placement exams in English, Physics, Math and / or Computing, depending on your chosen academic program plan

The elective courses in the terminal curricular lines must be chosen according to your professional preferences.

MASTER'S DEGREE IN MECHATRONICS ENGINEERING

MODALITY: Grounded education

CAMPUS: PUEBLA

RVOE: SEP-SES/21/114/04/2664/2019

ACADEMIC PROGRAM PURPOSE

It trains Masters in Mechatronics Engineering with an ethical and humanistic vision, who generate technological development in the business and industrial sector, through the design of autonomous and sustainable solutions in mechatronic systems, to innovate processes towards an industry of the future.

ENTRY PROFILE

Knowledge

- Distinguishes theories of general electronics.
- Recognizes theories of general mechanics.
- Identifies structured programming theories.

- Synthesizes basic technological problems of a practical nature.

Abilities and/or skills

- Formulates and solves mathematical models.
- Proposes solutions to electronic, mechanical and structured programming problems.
- Generates specialized knowledge and research.
- Manages the English language.
- Works in teams.

Attitudes and/or Values

- Values honesty and responsibility.
- Acts with leadership and innovative entrepreneurship.
- Is aware of the needs and sustainable developments present in the region and the country.
- Respects the dignity of people as well as their duties and rights.
- Is interested in the environment and regional, national and international culture.

THE GRADUATION PROFILE FOR THE MASTER IN MECHATRONICS ENGINEERING

Apply new technologies for the modernization of the production processes of companies and industries.

Use analysis and simulation tools for optimal development of automation solutions that operate independently and respond to the environment.

Implement mechatronic systems for the industry of the future.

Design intelligent systems for equipment interconnection in the industry.

PROGRAM CURRICULAR LINES

The program has a number of 34 courses that can be taken on a flexible curriculum in 9 school periods.

General Education (institutional curricular lines): General courses, which consist of the integral training of the student and the study of foreign languages.

Propaedeutic Training (if you contemplate it): Doesn't apply

Theoretical Training (basic professional curricular lines): courses that develop the theoretical skills of the student through a common university curricular lines.

Disciplinary training (professional curricular lines and elective curricular lines), specialization courses that make up the common curricular lines and professional curricular lines.

Research courses (terminal curricular lines), consisting of courses with research profile and project development, which integrates a project or final work.

Stay MEC613; Practical Work MEC614, Thesis I MEC615, Thesis II MEC616

CURRICULAR MAP

The propaedeutic courses must be taken according to the results of your placement exams in English, Physics, Math and / or Computing, depending on your chosen academic program plan

The elective courses in the terminal curricular lines must be chosen according to your professional preferences.

MASTER'S DEGREE IN**DATA SCIENCE AND BUSINESS INTELLIGENCE (CATALOG 017)**

MODALITY: Grounded education

CAMPUS: PUEBLA

RVOE: SEP-SES/21/114/01/1482/2016

ACADEMIC PROGRAM PURPOSE

It trains Masters in Data Science and Business Intelligence who interpret volumes of data and identify behavioral patterns, through the construction of mathematical models, data mining, expert systems and business intelligence, to make decisions that solve and prevent problems of different kinds in institutions with an ethical and humanistic approach.

ENTRY PROFILE*Knowledge*

- Recognizes the tools for data mining.
- Describes statistical and mathematical processes.
- Distinguishes information technology tools for data processing.

Skills and/or Abilities

- Applies logic in problem solving.
- Interprets readings in English at a technical level.
- Is skilled in the development of basic computer programs.
- Works in multidisciplinary teams.

Attitudes and/or values

- Shows openness to personal development.
- Is interested in transforming data into information to build knowledge.
- Acts with a vocation of service to society.
- Shows a capacity for the construction of information.

Habits

- Reading habit.
- Logical thinking.
- Search for data.

THE GRADUATION PROFILE FOR THE MASTER IN DATA SCIENCE AND BUSINESS INTELLIGENCE

Build data stores and process information to obtain meaningful data.

Incorporate quantitative methods for model generation into data science.

Generate knowledge patterns using predictive models that explain behaviors.

Apply business intelligence for decision making in strategic planning.

Use information technologies to support data science applications.

PROGRAM CURRICULAR LINES

The program has a number of 12 courses that can be taken on a flexible curriculum of 6 semesters with 79 credits. It is a Recognized Program in the National Standard of CONACYT Quality Programs for 2 years from 2020.

It consists of:

General Education (institutional curricular lines) : Leadership and mission of the HUM560 service

Theoretical Training (basic professional curricular lines), which consists of establishing the general concepts of the academic program through the mandatory courses.

Disciplinary Training (professional curricular lines and elective curricular lines), consisting of 2 general lines of knowledge: Data Science and Business Intelligence. It is mandatory to take at least one course of each of them.

Research courses (terminal curricular lines), consisting of a group of courses related to Upgrade Seminars and another to Research, where they carry out their degree project.

Practical project qualification: TEM550 Professional Stay and TEM551 Professional Project

Thesis degree: Thesis I TEM011 and Thesis II TEM

CURRICULAR MAP

The propaedeutic courses must be taken according to the results of your placement exams in English, Physics, Math and / or Computing, depending on your chosen academic program plan

The elective courses in the terminal curricular lines must be chosen according to your professional preferences.

**MASTER'S DEGREE IN DATA SCIENCE AND BUSINESS INTELLIGENCE
GROUNDED EDUCATION**

MASTER'S DEGREE IN INDUSTRIAL INNOVATION ENGINEERING

MODALITY: Grounded education

CAMPUS: PUEBLA

RVOE: 20193782

ACADEMIC PROGRAM PURPOSE

To train Masters in Industrial Innovation Engineering specialized in the design, optimization, and/or digitalization of industry, by applying systemic and innovative thinking to industrial problems, in order to promote the improvement and development of new industrial processes and products from a transformational leadership approach.

ENTRY PROFILE

Knowledge

- Identifies the basic notions of programming and algorithms.
- Explains the basic notions of descriptive statistics.

Abilities and/or skills

- Employs a programming language in basic processes.
- Manages spreadsheets, presentations, internet.
- Demonstrates an intermediate level in reading and analyzing English language texts.
- Clearly expresses him/herself orally and in writing.

Attitudes and/or values

- Is interested in disseminating the research conducted in various forums or media.
- Works in teams to develop more complete projects.
- Is tolerant of diversity of opinions.
- Is responsible and ethical.

Assesses needs in the industrial environment.

THE GRADUATION PROFILE FOR THE MASTER IN INDUSTRIAL INNOVATION ENGINEERING

Applies systemic and innovative thinking to identified industrial needs.

Generates a solution of social relevance that meets the industrial needs identified in an optimal and innovative way.

PROGRAM CURRICULAR LINES

The program has a number of 30 courses that can be taken on a flexible curriculum in 6 school periods.

It consists of:

Human Development (institutional curricular lines): UPAEP seal courses, consisting of: Human Integration or Transformative Leadership.

Basic Professional (Logical and Systemic Thinking): Mathematical Analysis, Design and Management of Innovation and Development of Innovative Thinking.

Basics of Manufacture (Required), which consists of. Computer Aided Design and Manufacturing and Production Systems Analysis and Design.

Disciplinary training (professional curricular lines and elective curricular lines), consisting of courses grouped according to

their specialty such as: Digital Industry; Industrial Design; and "Optimization of Logistics Systems.

Research courses (terminal curricular lines), consisting of Professional Stay, Professional Project, Master's Thesis I, Master's Thesis II.

CURRICULAR MAP

The propaedeutic courses must be taken according to the results of your placement exams in English, Physics, Math and / or Computing, depending on your chosen academic program plan

The elective courses in the terminal curricular lines must be chosen according to your professional preferences.

MASTER'S DEGREE IN LOGISTICS AND SUPPLY CHAIN MANAGEMENT

MODALITY: Online education

CAMPUS: PUEBLA

RVOE: SEP-SES/21/114/01/1014/2013

ACADEMIC PROGRAM PURPOSE

It trains Masters with a service attitude who are capable of evaluating and improving the behavior of the Logistics Processes along the Supply Chain under the premises of analysis, continuous improvement and managerial vision, through the application of optimization methods and models, simulation of industrial engineering systems and economic-administrative sciences, in order to design, develop and implement projects that provide solutions to logistics problems in different productive organizations.

- Has basic knowledge in Logistics.

Skills

- Manages quantitative logistics techniques.
- Has the ability of oral and written expression.
- Manages technological tools to analyze and make decisions.

Attitudes/values

- Works as part of a team to develop more complete projects.
- Is tolerant to diversity of opinions.
- Communicates with the values of responsibility, truth and transcendence.
- Willingness to work and research.
- Generates and contributes new ideas.

Habits

- Reads scientific information.
- Works methodically.
- Habit of independent study.

ENTRY PROFILE

Knowledge

- Handles technological tools for the compilation and synthesis of content.
- Has knowledge of English language at least at an intermediate level.

THE GRADUATION PROFILE FOR THE MASTER IN LOGISTICS AND SUPPLY CHAIN MANAGEMENT

1. Optimizes the different types of resources that make up the Supply Chain in the Organizations
2. Plan and manage projects ethically within organizations.
3. Design distribution networks considering from the supply of the raw material, processing of the product to its distribution.
4. Create and provide relevant solutions that result in logistics strategies and competitive advantages.
5. Design and apply inventory control models in the various contexts of organizations by rating different approaches to decision-making.
6. Structure an overview of a traditional Supply Chain to a Sustainable Supply Chain clarifying the feasibility of its transformation.
7. Analyzes Mexico's competitiveness to the world, as well as the Logistics Performance Index by identifying opportunities for improvement in the country to be more competitive.
8. Implement strategies to improve international logistics.
9. Develop an electronic business plan to improve the competitiveness of an organization.
10. Plan, execute, and control an organization's production and operations.

PROGRAM CURRICULAR LINES

The program has a number of 33 courses that can be taken on a flexible curriculum in 6 school periods.

The student must take 12 courses with a minimum of 81 credits to accredit the curriculum of the Master's Degree in Logistics and Supply Chain Management. You will take 3 mandatories and 9 elective courses: of which minimum 2 will be of the curricular lines of Logistics Processes and Supply Chain Management, one of each, and the remaining 7 complementary optionally can be taken from the following curricular lines: Logistics Processes, Supply Chain Management, Supply, Commercial Logistics, Optimization, Methodology for Decision Making.

It consists of:

General Education (institutional curricular line). These 2 courses help us measure whether students acquire the competencies proposed by the program.

Compulsory training (common curricular line). There are 3 key courses for the student to be characterized by having taken the postgraduate degree with UPAEP. These courses belong to the curriculum line of human development where the student acquires institutional stamp training. And to the supply line where students are provided with the basic knowledge needed to perform well in graduate school.

Disciplinary training (professional curricular line and elective

curricular line). The 22 courses of the professional curricular line are divided into the following curricular lines: Logistics Processes, Supply Chain Management, Supply, Commercial Logistics, Optimization and Methodology for Decision Making. These courses provide the logistics profile and select one of the 2 Lines of Generation and Application of Knowledge Logistics Management Systems. This line of research relates to the generation and/or application of knowledge about the use of models, methods and information technology to solve problems related to supply chain management, such as supplier selection and evaluation, logistics operators, strategic sourcing, supply chain risk and Humanitarian Logistics.

Supply Chain Optimization. This line of research relates to the generation and/or application of knowledge about the use of software, models and mathematical methods to solve problems related to the optimization of resources throughout the supply chain, such as Inventory Control, plant and warehouse layout, sales territory design, distribution center location and vehicle routing.

Research courses (terminal curricular line). There are 8 courses in the terminal curricular line, 3 of these courses belong to the curriculum line of update and integration seminars, and 5 the curriculum line of research. These courses help the student to update and specialize in a specific topic and thus develop the research topic, usually students apply their knowledge in the industry or to social situations.

CURRICULAR MAP

The propaedeutic courses must be taken according to the results of your placement exams in English, Physics, Math and / or Computing, depending on your chosen academic program plan

The elective courses in the terminal curricular lines must be chosen according to your professional preferences.

DOCTORATE DEGREE IN STRATEGIC PLANNING AND TECHNOLOGY MANAGEMENT

MODALITY: Grounded education

CAMPUS: PUEBLA

RVOE: SEP-SES/21/114/04/981/2013

ACADEMIC PROGRAM PURPOSE

It trains Doctors in Strategic Planning and Technology Management with competencies in business areas with the support in technology management, with business bases and with the use of decision analysis methodologies, with technological tools for design, analysis, evaluation and selection of strategies, through the evaluation, design and improvement of business systems, industrial and service systems from the point of view of their vision and mission, in addition to the development of technological innovations, to carry out applied research, from the strategic analysis of the most critical problems and opportunities of society, supported by strategic decision making aimed at benefiting the different social areas; working as consultants, academics, public officials and entrepreneurs.

ENTRY PROFILE

Knowledge

- Basic concepts in decision making tools.
- English language proficiency.
- Fundamentals in business management.

Abilities And/Or Skills

- Research oriented skills.
- Ability to work in teams and manage groups.
- Ability to handle computational information.
- Ability to make analytical decisions.
- Creative ability.
- Analysis, synthesis and problem solving.

Values And/Or Attitudes

- Responsibility and honesty.
- Tolerance to others.
- Ethics and social responsibility.
- Leadership and service mission.

Habits

- Technical reading.
- Acceptance of challenges and risks.
- Service to society.

THE GRADUATION PROFILE FOR THE DOCTOR IN STRATEGIC PLANNING AND TECHNOLOGY MANAGEMENT

1. Generate models to design action plans in complex environments to define organizational strategies based on international quality theoretical benchmarks.
2. Design technology innovation models aligned to the organizational strategy to increase business productivity and competitiveness in the relevant industrial sector.
3. Evaluate relevant information in scenarios com matched to the problem of decision-making in the organization

PROGRAM CURRICULAR LINES

The program has a number of 101 credits that can be taken on a flexible curriculum in 12 school periods.

The program is within two areas of knowledge: Economic-Administrative Sciences and Engineering Sciences; and has three

lines of research and application of knowledge (LGAC) which are reflected in the following descriptions:

Strategies: is a line of research approved by CONACYT where the student identifies, designs,

develops and applies methodological, economic, business strategies, among others, for business

growth and development, aligning the different strategies established with the overall strategy

of the company, to achieve greater competitive advantage through the application of a single and

differentiated action.

Technological Innovation: the purpose of this line also approved by CONACYT is for the student to build and new ways to produce, develop, market, process, manage a renewed or improved product or service useful to the consumer; through the management of technological development activities.

Decision Analysis: in this line of research the student establishes the strategic advantage through assessing the quality of decisions for the effectiveness of change in organizations, using techniques in decision analysis in Product Introduction, Company Restructuring, Business Mergers, Exploration, Investments in Technology, Acquisition of Durable Goods, New Markets, Introduction of Software, Introduction or Selection of New Technologies, among others.

CURRICULAR MAP

The propaedeutic courses must be taken according to the results of your placement exams in English, Physics, Math and / or Computing, depending on your chosen academic program plan

The elective courses in the terminal curricular lines must be chosen according to your professional preferences.

DOCTORATE DEGREE IN LOGISTICS AND SUPPLY CHAIN MANAGEMENT

MODALITY: Grounded education

CAMPUS: PUEBLA

RVOE: SEP-SES/21/114/04/988/2013

ACADEMIC PROGRAM PURPOSE

It trains Doctors with an attitude of service to society who are capable of carrying out projects that evaluate and improve the behavior of the Logistics Processes along the Supply Chain, through the application of optimization methods and models, simulation of systems in the areas of industrial engineering and economic-administrative sciences, in order to generate, contribute and apply new knowledge to the cultural heritage through scientific articles that contain proposals for solutions to highly complex logistics problems.

ENTRY PROFILE

Knowledge

- Has knowledge of English language at least at an intermediate level.

- Relates fundamental knowledge in Logistics and Supply Chain Management.

- Interprets quantitative and qualitative data.

Abilities And/Or Skills

- Possesses the ability of oral and written expression.
- Manages technological tools for the compilation and synthesis of contents as well as analysis and decision making.

Attitudes And/Or Values

- Works in teams to develop multidisciplinary research projects.
- Is tolerant to the diversity of opinions.
- Communicates with the values of responsibility, truth and transcendence.
- Willingness to work and research.
- Proposes creative ideas.

Habits

- Reads and interprets scientific information

THE GRADUATION PROFILE FOR THE DOCTOR IN LOGISTICS AND SUPPLY CHAIN MANAGEMENT

Optimize the different types of resources that make up the Supply Chain in Organizations.

Plan and direct innovative and ethical research projects contemplating the planning, design, operation and evaluation of the Supply Chain.

Design distribution networks considering from the supply of the raw material, processing of the product to its distribution.

Create and provide relevant solutions that result in logistics strategies and competitive advantages in complex environments.

Apply inventory control models in the various contexts of organizations by rating different approaches to decision-making.

Structure an overview of a traditional Supply Chain to a Sustainable Supply Chain clarifying the feasibility of its transformation.

Investigate Mexico's competitiveness of the world, as well as the Logistics Performance Index by examining opportunities for the country's improvement to be more competitive.

Plan, execute, and control production and operations within an organization.

Evaluate the different processes of key activities within the Supply Chain.

Collaborates intentionally and objectively within a multidisciplinary team.

PROGRAM CURRICULAR LINES

The program has a number of 33 courses that can be taken on a flexible curriculum in 12 school periods.

The student must take 14 courses with a minimum of 102 credits to accredit the Doctoral curriculum in Logistics and Supply Chain Management. He will take 9 compulsory courses, of which 1 of them will be of the Human Development line; and 5 optional: of which, minimum 1 will be from the curricular supply line and the remaining 4, called complementary electives can be taken from the following curricular lines: Supply, Logistics Processes, Commercial Logistics, Optimization, Supply Chain Management and Research Seminars.

It consists of:

General Education (institutional curricular lines). These 2 courses help us measure whether students acquire the competencies proposed by the program.

Compulsory training (common curricular lines). There are 3 key courses for the student to be characterized by having taken the postgraduate degree with UPAEP. These courses belong to the curriculum line of human development where the student acquires institutional stamp training. And to the supply line where students are provided with the basic knowledge needed to perform well in graduate school.

Disciplinary training (professional curricular lines and elective curricular lines). The 20 courses of the professional curricular lines are divided into the following curricular lines: Logistics Processes, Supply Chain Management, Supply, Commercial Logistics, Optimization and Methodology for Decision Making. These courses provide the logistics profile and select one of the 2 Lines of Generation and Application of Knowledge Logistics Management Systems. This line of research relates to the generation and/or application of knowledge about the use of models, methods and information technology to solve problems related to supply chain management, such as supplier selection and evaluation, logistics operators, strategic sourcing, supply chain risk and Humanitarian Logistics.

Supply Chain Optimization. This line of research relates to the generation and/or application of knowledge about the use of software, models and mathematical methods to solve problems related to the optimization of resources throughout the supply

chain, such as Inventory Control, plant and warehouse layout, sales territory design, distribution center location and vehicle routing.

Research courses (terminal curricular lines). There are 10 courses in the terminal curricular lines, 3 of these courses belong to the curriculum line of update and integration seminars, and 5 the curriculum line of research. These courses help the student to update and specialize in a specific topic and thus develop the research topic, usually students apply their knowledge in the industry or to social situations.

CURRICULAR MAP

DOCTORATE DEGREE IN MECHATRONICS ENGINEERING

MODALITY: Grounded education

CAMPUS: PUEBLA

RVOE: SEP-SES/21/114/04/995/2013

ACADEMIC PROGRAM PURPOSE

It trains integral Doctors in Mechatronics Engineering, capable of developing, analyzing, designing and improving materials, parts and automation systems of application in all fields, through the scientific application of current and novel processes and theories of macromechatronic, micromechatronic and nanomechatronic systems that go beyond the conventional to the point of moving in the area of technological innovation, to solve problems in the fundamental, academic and industrial levels, conceived under the vision of improving productivity, competitiveness and sustainability of organizations.

ENTRY PROFILE

Knowledge

- Recognizes advanced theories in electronics, mechanics, computing and materials.
- Distinguishes state-of-the-art technological elements for performing automated production tasks.

- Defines applied research theories.
- Knows mathematical modeling techniques for control and automation processes.

Skills and/or abilities

- Critically handles theoretical and technical information from specialized sources in automation sciences.
- Participates in multidisciplinary works of applied research.
- Acquires new knowledge with ease and express their ideas with clarity.
- Applies his technological knowledge and methodologies in an original and innovative way.

Values and/or attitudes

- Is concerned with prioritizing their applied development projects in accordance with the needs of society.
- Works harmoniously in multi- and trans-disciplinary teams.
- Proactively assumes long work sessions.
- Maintains constancy and tenacity in the activities undertaken.
- Adopts autonomy in the pursuit of constant updating.

Habits

- Habit of service.
- Seeks to be continuously informed of the advances in his profession.
- Plans as an indispensable element prior to execution.
- Works in a responsible and considered manner.
- Proactive reaction to new situations.

THE GRADUATION PROFILE FOR THE DOCTOR IN MECHATRONICS ENGINEERING

Apply fundamental methods, techniques and laws of science, identifying relevant aspects and characteristics of an automated phenomenon or process, for the formulation of innovative models.

Design innovative practices of new technologies for the modernization of the productive processes of organizations.

Demonstrate the veracity of evidence, based on the scientific, technological and technical developments of Mechatronics, to confirm the validity of mechatronic designs.

Propose technological designs relevant to the current context, interpreting and applying new knowledge, to offer solutions that take into account environmental, cultural and social effects.

Carry out continuous technological surveillance, methodically

analyzing the state of the art in the most recognized articles and patents in the field of mechatronics, to devise scientifically valid and commercially relevant developments.

Generate business initiatives based on market knowledge, technology and sustainability to boost competitiveness through the application of mechatronic systems.

Lead multidisciplinary working groups, through

PROGRAM CURRICULAR LINES

The program has a number of 100 credits that can be taken on a flexible curriculum in 12 school periods.

It consists of:

General Education (institutional curricular lines): General courses, which consist of the integral training of the student and the study of foreign languages.

Propaedeutic Training (if you contemplate it): Doesn't apply

Theoretical Training (basic professional curricular lines): courses that develop the theoretical skills of the student through a common university curricular lines.

Optional Human Development:

Hum560 Leadership and Service Mission, Hum542 Human Integration

Disciplinary training (professional curricular lines and elective

curricular lines), specialization courses that make up the common curricular lines and professional curricular lines.

Fundamentals of Robotics MEC555, Industrial Robotics MEC556, Select Robotics Topics MEC557, Projection of Microelectromechanical Systems MEC558, Manufacture of Microelectromechanical Systems MEC559, Encapsulation and Testing of Microelectromechanical Systems MEC560, MeC561 State-of-the-art sensors and actuators, MeC562 Nanostructured Material Basics, MEC563 Nanostructured Material Synthesis, MEC564 Nanostructured Material Simulation, MEC565 Nanostructured Material Characterization, MEC565 Signals and Vehicular Energy , MEC567 Automotive Peripheral Control Units, Combustion Engine Control MEC568, Electric Vehicles and Hybrids MEC569. Fundamentals of Mechatronic Systems MEC550, Industrial Power Electronics MEC552, Design and Analysis of Mechanisms MEC553, MAN571 Computer Aided Design and Manufacturing, MAN580 Integrated Manufacturing Systems, MAN581 Material Engineering, MAN584 Manufacturing Systems Simulation, MAN585 Industrial Automation and Control Systems, ITI560 Programming, ITI562 Databases, BIO552 Mathematical Model Basics, BIO553 Advanced Mathematical Models, Renewable Energy AMB516 , Energy Efficiency AMB517, Energy Sustainability Projects AMB518, ADM550 Strategic Prospecting and Innovation Workshop, Productivity and International Competitiveness ADM552, Sustainable Business Directorate ADM553, ADM554 Sustainable Business Workshop, Innovation and Disruptive Creativity DCI523, Log555 Electronic Business Logistics, MER554

Commercial Communication, Small, Medium and Family Business Management, Management and Leadership in ORG550 Organizations, Entrepreneurial Development and New Companies

Research courses (terminal curricular lines): courses with research profile and project development, which integrates a project or final work.

INV630 Update Seminar, INV631 Innovation Seminar 48, INV632 Integration Seminar

CURRICULAR MAP

The propaedeutic courses must be taken according to the results of your placement exams in English, Physics, Math and / or Computing, depending on your chosen academic program plan

The elective courses in the terminal curricular lines must be chosen according to your professional preferences.

DOCTORATE DEGREE IN INFORMATION TECHNOLOGIES AND ELECTRONIC BUSINESS

MODALITY: Grounded education

CAMPUS: PUEBLA

RVOE: SEP-SES/21/114/04/994/2013

ACADEMIC PROGRAM PURPOSE

It trains leading Doctors in innovation of relevant scientific models in information technologies and e-business, through the creation of new technological strategies that support the implementation of quality technological processes in the generation and effective management of information, in order to support decision making and increase the effectiveness of organizations, in favor of a better quality of life of society.

ENTRY PROFILE

Knowledge

- Master's degree issued by an accredited academic institution.
- Ability to generate technological solutions within the business.

- Analyzes with systemic approach the development opportunities in the labor market.

Skills and/or Abilities

- Ability to manage new information technologies.
- Ability to manage work teams in technological projects.
- Ability to perform productive work.

Values and/or Attitudes

- Commitment to provide solutions and generate new business opportunities.
- Provides solutions for society.
- Service attitude.
- Commitment to the development of SMEs and the innovation of business processes of organizations.

Habits

- Has the habit of scientific argumentation
- Has the habit of reading

THE GRADUATION PROFILE FOR THE DOCTOR IN INFORMATION TECHNOLOGIES AND ELECTRONIC BUSINESS

Generate marketing strategies by implementing electronic business web solutions within regulatory frameworks that support strategy decision-making.

Generates scientific solutions in electronic businesses according to the regulatory framework of e-commerce and mobile technology.

Build models of validation of scientific input and assurance of the quality of processes in electronic businesses.

Develop electronic businesses considering the needs of the customer and their business model.

PROGRAM CURRICULAR LINES

The doctoral program has a number of 14 courses that can be taken on a flexible curriculum of 9 to 15 school periods, this academic program has 3 blocks, the first consists of 9 compulsory courses, where 6 of them concern the follow-up of doctoral work. The second block consists of 5 elective courses, of which 2 will be from the curricular lines of Human Development and Information Technologies, and finally the remaining 3 courses called complementary electives can be taken from the following curricular lines: Information Technologies, Electronic Commerce, Electronic Business, Software Engineering, Strategic Planning, Organization Management, Marketing and Research Seminars.

CURRICULAR MAP

The propaedeutic courses must be taken according to the results of your placement exams in English, Physics, Math and / or Computing, depending on your chosen academic program plan

DOCTORATE DEGREE IN STRATEGIC PLANNING AND TECHNOLOGY MANAGEMENT

MODALITY: Online education

CAMPUS: PUEBLA

RVOE: SEP-SES/21/114/01/1018/2013

ACADEMIC PROGRAM PURPOSE

It trains Doctors in Strategic Planning and Technology Management with competencies in business areas with the support in technology management, with business bases and with the use of decision analysis methodologies, with technological tools for design, analysis, evaluation and selection of strategies, through the evaluation, design and improvement of business systems, industrial and service systems from the point of view of their vision and mission, in addition to the development of technological innovations, to carry out applied research, from the strategic analysis of the most critical problems and opportunities of society, supported by strategic decision making aimed at benefiting the different social areas; working as consultants, academics, public officials and entrepreneurs.

ENTRY PROFILE

Knowledge

- Basic concepts in decision making tools.
- English language proficiency.
- Fundamentals in business management.

Abilities And/Or Skills

- Research oriented skills.
- Ability to work in teams and manage groups.
- Ability to handle computational information.
- Ability to make analytical decisions.
- Creative ability.
- Analysis, synthesis and problem solving.

Values And/Or Attitudes

- Responsibility and honesty.
- Tolerance to others.
- Ethics and social responsibility.
- Leadership and service mission.

Habits

- Technical reading.
- Acceptance of challenges and risks.
- Service to society.

THE GRADUATION PROFILE FOR THE DOCTOR IN STRATEGIC PLANNING AND TECHNOLOGY MANAGEMENT

Generate models to design action plans in complex environments to define organizational strategies based on international quality theoretical benchmarks.

Design technology innovation models aligned to the organizational strategy to increase business productivity and competitiveness in the relevant industrial sector.

Evaluate relevant information in scenarios com matched to the problem of decision-making in the organization

PROGRAM CURRICULAR LINES

The program has a number of 101 credits that can be taken on a flexible curriculum in 12 school periods.

The program is within two areas of knowledge: Economic-Administrative Sciences and Engineering Sciences; and has three lines of research and application of knowledge (LGAC) which are reflected in the following descriptions:

Strategies: is a line of research approved by CONACYT where the student identifies, designs, develops and applies methodological, economic, business strategies, among others, for business growth and development, aligning the different strategies established with the overall strategy of the company, to achieve greater competitive advantage through the application of a single and differentiated action.

Technological Innovation: the purpose of this line also approved by CONACYT is for the student to build and new ways to produce, develop, market, process, manage a renewed or improved product or service useful to the consumer; through the management of technological development activities.

Decision Analysis: in this line of research the student establishes the strategic advantage through assessing the quality of decisions for the effectiveness of change in organizations, using techniques in decision analysis in Product Introduction, Company Restructuring, Business Mergers, Exploration, Investments in Technology, Acquisition of Durable Goods, New Markets, Introduction of Software, Introduction or Selection of New Technologies, among others.

CURRICULAR MAP

The propaedeutic courses must be taken according to the results of your placement exams in English, Physics, Math and / or Computing, depending on your chosen academic program plan

The elective courses in the terminal curricular lines must be chosen according to your professional preferences.

DOCTORATE DEGREE IN LOGISTICS AND SUPPLY CHAIN MANAGEMENT

MODALITY: Online education

CAMPUS: PUEBLA

RVOE: SEP-SES/21/114/01/1020/2013

ACADEMIC PROGRAM PURPOSE

It trains Doctors with an attitude of service to society who are capable of carrying out projects that evaluate and improve the behavior of the Logistics Processes along the Supply Chain, through the application of optimization methods and models, simulation of systems in the areas of industrial engineering and economic-administrative sciences, in order to generate, contribute and apply new knowledge to the cultural heritage through scientific articles that contain proposals for solutions to highly complex logistics problems.

Knowledge

- Has knowledge of English language at least at an intermediate level.
- Relates fundamental knowledge in Logistics and Supply Chain Management.

ENTRY PROFILE

- Interprets quantitative and qualitative data.

Abilities And/Or Skills

- Possesses the ability of oral and written expression.
- Manages technological tools for the compilation and synthesis of contents as well as analysis and decision making.

Attitudes And/Or Values

- Works in teams to develop multidisciplinary research projects.
- Is tolerant to the diversity of opinions.
- Communicates with the values of responsibility, truth and transcendence.
- Willingness to work and research.
- Proposes creative ideas.

Habits

- Reads and interprets scientific information

THE GRADUATION PROFILE FOR THE DOCTOR IN LOGISTICS AND SUPPLY CHAIN MANAGEMENT

Optimize the different types of resources that make up the Supply Chain in Organizations.

Plan and direct innovative and ethical research projects contemplating the planning, design, operation and evaluation of the Supply Chain.

Design distribution networks considering from the supply of the raw material, processing of the product to its distribution.

Create and provide relevant solutions that result in logistics strategies and competitive advantages in complex environments.

Apply inventory control models in the various contexts of organizations by rating different approaches to decision-making.

Structure an overview of a traditional Supply Chain to a Sustainable Supply Chain clarifying the feasibility of its transformation.

Investigate Mexico's competitiveness of the world, as well as the Logistics Performance Index by examining opportunities for the country's improvement to be more competitive.

Plan, execute, and control production and operations within an organization.

Evaluate the different processes of key activities within the Supply Chain.

Collaborates intentionally and objectively within a multidisciplinary team.

PROGRAM CURRICULAR LINES

The program has a number of 33 courses that can be taken on a flexible curriculum in 12 school periods.

The student must take 14 courses with a minimum of 102 credits to accredit the Doctoral curriculum in Logistics and Supply Chain Management. He will take 9 compulsory courses, of which 1 of them will be of the Human Development line; and 5 optional: of which, minimum 1 will be from the curricular supply line and the remaining 4, called complementary electives can be taken from the following curricular lines: Supply, Logistics Processes, Commercial Logistics, Optimization, Supply Chain Management and Research Seminars.

It consists of:

General Education (institutional curricular lines). These 2 courses help us measure whether students acquire the competencies proposed by the program.

Compulsory training (common curricular lines). There are 3 key courses for the student to be characterized by having taken the postgraduate degree with UPAEP. These courses belong to the curriculum line of human development where the student acquires institutional stamp training. And to the supply line where students are provided with the basic knowledge needed to perform well in graduate school.

Disciplinary training (professional curricular lines and elective

curricular lines). The 20 courses of the professional curricular lines are divided into the following curricular lines: Logistics Processes, Supply Chain Management, Supply, Commercial Logistics, Optimization and Methodology for Decision Making. These courses provide the logistics profile and select one of the 2 Lines of Generation and Application of Knowledge Logistics Management Systems. This line of research relates to the generation and/or application of knowledge about the use of models, methods and information technology to solve problems related to supply chain management, such as supplier selection and evaluation, logistics operators, strategic sourcing, supply chain risk and Humanitarian Logistics.

Supply Chain Optimization. This line of research relates to the generation and/or application of knowledge about the use of software, models and mathematical methods to solve problems related to the optimization of resources throughout the supply chain, such as Inventory Control, plant and warehouse layout, sales territory design, distribution center location and vehicle routing.

Research courses (terminal curricular lines). There are 10 courses in the terminal curricular lines, 3 of these courses belong to the curriculum line of update and integration seminars, and 5 the curriculum line of research. These courses help the student to update and specialize in a specific topic and thus develop the research topic, usually students apply their knowledge in the industry or to social situations.

CURRICULAR MAP

The propaedeutic courses must be taken according to the results of your placement exams in English, Physics, Math and / or Computing, depending on your chosen academic program plan

The elective courses in the terminal curricular lines must be chosen according to your professional preferences.

DOCTORATE DEGREE IN MECHATRONICS ENGINEERING

MODALITY: Online education

CAMPUS: PUEBLA

RVOE: SEP-SES/21/114/01/1030/2013

ACADEMIC PROGRAM PURPOSE

It trains integral Doctors in Mechatronics Engineering, capable of developing, analyzing, designing and improving materials, parts and automation systems of application in all fields, through the scientific application of current and novel processes and theories of macromechatronic, micromechatronic and nanomechatronic systems that go beyond the conventional to the point of moving in the area of technological innovation, to solve problems in the fundamental, academic and industrial levels, conceived under the vision of improving productivity, competitiveness and sustainability of organizations.

ENTRY PROFILE

Knowledge

- Recognizes advanced theories in electronics, mechanics, computing and materials.
- Distinguishes state-of-the-art technological elements for performing automated production tasks.

- Defines applied research theories.
- Knows mathematical modeling techniques for control and automation processes.

Skills and/or abilities

- Critically handles theoretical and technical information from specialized sources in automation sciences.
- Participates in multidisciplinary works of applied research.
- Acquires new knowledge with ease and express their ideas with clarity.
- Applies his technological knowledge and methodologies in an original and innovative way.

Values and/or attitudes

- Is concerned with prioritizing their applied development projects in accordance with the needs of society.
- Works harmoniously in multi- and trans-disciplinary teams.
- Proactively assumes long work sessions.
- Maintains constancy and tenacity in the activities undertaken.
- Adopts autonomy in the pursuit of constant updating.

Habits

- Habit of service.
- Seeks to be continuously informed of the advances in his profession.
- Plans as an indispensable element prior to execution.
- Works in a responsible and considered manner.
- Proactive reaction to new situations.

THE GRADUATION PROFILE FOR THE DOCTOR IN MECHATRONICS ENGINEERING

Apply fundamental methods, techniques and laws of science, identifying relevant aspects and characteristics of an automated phenomenon or process, for the formulation of innovative models.

Design innovative practices of new technologies for the modernization of the productive processes of organizations.

Demonstrate the veracity of evidence, based on the scientific, technological and technical developments of Mechatronics, to confirm the validity of mechatronic designs.

Propose technological designs relevant to the current context, interpreting and applying new knowledge, to offer solutions that take into account environmental, cultural and social effects.

Carry out continuous technological surveillance, methodically analyzing the state of the art in the most recognized articles and patents in the field of mechatronics, to devise scientifically valid

and commercially relevant developments.

Generate business initiatives based on market knowledge, technology and sustainability to boost competitiveness through the application of mechatronic systems.

Lead multidisciplinary working groups, through.

PROGRAM CURRICULAR LINES

The program has a number of 100 credits that can be taken on a flexible curriculum in 12 school periods.

It consists of:

General Education (institutional curricular lines): General courses, which consist of the integral training of the student and the study of foreign languages.

Propaedeutic Training (if you contemplate it): Doesn't apply

Theoretical Training (basic professional curricular lines): courses that develop the theoretical skills of the student through a common university curricular lines.

Optional Human Development:

Hum560 Leadership and Service Mission, Hum542 Human Integration

Disciplinary training (professional curricular lines and elective curricular lines), specialization courses that make up the common curricular lines and professional curricular lines.

Fundamentals of Robotics MEC555, Industrial Robotics

MEC556, Select Robotics Topics MEC557, Projection of Microelectromechanical Systems MEC558, Manufacture of Microelectromechanical Systems MEC559, Encapsulation and Testing of Microelectromechanical Systems MEC560, MeC561 State-of-the-art sensors and actuators, MeC562 Nanostructured Material Basics, MEC563 Nanostructured Material Synthesis, MEC564 Nanostructured Material Simulation, MEC565 Nanostructured Material Characterization, MEC565 Signals and Vehicular Energy , MEC567 Automotive Peripheral Control Units, Combustion Engine Control MEC568, Electric Vehicles and Hybrids MEC569. SCHOOL OF LANGUAGES & CULTURE STUDIES

BACHELOR'S DEGREE IN LANGUAGES, TEACHING AND CULTURAL DIVERSITY

MODALITY: Grounded education

CAMPUS: PUEBLA

RVOE: 20192093

ACADEMIC PROGRAM PURPOSE

It trains Bachelors in Languages, Teaching and Cultural Diversity with a humanistic, critical and ethical sense, who apply methodologies in language teaching, incorporating linguistic and sociocultural knowledge and skills, to innovate in language learning with a multicultural approach.

ENTRY PROFILE

Knowledge

- Recognizes the basic rules of Spanish writing.
- Distinguishes basic office and web 2.0 tools.

Abilities and/or skills

- Communicates ideas and thoughts in an inclusive way, being interested in diverse points of view.
- Collaborates and works as part of a team

Attitudes and/or values

- Values the acquisition and use of language.
- Is interested in foreign languages and different cultures.
- Respects diversity

THE GRADUATION PROFILE FOR THE BACHELOR IN LANGUAGES, TEACHING AND CULTURAL DIVERSITY

To master multiple languages to communicate fluently and effectively in various contexts.

To apply teaching methodologies and linguistic aspects of languages when teaching them.

To design study plans for language learning based on the needs and context of the students.

To promote multicultural development and training in formal and informal educational settings.

To incorporate linguistic aspects to educational methodologies for teaching Spanish as a second language.

To use research techniques to teach foreign languages.

To use global competencies effectively in various contexts.

PROGRAM CURRICULAR LINES

The academic program has a total of 61 subjects that can be studied in a flexible curriculum in 8 school periods. The subjects are classified in five different lines: Teaching, Languages, Linguistics, Spanish, and Multiculturalism. The line of Teaching provides the student with the necessary skills to be a language teacher.

The line of Languages allows the graduates to master up to three languages with a high level of proficiency thanks to the number of hours of exposure to English and the language they choose as a second language (French or German). The Linguistics line seeks to strengthen the metalanguage and grammar knowledge required to be able to teach a language. The Spanish for Foreigners line seeks to take advantage of the field of teaching Spanish as a second language both in Mexico (in indigenous communities) and abroad. The Multicultural line gives undergraduate students a multicultural approach, aims to sensitize them to intercultural communication, and its management within the educational field.

The Degree in Languages, Teaching and Cultural Diversity follows curricular lines focused on the development of the necessary competencies to work as a language teacher in Mexico, and also in international institutions.

Its components are:

General Education (Institutional Core): consists of a series of interdisciplinary courses related to the values, mission and learning outcomes of UPAEP.

Propaedeutic Courses consist of 4 introductory English courses and 1 of Math Reasoning course.

Theoretical Training (Basic Professional Core) consists of 17 courses that provide students with the basis of the five curricular lines.

Disciplinary Training (Professional and Elective Core) consists of 19 professional courses and 10 elective courses divided into five curricular lines.

Research Seminars (Terminal Core) consist of 2 courses that provide students with the competencies to carry out language teaching research projects.

CURRICULAR MAP

The propaedeutic courses must be taken according to the results of your placement exams in English, Physics, Math and / or Computing, depending on your chosen academic program plan

The elective courses in the terminal curricular lines must be chosen according to your professional preferences.

BACHELOR'S DEGREE IN VETERINARY MEDICINE AND ZOOTECHNICS

MODALITY: Grounded education

CAMPUS: PUEBLA

RVOE: SEP-SES/21/114/04/2672/2019

ACADEMIC PROGRAM PURPOSE

It trains Bachelors in Veterinary Medicine and Animal Husbandry, with ethical and humanistic sense, who are responsible for health care, production and animal welfare, applying medical, scientific and technological principles, in order to contribute to the health of human beings and the environment.

ENTRY PROFILE

Knowledge

- Recognizes basic concepts in biology, chemistry and mathematics.
- Distinguishes basic concepts in information handling, analysis, and synthesis.

- Identifies the basic structures of the English language.
- Recognizes the basic principles of written language.

Skills

- Uses Microsoft Office package, internet navigation.
- Applies the scientific method, analysis and processing of information for problem solving and prevention.
- Collaborative teamwork in a collaborative manner.
- Applies basic knowledge of the English language.

Attitudes and/or values

- Appreciates dealing with people, adapting to different environments and social situations.
- Is interested in outdoor activities as well as working with animals.
- Is inclined towards activities related to the animal health and production sector.
- Is tolerant of stressful situations.
- Respects his/her fellow humans and animals.

THE GRADUATION PROFILE FOR THE BACHELOR IN VETERINARY MEDICINE AND ZOOTECHNICS

To promote the animal welfare, carrying out its professional activities ethically and within the current legal framework.

To implement preventive medicine to maintain the productive and functional efficiency of the animals.

To apply veterinary public health programs to safeguard human health.

To develop the productivity of animals, ensuring the safety of products of animal origin.

To design, develop and evaluate research projects related to medicine, animal production and welfare.

To apply the scientific method, the analysis and processing of information for the resolution and prevention of problems.

PROGRAM CURRICULAR LINES

The program has a number of 69 courses that can be studied in a flexible curriculum in 9 school periods.

It is made up of:

General Education (institutional curricular line): courses that provide comprehensive training through the study of foreign languages, entrepreneurship and humanistic training.

Theoretical Training (basic professional curricular line): Courses that provide the theoretical bases of the program, knowing the

structure, function of the animal body, behavior and the principles of animal welfare.

Disciplinary Training (professional core and elective core): These are courses that develop medical-surgical skills, medical diagnosis and treatment, and animal production.

Research courses (terminal curricular line): They provide the tools to do research by thesis.

CURRICULAR MAP

The propaedeutic courses must be taken according to the results of your placement exams in English, Physics, Math and / or Computing, depending on your chosen academic program plan

The elective courses in the terminal curricular lines must be chosen according to your professional preferences.

BACHELOR'S DEGREE IN ENVIRONMENTAL ENGINEERING AND SUSTAINABLE DEVELOPMENT

MODALITY: Grounded education

CAMPUS: PUEBLA

RVOE: 20192741

ACADEMIC PROGRAM PURPOSE

It trains Bachelors in Environmental Engineering, with an ethical and humanistic vision and a deep understanding of basic sciences, engineering and environmental technology, which propose a rational use of resources, through the design and promotion of clean technologies from a perspective of sustainable development and compliance with environmental legislation, in order to ensure the welfare of human beings in the community.

ENTRY PROFILE

Knowledge

Describes the elements of the different disciplinary areas of human knowledge, especially basic sciences (mathematics, chemistry, physics, biology) and technology in the solution of different problems.

Skills and/or abilities

- Questions directly and indirectly observable changes that occur in environmental relationships and the incidence of human activities on these changes.
- Proposes solutions to problems related to basic sciences.
- Manages a basic level in oral and written expression in the English language.

Attitudes and/or values

- Is concerned about preventing and providing solutions to problems of environmental degradation, as well as the rational use of natural resources aimed at their conservation, restoration and sustainable use.
- Is proactive in undertaking projects.
- Gives responsible opinions.
- Presents disposition for teamwork.
- Is interested in undertaking environmental management projects.

THE GRADUATION PROFILE FOR THE BACHELOR IN ENVIRONMENTAL ENGINEERING AND SUSTAINABLE DEVELOPMENT

Applies the principles of environmental engineering and basic sciences identifying the main areas of environmental improvement to correct and prevent environmental problems with an attitude of service and initiative.

Manages environmental management applying the corresponding legislation and administrative processes before private companies, public institutions and civil society organizations, within a framework of confidentiality and professional ethics.

Promotes the change of energy sustainability by integrating the use of renewable energies with low carbon emissions and atmospheric pollution, which respond to development plans and local, national and international commitments.

Applies design processes in areas of environmental engineering proposing the rational use of natural resources aimed at their conservation, restoration and sustainable use working in interdisciplinary teams, seeking the common good.

Develops previous experimentation analyzing and interpreting data to establish solutions and promote innovative environmental proposals.

Acts with ethical and professional responsibility in situations relevant to environmental engineering and makes informed judgments considering the impact of engineering solutions in the global and sustainable contexts.

Designs environmental engineering projects with social relevance that reflect their entrepreneurial vocation, their transforming attitude and their life plan, through diagnosis, planning, problem evaluation and effective communication with a technical language.

CURRICULAR MAP

The propaedeutic courses must be taken according to the results of your placement exams in English, Physics, Math and / or Computing, depending on your chosen academic program plan

The elective courses in the terminal curricular lines must be chosen according to your professional preferences.

BACHELOR'S DEGREE IN BIOTECHNOLOGY ENGINEERING

MODALITY: Grounded education

CAMPUS: PUEBLA

RVOE: 20200018

ACADEMIC PROGRAM PURPOSE

The Bachelor's Degree in Biotechnology Engineering trains graduates in the areas of production, research and development of biotechnological products in industries related to Biotechnology, acquiring skills in the management, development and implementation of technologies of biological systems, living organisms and their derivatives based on basic sciences and engineering, with ethical and social commitment, to create, improve or modify products and processes with biotechnological methods that solve problems of daily life in a sustainable manner.

ENTRY PROFILE

Knowledge

- Recognizes the basic notions of biological sciences, chemical sciences, mathematics, health sciences and/or technology.
- Identifies main ideas in a text

Abilities and/or skills

- Manages information and communication technologies
- Shows creativity
- Discriminates between different sources of information
- Communicates at a basic level of English
- Performs proactively

Attitudes and/or values

- Values the dignity of the human person
- Enjoys working with living organisms
- Demonstrates tolerance and openness to new ideas
- Is aware of his/her impact on the environment
- Willingness to work in a laboratory and in the field
- Values multidisciplinary collaborative work

THE GRADUATION PROFILE FOR THE BACHELOR IN BIOTECHNOLOGY ENGINEERING

The competencies acquired in the Bachelor's Degree in Biotechnology Engineering are:

Applies the current regulations for the handling of living organisms and derivatives for quality control, safety and biosafety.

Designs biotechnological products taking into account the fundamental variables that govern the processes.

Uses information from recent specialized sources appropriate to his project.

Applies the scientific method in the development of biotechnological products and processes.

Solves problems using a multidisciplinary approach in the different areas of biotechnology.

Solves problems in a sustainable way.

Uses living organisms or their parts for the development of products and the improvement of processes of industrial, social, environmental or clinical interest.

PROGRAM CURRICULAR LINES

The program has a number of 57 courses that can be studied in a flexible curriculum in 9 academic periods.

It is composed of:

General Education (institutional curricular line): General Courses,

which consist of courses of humanistic studies, critical thinking, bioethics, languages and culture, and digital tools.

Propaedeutic Training, which consists of 2 courses that allow the student to have the appropriate basic level in physics and mathematics.

Theoretical Training (basic professional curricular line), which consists of basic science and engineering courses related to mathematics, physics, chemistry, biochemistry and physiology.

Disciplinary Training (professional curricular line and elective curricular line), which consists of courses related to biology, bioprocesses and bio-businesses culminating in a terminal line (Agroindustrial, Environmental, Medical, Entrepreneurship).

Research courses (terminal curricular line), which consists of courses that provide tools in statistics, experimental design and research methodology.

CURRICULAR MAP

The propaedeutic courses must be taken according to the results of your placement exams in English, Physics, Math and / or Computing, depending on your chosen academic program plan

The elective courses in the terminal curricular lines must be chosen according to your professional preferences.

BACHELOR'S DEGREE IN AGRONOMY ENGINEERING

MODALITY: Grounded education

CAMPUS: PUEBLA

RVOE: 20200017

ACADEMIC PROGRAM PURPOSE

To train Bachelors of Engineering in Agronomy, with an ethical and humanistic sense, who contribute in an active, profitable and sustainable way in agri-food production, through the application of cutting-edge technological strategies with social responsibility and commitment to the environment, to propose solutions to economic, social and environmental problems.

ENTRY PROFILE

Knowledge

- Identifies basic knowledge of biological sciences and exact sciences.
- Distinguishes the characteristics of the rural environment as a center of agrifood production.
- Recognizes the productive and economic potential of agricultural activities.

Abilities and/or skills

- Uses information and communication technologies.
- Communicates effectively through verbal and written language.
- Manages the basic level of a second language.
- Works in a collaborative and interdisciplinary manner.

Attitudes and/or values

- Demonstrates ease in dealing with people in different environments.
- Adapts to different educational spaces (laboratories, classrooms, agri-food production units, congresses).
- Respects nature, appreciating outdoor work.
- Is interested in the environment of the rural and agri-food sector.

THE GRADUATION PROFILE FOR THE BACHELOR IN AGRONOMY ENGINEERING

Produce food of vegetable and animal origin, with added value, in a profitable and sustainable way, in intensive, extensive and organic systems, using technologies for the primary activity and agro-industrial.

Direct agri-food companies in a competitive way, with a focus on administration, finance, marketing and Christian humanism, in the national and export markets.

Generate information for decision-making in the different areas that make up agricultural organizations.

Apply the design of experiments for innovation, for problem solving and to improve agricultural activity in general.

Promote rural development, through the implementation of strategies, actions and technology transfer that lead to economic and personal growth.

Apply current regulations to effectively carry out primary production, industrialization and marketing of agri-food products.

Investigate markets, design marketing strategies, promotion and sale of products and services related to the agri-food sector.

PROGRAM CURRICULAR LINES

The program has a number of 65 courses that can be studied in a flexible curriculum in 9 school periods.

It is made up of:

General Education (institutional curricular line): 10 general courses, consisting of humanistic training, entrepreneurship, languages and a global perspective.

Propedeutic training (if you contemplate it) that consists of a remedial course in basic mathematics and remedial courses in English.

Theoretical Training (basic professional curricular line), which consists of the areas of Mathematics, Chemistry, Biology, Soils, Ecology and Agricultural Systems.

Disciplinary Training (professional curricular line and elective curricular line), which consists of Water, Plant and Animal Health, Plant Science, Animal Science, Agribusiness, Innovation and Technological Development.

Research courses (terminal curricular line), which consists of courses such as Research Methodology and integration of knowledge and skills.

CURRICULAR MAP

The propaedeutic courses must be taken according to the results of your placement exams in English, Physics, Math and / or Computing, depending on your chosen academic program plan

The elective courses in the terminal curricular lines must be chosen according to your professional preferences.

Government	Percentage
Current government	75%
Previous government	25%

Students must choose two elective lines from the four existing lines and study four courses, two for each selected line.

SPECIALITY IN

MEDICINE AND SURGERY OF THE DOG AND CAT

MODALITY: Grounded education

CAMPUS: PUEBLA

RVOE: SEP-SES/21/114/01/1360/2015

ACADEMIC PROGRAM PURPOSE

It trains specialists in medicine and surgery of dogs and cats to recognize, diagnose and treat the diseases that affect these species, through the application of techniques and procedures focused on the prevention and recovery of small species, to ethically advise the best care of these animals and safeguard their health.

ENTRY PROFILE

Knowledge

- Distinguishes undergraduate level medical surgical fundamentals.
- Identifies basic medical and diagnostic equipment.
- Analyzes medical literature for medical practice.

Abilities and/or Skills

- Manages surgical and diagnostic processes during medical consultation.
- Communicates with ease of speech for direct dealings with patient owners.
- Uses information technology for the benefit of his/her patients.

Values and/or Attitudes

- Is interested in medical research
- Values teamwork
- Cares about the well-being of the patient and owner.

Habits

- Attachment to reading analysis
- Habit of service
- Habit of independent study and autonomous work.

THE GRADUATION PROFILE FOR THE SPECIALIST IN MEDICINE AND SURGERY OF THE DOG AND CAT

To be able to make diagnoses that lead you to define the treatment.

To propose a treatment for the disease detected in dogs and cats.

To handle the techniques for the performance of the main laboratory tests.

To use both drugs and technology that is necessary in the performance of analgesia and anesthesia in veterinary medicine.

Diagnostic methods used for fractures in orthopedics

To be able to manage surgical techniques in a preventive or curative way.

To recommend treatment to control the disease detected in the patient.

To fill clinical records of patients, based on a physical examination.

To promote animal health applying ethics and the humanistic sense

To do research related to surgical practices.

PROGRAM CURRICULAR LINES

The program has a number of 32 courses that can be studied in a flexible curriculum in 6 school periods.

It is made up of:

General Education (institutional): Courses that provide training on bioethics

Core Theoretical Training (basic professional core): Courses that provide the theoretical bases of the program, knowing the behavior and principles of animal welfare.

Disciplinary Training (professional core and elective core): These are courses that develop medical-surgical skills, diagnosis and treatment by anatomical systems.

Research courses (terminal curricular line): They provide the tools to do research by thesis.

CURRICULAR MAP

The propaedeutic courses must be taken according to the results of your placement exams in English, Physics, Math and / or Computing, depending on your chosen academic program plan

The elective courses in the terminal curricular lines must be chosen according to your professional preferences.

MODALITY: Grounded education

CAMPUS: PUEBLA

RVOE: SEP-SES/21/114/04/2069/2017

ACADEMIC PROGRAM PURPOSE

To train Masters in Environmental Engineering and Sustainable Development competent in managing the use of natural resources, reducing the negative impact of human activities and influencing the development planning of productivity goals in companies, government agencies and non-governmental organizations, through ethical, humanistic and socially responsible participation, humanistic and socially responsible participation in the formulation of diagnoses, applied research, design and execution of projects, continuous evaluation and innovation in the areas of energy, water and soil, atmosphere and natural resources, to contribute to the prevention, mitigation and resolution of local environmental problems, and the protection and conservation of natural capital that contribute to sustainable development.

ENTRY PROFILE

Knowledge

- Presents logical-mathematical reasoning.
- Identifies areas of environmental improvement.

- Analyzes technical texts related to the discipline in a second language.

Skills and/or abilities

- Handles reliable sources to conduct research, develop projects, and take action to correct and prevent problems by identifying the root cause.
- Applies a language of engineering or related disciplines in his/her professional performance.
- Works in multidisciplinary teams to achieve work goals.
- Compares and interprets results obtained from analysis.

Attitudes and/or values

- Is interested in the rational use of natural resources aimed at their conservation, restoration and sustainable use.
- Gives responsible opinions.
- Presents disposition for teamwork.

Habits

- Habits of systematic and effective study, participation in academic and professionally directed events.
- Habits of good hygiene and proactive positive attitude towards life.

THE GRADUATION PROFILE FOR THE MASTER IN ENVIRONMENTAL ENGINEERING AND SUSTAINABLE DEVELOPMENT

Carries out sustainable projects in the areas of environment and energy that mitigate, compensate and identify innovative business opportunities in the public and private sectors.

Provides environmental consulting in the use of clean and saving technologies to private companies, public institutions and civil society organizations.

Designs strategies for sustainability in the use of natural resources that recognize their strategic value and efficient use in the administration of natural capital.

Proposes sustainable projects that provide solutions to climate change and, in general, to the negative impacts generated by human beings based on environmental legislation, industrial safety and hygiene, and business planning.

Develops energy sustainability projects that promote the use of renewable energies with low carbon emissions and atmospheric pollution that respond to development plans and local, national and international commitments to compensate for the negative impacts of environmental liabilities.

Promotes the efficient use of energy, renewable energies with low carbon emissions and atmospheric pollution.

Adapts the use of clean and decontaminating technologies that mitigate environmental pollution in ecosystems.

Works in inter, trans and multidisciplinary teams managing with social responsibility and solidarity the resources, goods and services in their charge.

CURRICULAR MAP

The propaedeutic courses must be taken according to the results of your placement exams in English, Physics, Math and / or Computing, depending on your chosen academic program plan

The elective courses in the terminal curricular lines must be chosen according to your professional preferences.

MASTER'S DEGREE IN BIOTECHNOLOGY

MODALITY: Grounded education

CAMPUS: PUEBLA

RVOE: SEP-SES/21/114/04/2122/2018

ENTRY PROFILE

Knowledge

- Recognizes the logical-mathematical reasoning as a basis for obtaining experimental conclusions.
- Interprets basic concepts and techniques in biology, chemistry, biochemistry and microbiology.
- Explain the scientific method as a methodology for research.
- Analyzes scientific and/or popularization texts.

Skills

- Manages the English language with an intermediate level (400 points).
- Applies research techniques.
- Uses laboratory material and reagents in a responsible way.
- Works collaboratively.
- Applies critical, reflective and creative thinking.
- Makes decisions, evaluating the conditions and situations presented.

ACADEMIC PROGRAM PURPOSE

To train Masters in Biotechnology, with ethical and humanistic sense that apply, develop and manage biotechnological processes in the environmental, agri-food, medical and pharmaceutical areas; through innovation, entrepreneurship, development, application and scaling of bioprocesses of industrial interest, as well as the mastery of analytical techniques in the control, evaluation and monitoring of processes, in order to generate a positive impact in the areas of environment, health, pharmaceutical and agri-food in the region and in the country, within a framework of respect for the environment.

Values and attitudes

- Acts positively in collaborative and individual work.
- Assumes responsibilities with himself, with others and with the environment with an ethical and humane approach.
- Values the care of the environment.
- Is interested in solving problems in a multidisciplinary team.

Habits

- Reading habits.
- Habit of scientific consultation.
- Habit of organization.
- Habit of planning.

THE GRADUATION PROFILE FOR THE MASTER IN BIOTECHNOLOGY

Has basic knowledge in biology, chemistry, biochemistry and microbiology.

Uses the scientific method as a research methodology.

Handles the writing of scientific and technical texts for the development of popularization and/or scientific articles.

Master laboratory techniques in microbiology, physiology, molecular biology, and genetics.

Participate in problem solving in a multidisciplinary team in areas of the biotechnology, pharmaceutical, cosmetic, fermentation, food, chemical process industries, especially in biomaterials and recycling, agrochemicals, fertilizers and green chemistry processes.

PROGRAM CURRICULAR LINES

The program has a number of 12 courses that can be studied in a flexible curriculum in 6 academic periods.

It is made up of:

General Education (institutional curricular line): which consists of the Bioethics course that allows students to value the person, the environment and the common good.

Theoretical Training (basic professional curricular line): which consists of compulsory courses in the areas of Biochemistry, microbiology, molecular biology and new businesses.

Disciplinary Training (professional curricular line and elective curricular line): consisting of 3 elective lines of biotechnology: Agri-food, environmental and medical-pharmaceutical.

Research courses (terminal curricular line): which consists of courses for the accompaniment of the student in the development of their research projects.

CURRICULAR MAP

The propaedeutic courses must be taken according to the results of your placement exams in English, Physics, Math and / or Computing, depending on your chosen academic program plan

The elective courses in the terminal curricular lines must be chosen according to your professional preferences.

MASTER'S DEGREE IN ENERGY MANAGEMENT

MODALITY: Grounded education

CAMPUS: PUEBLA

RVOE: SEP-SES/21/114/01/2058/2017

ACADEMIC PROGRAM PURPOSE

It trains Masters in Energy Management who develop a culture of continuous improvement of energy performance derived from the energy contained in natural processes, through the application of planning strategies and comprehensive evaluation of energy sustainability projects, in order to promote the implementation of cost and energy saving practices in facilities, processes, equipment and operations, within the daily practice of organizations in an ethical and humanistic way.

ENTRY PROFILE

Knowledge

Presents logical-mathematical reasoning.

Analyzes technical texts related to the discipline in a second language.

Skills and/or abilities

-Uses word processors and spreadsheets, as well as information and communication technologies in the search for reliable sources to carry out a research or project.

-Applies a language of engineering or related disciplines in his/her professional performance.

-Works in multidisciplinary teams to achieve the goals of the work.

-Compares and interprets results obtained from analysis.

-Is capable of observing phenomena occurring around him/her and proposes ideas or technological solutions.

-Applies the fundamentals of basic sciences in technology and the solution of different problems.

Attitudes and/or values

-Issues responsible opinions.

-Presents disposition for teamwork.

-Is interested in areas of energy generation aimed at climate change mitigation.

Habits

-Habits of reading and systematic and effective study, participation in academic and professionally directed events.

-Habits of good hygiene and proactive positive attitude towards life.

THE GRADUATION PROFILE FOR THE MASTER IN ENERGY MANAGEMENT

Provides advice on energy management in the transportation, distribution, commercialization and final use of energy to private companies, public institutions and civil society organizations.

Performs comprehensive planning of energy projects integrating economic, regulatory and financial information analysis required in the technical and economic management of the different business areas in the energy sector companies.

Designs energy sustainability strategies incorporating technological innovations, creative deregulation options and competitive advantages of conventional and renewable sources.

Proposes energy management projects to establish short,

medium and long term objectives aimed at achieving optimization in the use of energy resources and their techniques, providing solutions to climate change and in general to the negative impacts generated by human beings.

It carries out energy sustainability projects that integrate the use of renewable energies with low carbon emissions and atmospheric pollution, that respond to development plans and local, national and international commitments to compensate for the negative impacts of environmental liabilities.

Promotes the efficient use of energy and renewable energies with low carbon emissions and atmospheric pollution.

Measures and monitors energy use to identify areas for improvement, reduce energy consumption and payments as well as carbon emissions that meet government reduction targets and increase bidding opportunities.

Works in inter, trans and multidisciplinary teams managing resources, goods and services with social responsibility and solidarity.

CURRICULAR MAP

DOCTORATE DEGREE IN BIOTECHNOLOGY

MODALITY: Grounded education

CAMPUS: PUEBLA

RVOE: SEP-SES/21/114/04/2666/2019

ACADEMIC PROGRAM PURPOSE

It trains Doctors in Biotechnology, with an ethical and humanistic approach, who integrate scientific and technological knowledge in the areas of environmental biotechnology, medical and pharmaceutical, agri-food, through the generation of basic and applied science processes, to generate productive projects in areas of consulting, entrepreneurship and research.

Knowledge

- Integrates research projects with fundamentals in chemistry, biochemistry, molecular biology and microbiology.
- Interprets the scientific method process for the development of research projects.
- Analyzes the environment for the proposal of research projects that generate viable solutions.

ENTRY PROFILE

Skills

- Implements microbiology, genetics and biochemistry laboratory techniques for the development of research projects.
- Manages a technical-scientific writing style based on internationally accepted guidelines.
- Performs research projects in the different disciplines of biotechnology, implementing the scientific method.
- Works autonomously and collaboratively.
- Present their ideas in a clear and efficient manner.

Values and attitudes

- Respects the dignity of living beings within a Bioethics framework.
- Respects the work of others.
- Continually updates himself/herself.
- Is committed to completing assigned projects.

Habits

- Systematic and effective study habits for the development of research projects.
- Habits of good laboratory practices.
- Systematic data recording and reporting habits.

THE GRADUATION PROFILE FOR THE DOCTOR IN BIOTECHNOLOGY

Master the process of the scientific method for the development of research projects.

Implements laboratory techniques of microbiology, genetics and biochemistry for the development of research projects.

Manages a technical-scientific writing style based on internationally accepted guidelines.

Analyzes its surroundings for the proposal of research projects that generate viable solutions.

Respects the dignity of living beings in a bioethical framework.

PROGRAM CURRICULAR LINES

The program has a number of 18 courses that can be studied in a flexible curriculum in 12 academic periods.

It is made up of:

General Education (institutional curricular line): General Courses, which consist of 2 optional courses that allow students to value the person, the environment and the common good.

Theoretical Training (basic professional curricular line): which consists of compulsory courses in the areas of Biochemistry, microbiology, molecular biology and experimental design.

Disciplinary Training (professional curricular line and elective curricular line), which consists of 3 elective lines of biotechnology: Agri-food, environmental and medical-pharmaceutical.

Research courses (terminal curricular line): consisting of 12 courses for the development of the student's research project (one course per period).

CURRICULAR MAP

The propaedeutic courses must be taken according to the results of your placement exams in English, Physics, Math and / or Computing, depending on your chosen academic program plan

The elective courses in the terminal curricular lines must be chosen according to your professional preferences.

BACHELOR'S DEGREE IN MEDICINE

MODALITY: Grounded education

CAMPUS: PUEBLA

RVOE: SEP-SES/21/114/04/1645/2016

ACADEMIC PROGRAM PURPOSE

To train medical Bachelors who provide medical care with a spirit of service and community integration, who manage both public and private resources in response to the changing situation of the health system, the needs and expectations of society, through the analysis of the epidemiological context as well as their social commitment, basing their decisions on the available evidence, in order to identify, evaluate and apply timely therapeutic options to preserve health, limit the damage, avoid complications in the health and quality of life of the patient, in a humanistic ethical framework.

ENTRY PROFILE

Knowledge

- Recognizes basic mathematical concepts, including algebra and statistics.
- Distinguishes the basics of physics, chemistry and biology.

- Recognizes the grammatical, orthographic and syntactic rules of the Spanish language.
- Defines the sociological and anthropological bases of medical problems.

Abilities and/or skills

- Applies self-directed learning strategies.
- Express him/herself fluently in oral and written form.
- Works collaboratively in diverse teams.
- Applies critical thinking
- Expresses him/herself in his/her native language: Spanish, with the minimum indispensable semantic property.
- Reads articles in English showing reading comprehension.
- Applies basic computer skills such as: Office, Microsoft Word, Microsoft Excel and Microsoft Power Point.

Attitudes and/or values

- Is convinced in the choice of the career.
- Acts with ethical and moral sense.
- Shows a vocation for service

- Is in good physical and mental health.
- Shows respect for his peers.
- Proactive attitude is observed.
- Exercises ethical principles such as: autonomy, beneficence, non-maleficence and justice.)
- Demonstrates an assertive and empathetic attitude.

Habits

- Is disciplined.
- Acts with responsibility.
- Is perseverant.
- Demonstrates study habits.
- Sets priorities.

THE GRADUATION PROFILE FOR THE BACHELOR IN MEDICINE

To accomplish a comprehensive clinical management that allows preserving or restoring the patient's health considering the biological, psychological and social aspects.

To apply and evaluate preventive and health promotion actions that allow controlling individual and collective health risks.

To promote community participation and the effective use of available resources for self-care in health.

To use theoretical, scientific, epidemiological and clinical knowledge in order to make medical decisions.

To develop models that allow education for health, reduce risks, limit damage and propose viable approaches to health problems.

To act in accordance with the values that identify the medical profession, showing its commitment to patients, their families, and the community in general, in order to respond to health needs.

To respond satisfactorily to the health needs, real and felt, of individuals, families and communities in a timely, effective, accessible and reliable manner.

To know how to use and generate scientific evidence for the construction of new knowledge in health.

To develop teamwork through shared leadership, continuous development of the capacities of its members, monitoring and supporting members who need it.

PROGRAM CURRICULAR LINES

The program has 83 courses integrated into a flexible curriculum in 10 academic periods.

It is composed of:

General Education (institutional includes general courses, integrated into 3 curricular axes: Humanist Training, Digital Tools and English Language

Theoretical Training (professional basic curricular line), It includes courses integrated into 3 curricular axes: morphological training, biochemistry and functional.

Disciplinary Training (professional), courses of curricular axes of Medical Humanities, Propaedeutic Clinic, Diagnosis and Therapeutics, Clinical Area, Surgical Area, Surgical Medical Nosology, Medical Partner and Entrepreneurship.

Terminal Training (terminal curricular line) Integrated by courses for the Integration of knowledge and skills and for Research.

CURRICULAR MAP

The propaedeutic courses must be taken according to the results of your placement exams in English, Physics, Math and / or Computing, depending on your chosen academic program plan

The elective courses in the terminal curricular lines must be chosen according to your professional preferences.

BACHELOR'S DEGREE IN NURSING

MODALITY: Grounded education

CAMPUS: PUEBLA

RVOE: SEP-SES/21/114/04/2130/2018

ACADEMIC PROGRAM PURPOSE

It trains Bachelors in Nursing with scientific knowledge, assistance and human sense, based on values and ethical principles, through holistic care, focused on the individual, family and community, with the purpose of preserving and maintaining health in optimal conditions.

ENTRY PROFILE

Knowledge

- Basic knowledge on the use of technologies.
- Basic knowledge of the English language.
- Ability to understand and analyze theoretical processes.

Skills and/or abilities

- Communicates efficiently in oral and written form.

- Works collaboratively.
- Shows organization in personal and school activities.
- Solves problems or situations.
- Shows ability to socialize.
- Uses critical thinking in daily life.

Attitudes and/or values

- Values the importance of leadership.
- Acts with tolerance to stress.
- Respect for the life cycle.
- Social responsibility.
- Attitude of service.
- Assumes a constant desire for self-improvement.
- Solidarity.
- Adopts an attitude of empathy with colleagues.
- Is honest.
- Shows respect for human dignity.
- Shows an optimistic attitude.

Habits

- Self-confident.
- Studious.
- Competitive.
- Emotionally stable.
- Collaborative.
- Disciplined.
- Responsible.
- With good hygienic habits.
- Active.

**THE GRADUATION PROFILE FOR THE BACHELOR
IN NURSING**

To recognize the importance of technology and informatics in nursing and health research.

To analyze the different functions, responsibilities and roles that the nursing professional must perform.

To evaluate the instruments inherent to human care procedures.

To argue the nursing interventions based on the identified nursing diagnoses.

To Interpret the signs and symptoms present in the patient to develop individualized care plans.

To Develop knowledge in the holistic care of the person, family and community considering the various phases of the life cycle in the health-disease processes.

To plan, organize, execute and evaluate activities for the promotion, prevention and recovery of the disease, with quality criteria.

To plan, organize, execute and evaluate activities for the promotion, prevention and recovery of the disease, with quality criteria.

PROGRAM CURRICULAR LINES

The program has a number of 60 courses that can be studied in a flexible curriculum in 8 academic periods.

The Nursing Degree is made up of:

General Education (institutional curricular line): General Courses, which consist of the completion of five curricular lines such as: Bioethics, Computing Skills, Humanist Training, Entrepreneurship and Languages

Theoretical Training (basic professional curricular line), which consists of fulfilling courses corresponding to: Psychology, Biology, Basic Assistance and preventive care.

Disciplinary Training (professional curricular line and elective curricular line), which consists of Courses that correspond to the area of Disciplinary Medicine, Teaching, Ethics in Nursing, Care, Administration, Nursing Clinics and Nursing Research

Disciplinary Training (elective curricular line) consists of courses from the following Entrepreneurship, Disciplinary Area, Academic systems of Social relevance and General Education.

Research courses (terminal curricular line), consists in courses intended to apply investigative methodology courses to the nursing science

CURRICULAR MAP

The propaedeutic courses must be taken according to the results of your placement exams in English, Physics, Math and / or Computing, depending on your chosen academic program plan

The elective courses in the terminal curricular lines must be chosen according to your professional preferences.

BACHELOR'S DEGREE IN NURSING

MODALITY: Semi-grounded education

CAMPUS: PUEBLA

RVOE: SEP-SES/21/114/04/1912/2017

ACADEMIC PROGRAM PURPOSE

It trains Bachelors in Nursing with ethical and humanistic sense, who intervene in the health care of healthy and sick people in their different stages of life, applying technological tools in general and specific practices of health care, supported by care management, teaching and research, to generate an essence of protection, promotion and optimization of health to ensure the quality of life of people and achieve their integration into the family and social context.

ENTRY PROFILE

Knowledge

- Differentiates the basic stages of the nursing research process.
- Identifies the organization and functioning of the nursing service.
- Classifies the bases of learning development with a community approach.

- Analyzes the basic principles of nursing.
- Defines the anatomy and physiology of the human body.

Skills

- Employs observation and analysis.
- Executes nursing activities.
- Uses safety actions of the nursing service.
- Applies self-care criteria
- Manages information related to the patient's health status.
- Executes basic computer technological tools.
- Quick decision making

Attitudes

- Acts with vocation of service and humanism.
- Cares for the physical and moral integrity of the patient.
- Respects the patient's individuality.

Values

- Habit of observation and reflection.
- Habit of study.
- Works in a methodical and hierarchical way.
- Habit of effective communication.

THE GRADUATION PROFILE FOR THE BACHELOR IN NURSING

Applies first level of care programs to promote and prevent individual and community health.

Performs basic actions in a second and third level of care.

Uses in an interdisciplinary way the actions of diagnosis, treatment and rehabilitation of physical, mental and social health.

Uses the educational process in formal, informal and non-formal education from the health area.

Intervenes in the direction and management of human resources training in nursing.

Develops administrative instruments for a better organization of nursing services.

Develops research methodology in clinical, educational and community settings.

CURRICULAR MAP

The propaedeutic courses must be taken according to the results of your placement exams in English, Physics, Math and / or Computing, depending on your chosen academic program plan

The elective courses in the terminal curricular lines must be chosen according to your professional preferences.

SPECIALTY IN MATERNAL AND PERINATAL HEALTH NURSING

MODALITY: Grounded education

CAMPUS: PUEBLA

RVOE: SEP-SES/21/114/01/1288/2015

ACADEMIC PROGRAM PURPOSE

It trains specialists with a humanistic sense and quality service in the care of women of reproductive age, childbirth, puerperium and newborns, through the design of comprehensive models of specialized care in perinatal health, to prevent irreversible damage, establish immediate diagnoses based on the human response and make decisions with a sense of responsibility.

ENTRY PROFILE

Knowledge

- Distinguishes the organization and functioning of a nursing service.
- Differentiates the basic stages of the nursing research process.
- Describes the anatomy and physiology of the human body.
- Recognizes the lines of communication and authority.
- Identifies the roles and responsibilities of the nursing professional.
- Explains the basic principles of nursing interventions.
- Identifies reproductive health problems.
- Describes the importance of the mother-child binomial.
- Explains the basic concepts of Pharmacology.

Abilities and/or skills

- Manages basic computer packages Word, Exel and Power Point.
- Demonstrates ability to make quick decisions.
- Applies the principles of patient safety.

- Uses basic tools to apply humane care procedures.
- Utilizes safety actions in the nursing service.
- Applies the criteria of self-care and healthy lifestyles in relation to their environment.
- Elaborates diagnoses in the nursing service.
- Plans practical guides in the nursing service.

Attitudes and Values

- Shows interest to work in a team.
- Shows attitude and vocation of service.
- Respects the physical integrity of the patient.
- Is concerned about attending to the physiological functions of the patient.

Habits

- Reading and consultation.
- Study habits.
- Habit of observation and reflection
- Habit of service to the patient
- Work in a methodical and hierarchical way.
- Efficiency and effectiveness at work.
- Habit of effective communication.

THE GRADUATION PROFILE FOR THE NURSE SPECIALIST IN MATERNAL AND PERINATAL HEALTH

To incorporate the codes of ethics and legal norms, in favor of physical and mental integrity

To incorporate the codes of ethics and legal norms, in favor of physical, mental and social integrity during the care provided in the different stages of pregnancy, childbirth, puerperium, as well as the newborn.

To apply management and health promotion processes based on decision-making, to prevent risk factors in maternal and perinatal health and integrate into the family nucleus.

To develop nursing interventions, applying clinical processes and highly specialized equipment, useful in the care of maternal and perinatal health, for its development within family and society.

To design research projects in Nursing to generate knowledge that promote maternal and perinatal health.

PROGRAM CURRICULAR LINES

The academic program is made up of 16 courses that can be studied in a flexible curriculum in 4 academic periods.

It is made up of:

General Education (institutional curricular line): General Courses, which consist of the completion of five curricular lines such as: Bioethics, Computing Skills, Humanist Training, Entrepreneurship and Languages.

Theoretical Training (basic professional curricular line), which consists of fulfilling courses corresponding to: Psychology, Biology, Basic Assistance, Preventive.

Disciplinary Training (professional curricular line and elective curricular line), which consists of Courses that correspond to the area of Disciplinary Medicine, Teaching, Ethics in Nursing, Care, Administration, Nursing Clinics and Nursing Research

Disciplinary Training (elective curricular line) consists of courses from the following Entrepreneurship, Disciplinary Area, Academic systems of Social relevance and General Education.

Research courses (terminal curricular line), which consists in the research of Nursing Topics focused in the maternal and perinatal health.

CURRICULAR MAP

The propaedeutic courses must be taken according to the results of your placement exams in English, Physics, Math and / or Computing, depending on your chosen academic program plan.

The elective courses in the terminal curricular lines must be chosen according to your professional preferences.

FLEXIBLE CURRICULUM MODEL DISTRIBUTION

SPECIALTY IN EMERGENCY NURSING

MODALITY: Grounded education

CAMPUS: PUEBLA

RVOE: SEP-SES/21/114/01/1287/2015

ACADEMIC PROGRAM PURPOSE

It trains specialists with a humanistic sense and quality service, who intervene in the solution of problems in medical and surgical emergencies, basic and advanced life support, by integrating the elements that make up the nursing practice guidelines, procedures and interventions of high specialty, to stabilize the patient, avoiding adverse events, and generate better life expectancy.

ENTRY PROFILE

Knowledge

- Distinguishes the organization and functioning of a nursing service.
- Differentiates the basic stages of the nursing research process.
- Describes the anatomy and physiology of the human body.

- Recognizes the lines of communication and authority.
- Identifies the roles and responsibilities of the nursing professional.
- Explains the basic principles of nursing interventions.
- Identifies the epidemiological profile in health.
- Explains the basic concepts of pharmacology.
- Describes the pathophysiology of the organism.

Abilities and/or skills

- Manages basic computer packages Word, Excel and Power Point.
- Demonstrates ability to make quick decisions.
- Applies the principles of patient safety.
- Uses basic tools to apply human care procedures.
- Utilizes safety actions in the nursing service.
- Applies the criteria of self-care and healthy lifestyles in relation to their environment.
- Elaborates diagnoses in the nursing service.
- Plans practical guides in the nursing service.

Attitudes and Values

- Shows interest to work in a team.
- Is interested in establishing interpersonal relationships.
- Shows attitude and vocation of service.
- Respects the physical integrity of the patient.
- Is concerned about attending to the patient's physiological functions.

Habits

- Reading and consultation.
- Study habits.
- Habit of observation and reflection
- Habit of service to the patient
- Work in a methodical and hierarchical way.
- Efficiency and effectiveness at work.
- Habit of effective communication.

THE GRADUATION PROFILE FOR THE NURSE SPECIALIST IN EMERGENCY NURSING

To incorporate the codes of ethics and legal norms, in favor of physical and mental integrity

To apply the codes of ethics and legal norms, in favor of the physical and mental integrity during emergency care.

To Incorporate the methodology of the nursing process emergency guaranteeing the patient safety.

To apply therapeutic resources and technological equipment to support the care of patients in emergency situations.

To design research projects in Nursing to generate knowledge that strengthen care in emergency health situations.

PROGRAM CURRICULAR LINES

The academic program is made up of 16 courses that can be studied in a flexible curriculum in 4 academic periods.

It is made up of:

General Education (institutional curricular line): General Courses, which consist of the completion of five curricular lines such as: Bioethics, Computing Skills, Humanist Training, Entrepreneurship and Languages.

SPECIALTY IN CRITICAL CARE NURSING

MODALITY: Grounded education

CAMPUS: PUEBLA

RVOE: SEP-SES/21/114/01/1289/2015

ACADEMIC PROGRAM PURPOSE

It trains specialists with a humanistic sense and quality service, in the care of the critically ill patient, implementing specific invasive models and procedures, supported by high technology equipment, to stabilize the patient's health problem, thus preventing sequelae, generating greater expectations and quality of life.

ENTRY PROFILE

Knowledge

- Distinguishes the organization and functioning of a nursing service.
- Differentiates the basic stages of the nursing research process.
- Describes the anatomy and physiology of the human body.

- Recognizes the lines of communication and authority.
- Identifies the roles and responsibilities of the nursing professional.
- Explains the basic principles of nursing interventions.
- Identifies the epidemiological profile in health.
- Explains the basic concepts of pharmacology.
- Describes the pathophysiology of the organism.

Abilities and/or skills

- Manages basic computer packages Word, Excel and Power Point.
- Demonstrates ability to make quick decisions.
- Applies the principles of patient safety.
- Uses basic tools to apply human care procedures.
- Utilizes safety actions in the nursing service.
- Applies the criteria of self-care and healthy lifestyles in relation to their environment.
- Elaborates diagnoses in the nursing service.
- Plans practical guides in the nursing service.

Attitudes and Values

- Shows interest to work in a team.
- Is interested in establishing interpersonal relationships.
- Shows attitude and vocation of service.
- Respects the physical integrity of the patient.
- Is concerned about attending to the patient's physiological functions.

Habits

- Reading and consultation.
- Study habits.
- Habit of observation and reflection
- Habit of service to the patient
- Work in a methodical and hierarchical way.
- Efficiency and effectiveness at work.
- Habit of effective communication.

THE GRADUATION PROFILE FOR THE NURSE SPECIALIST IN CRITICAL CARE

To incorporate the codes of ethics and legal norms, in favor of the physical, mental and social integrity of the patient in critical condition.

To perform therapeutic care techniques and procedures to reduce events that generate a lower rate of hospitalization in the critical care service, without considering cultural differences.

To apply nursing interventions based on decision-making that contributes to the treatment and rehabilitation of patients who are in the critical care unit, to integrate them into their family and social context without sequelae.

To design research projects in Nursing Science to generate knowledge regarding education, health and decrease in admission to the critical care service.

PROGRAM CURRICULAR LINES

The Critical Care program is made up of 16 courses that can be studied in a flexible curriculum in 4 academic periods.

It is made up of:

General Education (institutional curricular line): General Courses, which consist of the completion of five curricular lines such as: Bioethics, Computing Skills, Humanist Training, Entrepreneurship and Languages.

Theoretical Training (basic professional curricular line), which consists of fulfilling courses corresponding to: Psychology, Biology, Basic Assistance, Preventive.

Disciplinary Training (professional curricular line and elective curricular line), which consists of Courses that correspond to the area of Disciplinary Medicine, Teaching, Ethics in Nursing, Care, Administration, Nursing Clinics and Nursing Research

Disciplinary Training (elective curricular line) consists of courses from the following Entrepreneurship, Disciplinary Area, Academic systems of Social relevance and General Education.

Research courses (terminal curricular line), which consists in the research of Nursing Topics focused in the critical care service.

SPECIALTY IN PEDIATRIC NURSING

MODALITY: Grounded education

CAMPUS: PUEBLA

RVOE: SEP-SES/21/114/04/1383/2015

ACADEMIC PROGRAM PURPOSE

It trains specialists with a humanistic sense and quality service, who intervene in the care of pediatric patients, through the design of comprehensive care strategies based on the human response, to promote the growth and development of the child, avoiding sequelae.

ENTRY PROFILE

Knowledge

- Distinguishes the organization and functioning of a nursing service.
- Differentiates the basic stages of the nursing research process.
- Describes the anatomy and physiology of the human body.

- Recognizes the lines of communication and authority.
- Identifies the roles and responsibilities of the nursing professional.
- Explains the basic principles of nursing interventions.
- Identifies the problems of the health-disease process.
- Explains the basic concepts of pharmacology.
- Identifies the concepts of embryology.

Abilities and/or Skills

- Manages basic computer packages Word, Excel and Power Point.
- Demonstrates ability to make quick decisions.
- Applies the principles of patient safety.
- Uses basic tools to apply humane care procedures.
- Utilizes safety actions in the nursing service.
- Applies the criteria of self-care and healthy lifestyles in relation to their environment.
- Plans practical guides in the nursing service.
- Elaborates diagnoses in the nursing service.

Attitudes and Values

- Shows interest to work in a team.
- Is interested in establishing interpersonal relationships.
- Shows attitude and vocation of service.
- Respects the physical integrity of the patient.
- Is concerned about attending to the patient's physiological functions.

Habits

- Reading and consultation.
- Study habits.
- Habit of observation and reflection.
- Habit of service to the patient.
- Work in a methodical and hierarchical way.
- Efficiency and effectiveness at work.

THE GRADUATION PROFILE FOR THE NURSE SPECIALIST IN PEDIATRIC:

To apply the codes of ethics and legal norms, in favor of the physical, mental and social integrity of the pediatric patient.

To accomplish health education and promotion activities, focused on caring for the child at home.

To plan nursing interventions with quality criteria of the pediatric nursing service, to meet the needs of the patient.

To design research projects related to pediatric patient care.

PROGRAM CURRICULAR LINES

The academic program is made up of 16 courses that can be studied in a flexible curriculum in 4 academic periods.

It is made up of:

General Education (institutional): General Courses, which consist of the fulfillment of five curricular lines such as: Bioethics, Computing Skills, Humanist Training, Entrepreneurship and Languages

Theoretical Training (basic professional core), which consists of fulfilling courses corresponding to: Psychology, Biology, Basic Assistance, Preventive.

Disciplinary Training (professional curricular line and elective curricular line), which consists of Courses that correspond to the area of Medical Care, Teaching, Ethics in Nursing, Care, Administration, Nursing Clinics and Nursing Research

Disciplinary Training (elective curricular line) consists of courses from the following Entrepreneurship, Disciplinary Area, Academic systems of Social relevance and General Education.

Research courses (terminal curricular line), which consists in the research of Nursing Topics focused in pediatric nursing specialty.

CURRICULAR MAP

The propaedeutic courses must be taken according to the results of your placement exams in English, Physics, Math and / or Computing, depending on your chosen academic program plan

The elective courses in the terminal curricular lines must be chosen according to your professional preferences.

SPECIALTY IN WOUND CARE AND VASCULAR ACCESS NURSING

MODALITY: Grounded education

CAMPUS: PUEBLA

RVOE: SEP-SES/21/114/01/1800/2017

ACADEMIC PROGRAM PURPOSE

It trains Nursing Specialists with ethical, humanistic and quality service, who intervene in the care of wounds, stomas and vascular accesses caused by pathophysiological processes, implementing highly specialized methodological procedures on prevention, care and emotional support to patients, to provide comprehensive services in health promotion, care management, as well as helping to improve life expectancy.

ENTRY PROFILE

Knowledge

- Distinguishes the organization and functioning of a service in Nursing.
- Differentiates the basic stages of the research process in nursing.
- Describes the anatomy and physiology of the human body.

- Explains the basic principles of nursing interventions.
- Identifies the epidemiological profile in health.
- Explains the basic concepts of Pharmacology.
- Describes the physiopathology of the organism.

Abilities and/or Skills

- Plans care related to the assessment of signs, symptoms and needs of the patient.
- Applies nursing care models.
- Demonstrates ability to make quick decisions.
- Performs nursing interventions based on the patient's life cycle.
- Uses safety actions in the nursing service.
- Applies the criteria of self-care and healthy lifestyles in relation to their environment.
- Evaluates the patient's health status and needs.
- Plans practical guidelines in the nursing service.

Attitudes and Values

- Acts with willingness to work collaboratively with the health team.

- Values the human rights of the patient.
- Acts with vocation of service.
- Respects the physical integrity of the patient.
- Is concerned about attending to the patient's physiological functions.

Habits

- Habit of reading and consultation.
- Habit of observation and reflection.
- Habit of service to the patient.
- Habit of organization and hierarchy of work.
- Efficiency and effectiveness at work.
- Habit of effective communication.

THE GRADUATION PROFILE FOR THE NURSE SPECIALIST IN WOUND CARE AND VASCULAR ACCESS

To apply the codes of ethics and legal norms, in favor of the physical, mental and social integrity of the patient.

To accomplish health promotion activities aimed to reduce events that generate hospital admissions.

To plan nursing interventions to meet the needs of the patient, based on human response with criteria of quality of nursing service.

To take care of the healing process, through advanced equipment and high technology reducing costs in time.

To attend to dermal lesions of vascular etiology in favor of the stay and prompt discharge from the hospital.

To administer drugs based on patient safety actions to avoid adverse events.

To design research projects related to patient care with stomatal wounds and vascular access.

PROGRAM CURRICULAR LINES

The academic program is made up of 20 courses that can be studied in a flexible curriculum in 4 academic periods.

It is made up of:

General Education (institutional curricular line): General Courses, which consist of the completion of five curricular lines such as: Bioethics, Computing Skills, Humanist Training, Entrepreneurship and Languages.

Theoretical Training (basic professional curricular line), which consists of fulfilling courses corresponding to: Psychology, Biology, Basic Assistance, Preventive.

Disciplinary Training (professional curricular line and elective curricular line), which consists of Courses that correspond to the area of Disciplinary Medicine, Teaching, Ethics in Nursing, Care, Administration, Nursing Clinics and Nursing Research

Disciplinary Training (elective curricular line) consists of courses from the following Entrepreneurship, Disciplinary Area, Academic systems of Social relevance and General Education.

Research courses (terminal curricular line), which consists in the research of Nursing Topics focused in the Injuries and vascular accesses specialty.

CURRICULAR MAP

The propaedeutic courses must be taken according to the results of your placement exams in English, Physics, Math and / or Computing, depending on your chosen academic program plan

The elective courses in the terminal curricular lines must be chosen according to your professional preferences.

SPECIALTY IN SURGICAL NURSING

MODALITY: Grounded education

CAMPUS: PUEBLA

RVOE: SEP-SES/21/114/04/1801/2017

ACADEMIC PROGRAM PURPOSE

It trains Surgical Nursing Specialists, with ethical and humanistic sense, who intervene in the planning, execution and evaluation of specialized patient care, using the methodology of prevention, identification and solution of problems in the surgical area under the interpretation and application of the regulations, to contribute to improve the quality of life of people and achieve their integration to the family and social context.

ENTRY PROFILE

Knowledge

- Recognizes the phases of the life cycle in health and disease processes.
- Differentiates the basic stages of the research process in nursing.
- Identifies the organization and operation of the surgical service.

- Recognizes the anatomy and physiology of the human body.
- Identifies the sterilization chain process.
- Recognizes the aseptic techniques of the surgical area.
- Distinguishes the stages of the nursing care process.
- Explains the basic concepts of Pharmacology.

Abilities and/or skills

- Demonstrates ability for quick decision making.
- Applies the principles of patient safety.
- Uses the basic instruments to apply the procedures of human care.
- Uses the safety actions in the nursing service.
- Applies the criteria of self-care and healthy lifestyles in relation to their environment.

Uses information and communication technology.

Attitudes and Values

- Shows interest to work in a team.
- Values personal health care, as well as that of patients.

- Collaborates in the development of health care programs.
- Respects the physical integrity of the patient.
- Is concerned about attending to the patient's physiological functions.

Habits

- Habit of order.
- Habit of discipline.
- Habit of observation and reflection.
- Habit of service to the patient.
- Work in a methodical and hierarchical way.
- Habit of effective communication.

THE GRADUATION PROFILE FOR THE NURSE SPECIALIST IN SURGICAL

To apply the codes of ethics and legal norms, in favor of the physical, mental and social integrity of the patient in the pre, trans and postoperative period.

To accomplish health education and promotion activities.

To design administrative resources to improve the planning, development and evaluation of activities related to nursing interventions.

To use the surgical equipment and material according to the complexity of care during the pre-trans and postoperative period of the surgical patient.

To administer drugs and other anesthesia therapies based on patient safety actions to avoid adverse events.

To design research projects related to the care of patients who require surgery.

PROGRAM CURRICULAR LINES

The academic program is made up of 16 courses that can be studied in a flexible curriculum in 4 academic periods.

It is made up of:

General Education (institutional curricular line): General Courses, which consist of the completion of five curricular lines such as: Bioethics, Computing Skills, Humanist Training, Entrepreneurship and Languages.

Theoretical Training (basic professional curricular line), which consists of fulfilling courses corresponding to: Psychology, Biology, Basic Assistance, Preventive.

Disciplinary Training (professional curricular line and elective curricular line), which consists of Courses that correspond to the area of Disciplinary Medicine, Teaching, Ethics in Nursing, Care, Administration, Nursing Clinics and Nursing Research

Disciplinary Training (elective curricular line) consists of courses from the following Entrepreneurship, Disciplinary Area, Academic systems of Social relevance and General Education.

Research courses (terminal curricular line), which consists in the research of Nursing Topics focused in the surgical nursing specialty.

CURRICULAR MAP

The propaedeutic courses must be taken according to the results of your placement exams in English, Physics, Math and / or Computing, depending on your chosen academic program plan

SPECIALTY IN CLINICAL PATHOLOGY

MODALITY: Grounded education

CAMPUS: PUEBLA

RVOE: SEP-SES/21/114/04/1401/ 2015

ACADEMIC PROGRAM PURPOSE

It trains specialists in the field of clinical pathology capable of performing in the areas of medical care and scientific research with human sense and professional ethics, through the application of techniques and methods in the clinical laboratory with quality management systems, instrumentation and clinical correlation, to train human resources to manage clinical laboratories of high technological level and respond to the need for timely diagnosis, treatment and prognosis relevant to the behavior of diseases at state and national level.

ENTRY PROFILE

Knowledge

- Distinguishes the scientific fundamentals of general medicine.
- Recognizes the basis of the clinical method
- Describes the basics of epidemiology
- State the principles of basic statistics

Abilities and/or skills

- Express him/herself technically both orally and in writing.
- Works as part of a team
- Demonstrates analytical skills
- Proficient in English at an intermediate level
- Shows interest in research
- Uses commercial software
- Plans and organizes his/her work

Values and/or attitudes

- Explicit liking for the specialty
- Shows responsibility and honesty
- Conducts him/herself with tolerance towards others

- Adheres to medical ethics
- Demonstrates willingness to work
- Proposes new ideas
- Helps patients unconditionally
- Self-motivated

Habits

- Daily Reading
- Planning of activities
- Organization
- Attention to detail
- Cleanliness

THE GRADUATION PROFILE FOR THE SPECIALIST IN CLINICAL PATHOLOGY

To apply strategic planning in the management of a clinical laboratory.

To establish the criteria and quality standards that a clinical laboratory must meet.

To generate reports of diagnosis, follow-up and prognosis of patients, based on clinical laboratory techniques, which facilitate medical decision-making, in an ethical and responsible manner.

To use clinical correlation techniques for the diagnosis of pathologies.

To develop applied research to project new techniques in the clinical laboratory.

To handle instruments and laboratory methods that allow him to detect biochemical, physiological and histological changes that indicate the nature of the disease.

To implement the biosafety standards in the Clinical Laboratory.

To assume a respectful and humane attitude in dealing with the patient, the health team and the community.

PROGRAM CURRICULAR LINES

The program has a number of 26 courses that can be taken in 6 academic periods.

It is composed of:

Common Core: its curricular lines are oriented to Human Development.

Basic professional core: its curricular lines are oriented to the area of Methodology, Instrumentation, Basic Chemistry, Clinical Correlation and Human Pathology.

Professional core: its curricular lines are oriented to the areas of Advanced Instrumentation, Specialized Clinical Correlation and Comprehensive Pathology.

Terminal Curricular line: its curricular line is oriented to Research.

CURRICULAR MAP

The propaedeutic courses must be taken according to the results of your placement exams in English, Physics, Math and / or Computing, depending on your chosen academic program plan

The elective courses in the terminal curricular lines must be chosen according to your professional preferences.

SPECIALTY IN GASTROENTEROLOGY

MODALITY: Grounded education

CAMPUS: PUEBLA

RVOE: SEP-SES/21/114/04/2066/2017

ACADEMIC PROGRAM PURPOSE

To train specialists in Gastroenterology who, with a biomedical, clinical, ethical and humanistic approach, integrate a diagnosis, treatment and follow-up of digestive pathologies, through a correct evaluation that includes the interpretation of the alterations presented in the digestive tract, esophagus, stomach, intestines, colon, pancreas, liver and biliary tract, with the purpose of establishing a timely diagnosis, treatment and prognosis and, accordingly, to promote the prompt recovery of a healthy lifestyle.

Knowledge.

- Conclude at least two years of internal medicine.
- Analyze clinical and paraclinical methods.
- Interpret diagnostic aids.
- Describe the fundamentals of scientific epidemiology.

ENTRY PROFILE

Skills

- Performs basic medical and surgical procedures.
- Presents critical judgment in the prevention, diagnosis, prognosis and treatment of the patient.
- Demonstrates leadership and decision making skills.
- Expresses him/herself clearly, orally and in writing.
- Manages basic skills for inquiry and research in the medical sciences.
- Reads texts in English.

Attitudes

- Appreciates honesty and responsibility in his/her medical actions.
- Acts with empathy and consideration.
- Is aware of the importance of commitment and congruence that implies facing the challenge of studying the specialty in Gastroenterology.
- Assumes a commitment to well being, well knowing and well doing.

Habits

- Habit of study.
- Hygiene habit.
- Habit of punctuality.

THE GRADUATION PROFILE FOR THE SPECIALIST IN GASTROENTEROLOGY:

To evaluate the clinical manifestations of gastroenterological diseases to apply necessary clinical and / or biomedical procedures or, where appropriate, channel to the corresponding area.

To execute gastroenterological clinical and / or surgical procedures in patients with different characteristics and contexts.

To apply endoscopic processes and methods in the digestive system, based on interpretation and clinical reasoning.

To perform manometer, pH measurement and other esophageal techniques or procedures necessary for the diagnosis, treatment and prognosis of gastrointestinal diseases.

To implement the necessary care for oncological diseases digestive, fully identifying their characteristics and requirements

To develop research in the gastroenterological area with the idea of providing scientific procedures that help solve digestive problems and diseases.

To develop research in the gastroenterological area with the idea of contributing scientific procedures that help in the solution of digestive problems and diseases.

PROGRAM CURRICULAR LINES:

The program has a number of 26 courses that can be taken in 6 academic periods.

It is composed of:

Common Core: its curricular lines are oriented to Human Development.

Basic professional core: its curricular lines are oriented to the area of Methodology, Instrumentation, Basic Chemistry, Clinical Correlation and Human Pathology.

Professional core: its curricular lines are oriented to the areas of Advanced Instrumentation, Specialized Clinical Correlation and Comprehensive Pathology.

Terminal Curricular line: its curricular line is oriented to Research.

CURRICULAR MAP:

The propaedeutic courses must be taken according to the results of your placement exams in English, Physics, Math and / or Computing, depending on your chosen academic program plan.

The elective courses in the terminal curricular lines must be chosen according to your professional preferences.

SPECIALTY IN HEMATOLOGY

MODALITY: Grounded education

CAMPUS: PUEBLA

RVOE: SEP-SES/21/114/04/2065/2017

ACADEMIC PROGRAM PURPOSE

It trains competent specialists in Hematology to care for hematological patients from a multidisciplinary, flexible and humanistic vision, through diagnosis, treatment, research applied to the biomedical and clinical field of the different hematological diseases, with the purpose of restoring their health and well-being and thus promoting their reintegration into society.

ENTRY PROFILE

Knowledge:

- Identifies clinical and paraclinical methods.
- Interprets diagnostic aids.
- Analyzes scientific texts in English.
- Interprets scientific epidemiology.

Skills

- Designs and evaluates projects in the health area.
- Performs medical-surgical procedures.
- Demonstrates observation and analysis skills.
- Uses critical thinking in the analysis of health problems.
- Develops basic research protocols.
- Makes decisions based on scientific knowledge.
- Manages critical judgment for prevention, diagnosis, prognosis, treatment and recovery of the patient.
- Demonstrates capacity for collaborative work.
- Clearly expresses their ideas orally and in writing.
- Develops innovation processes.
- Demonstrates interest in medical sciences.

Attitudes and values

- Shows facility to establish interpersonal relationships.
- Values the importance of leadership.
- Is interested in community service.

- Is concerned about human values.
- Assumes an assertive attitude.
- Identifies with UPAEP's values and educational model.
- Values honesty and integrity.
- Orientation to well being, well being and well doing.
- Search for the common good.
- Acts with responsibility, commitment and empathy.
- Is congruent in his/her medical actions.
- Is committed to Altruism and humanistic and social conscience.

Habits

- Reading habit.
- Habit of cleanliness and hygiene.
- Habit of listening and attention to others.

THE GRADUATION PROFILE FOR THE SPECIALIST IN HEMATOLOGY:

To integrate an accurate diagnosis of hematological diseases based on deep clinical reasoning.

To propose the medical and / or surgical therapy required for the solution of the hematological pathology.

To apply scientific research in the field of hematology, addressing the different types of blood disorders such as leukemia's, lymphomas and anemia, with their symptoms, signs, disorders and treatments.

To disseminate the results of hematological research through education and prevention plans to the population, teaching other members of the medical team and disseminating scientific texts.

To apply clinical and epidemiological scientific evidence in hematological medical practice.

To apply medical technology in the care and treatment of oncohematological conditions, including transplant therapy and biomedical treatment.

To apply the ethical and legal codes of the medical profession in the solution of hematological diseases, protecting professional secrecy and maintaining confidentiality.

PROGRAM CURRICULAR LINES:

The program has 31 courses, which are taken in 6 school periods.

It is composed of:

Common Core: its curricular lines are oriented to Human Development.

Basic professional core: its curricular lines are oriented to didactics strategies and Biomedics.

Professional core: its curricular lines are oriented to the Sociomedical and Clinical area.

Terminal Core: its curricular lines are oriented to Integration and Research.

CURRICULAR MAP:

The propaedeutic courses must be taken according to the results of your placement exams in English, Physics, Math and / or Computing, depending on your chosen academic program plan

The elective courses in the terminal curricular lines must be chosen according to your professional preferences.

SPECIALTY IN SURGICAL ONCOLOGY

MODALITY: Grounded education

CAMPUS: PUEBLA

RVOE: SEP-SES/21/114/01/755/2011

ACADEMIC PROGRAM PURPOSE

Specializes medical doctors in the field of surgical oncology, competent to meet the demands of society in the care of patients with cancer, integrating knowledge, processes and cognitive structures, skills, abilities, values and social relations, allowing them to respond to the requirements of present and future professional medical practice, maintaining the ability to establish optimal courses of action, through teamwork, reflection in action, research and application of biomedical and clinical scientific knowledge, multidisciplinary approach, adaptability and a vision of the future and social commitment, within a plurality of contexts and situations.

Knowledge

- About general surgery.
- Distinguish between normal and pathological in the health-disease process.
- Concepts of embryology, anatomy and physiology of the organism.
- Concepts of epidemiology within the social, political and cultural context.
- Concepts of functional and dysfunctional morphological components.
- Clinical and paraclinical methods.
- Diagnostic aids.
- Scientific epidemiology.
- English language (comprehension of scientific texts).

Abilities and/or Skills

- Handling of techniques, tools and strategies of medical vanguard.
- Observation and analysis skills, indispensable for the discovery of new knowledge.
- Systemic thinking.

- Clear expression of ideas in oral and written form.
- Handling of instruments and research methodology.
- Ease in establishing interpersonal relationships, based on assertive communication.
- Decision-making in stressful situations.
- Critical judgment for prevention, diagnosis, prognosis, treatment and recovery of the patient.

Attitudes and/or Values

Orientation to multidisciplinary and collaborative work.

To consider the patient as a dignified, integral person with a spiritual dimension.

Show a broad professionalism and timely service to patients and members of the medical community.

Always show an attitude of service to patients and members of the medical community.

High appreciation for life and the human values on which it is based.

Openness to new treatments and comprehensive cancer trends.

THE GRADUATION PROFILE FOR THE SPECIALIST IN SURGICAL ONCOLOGY

To practice surgical procedures that generate preventive and curative care measures for oncological diseases.

To promote, maintain and recover the health of cancer patients.

To generate relevant knowledge and integrate it into the different areas in which he develops his oncological surgical practice.

To apply the information obtained from scientific, clinical and epidemiology research to provide alternative solutions in the treatment of oncological pathologies.

To assume the ethical principles of clinical and research practice, applying them in his professional work; shows consistency in the application of professional ethical codes with the ethical dilemmas that arise in the oncology community.

To participate with professional organizations, integrating effectively into the multidisciplinary health work, responding to the needs of the patient and maintaining high standards in the surgical practice of Oncology.

- Clear expression of ideas in oral and written form.
- Handling of instruments and research methodology.
- Ease in establishing interpersonal relationships, based on assertive communication.
- Decision-making in stressful situations.
- Critical judgment for prevention, diagnosis, prognosis, treatment and recovery of the patient.

Attitudes and/or Values

Orientation to multidisciplinary and collaborative work.

To consider the patient as a dignified, integral person with a spiritual dimension.

Show a broad professionalism and timely service to patients and members of the medical community.

Always show an attitude of service to patients and members of the medical community.

High appreciation for life and the human values on which it is based.

Openness to new treatments and comprehensive cancer trends.

THE GRADUATION PROFILE FOR THE SPECIALIST IN SURGICAL ONCOLOGY

To practice surgical procedures that generate preventive and curative care measures for oncological diseases.

To promote, maintain and recover the health of cancer patients.

To generate relevant knowledge and integrate it into the different areas in which he develops his oncological surgical practice.

To apply the information obtained from scientific, clinical and epidemiology research to provide alternative solutions in the treatment of oncological pathologies.

To assume the ethical principles of clinical and research practice, applying them in his professional work; shows consistency in the application of professional ethical codes with the ethical dilemmas that arise in the oncology community.

To participate with professional organizations, integrating effectively into the multidisciplinary health work, responding to the needs of the patient and maintaining high standards in the surgical practice of Oncology.

PROGRAM CURRICULAR LINES:

The program has a number of 30 courses that can be taken in 6 academic periods.

It is made up of:

Basic professional core: its curricular lines are oriented to the Didactic, Biomedical and Sociomedical area.

Professional core: its curricular lines are oriented to the Clinical area and Administration.

Terminal Curricular line: its curricular lines are oriented to Integration and Research.

CURRICULAR MAP:

The propaedeutic courses must be taken according to the results of your placement exams in English, Physics, Math and / or Computing, depending on your chosen academic program plan

The elective courses in the terminal curricular lines must be chosen according to your professional preferences.

SPECIALTY IN ANESTHESIOLOGY

MODALITY: Grounded education

CAMPUS: PUEBLA

RVOE: SEP-SES/21/114/04/1981/2017

ACADEMIC PROGRAM PURPOSE

It trains medical specialists in anesthetic procedures, whose responsibility is to propitiate the states of amnesia, hypnosis, analgesia, neuromuscular relaxation and neurovegetative protection, performing medical and/or surgical procedures, characterized by a high professional capacity and a high humanitarian sense, which guarantee the absence of pain and prompt recovery, prudence in the administration of the resources used and involvement in teaching and research in health, in order to provide safe medical care and with absolute respect for human dignity, comply with official standards for the care of the patient to be intervened medically or surgically and thus contribute to the prevention of damage and improve the patient's health levels.

ENTRY PROFILE

Knowledge

- Explain the scientific foundations of medicine from the basic sciences (Anatomy, Histology, Embryology, Physiology, Biochemistry, Pharmacology), clinical sciences (Internal Medicine, Surgery, Pediatrics, Gynecology and Obstetrics, Emergency Medicine, Family Medicine and Public Health) and socio-medicine.
- Distinguishes the usefulness of the Clinical Method, Epidemiological Method and health research.

Skills

- Reads, analyzes and translates texts in English, presenting a minimum score of 450 points in the TOEFL exam.
- Systematically retrieves information to establish a diagnosis in congruence with the patient's clinical picture.
- Uses critical judgment for the prevention, diagnosis, prognosis, treatment and recovery of the patient, in congruence with his/her clinical picture.
- Executes diagnostic and therapeutic procedures in general medicine.
- Develops basic medical-surgical procedures.
- Manages information and communication technologies.

- Clearly expresses him/herself orally and in writing.
- Demonstrates research skills.

Attitudes

- Works as part of a team and in a collaborative manner.
- Shows respectful and compassionate behavior.
- Assumes his work with leadership and critical thinking.
- Is aware of the importance of innovation and development.

Habits

- Reading habits
- Habit of observation and reflection
- Habit of service

THE GRADUATION PROFILE FOR THE SPECIALIST IN ANESTHESIOLOGY

To use the knowledge of Anesthesiology and Algology in clinical and therapeutic practice, to the patient's conditions and the professional development environment.

To apply skillfully, safely and with dignified treatment, the competences in Anesthesiology for the prevention, diagnosis, treatment and rehabilitation in the patients under his care, in accordance with the ethical codes of the medical profession.

To record in a timely manner the limitations of its competences in Anesthesiology, to request the necessary help for the benefit of the care of its patients when it is pertinent.

To collaborate proactively in interdisciplinary work teams, in order to contribute to the achievement of objectives and administrative prudence in the institutions where he works.

To participate in the continuing medical education in anesthesiology, of health professionals and of students of the different university and technical levels, as well as in the training of his patients and social groups that require it.

Contributes to anesthesiology research processes that contribute to the innovation of health care strategies.

PROGRAM CURRICULAR LINES:

The program has a number of 29 courses that can be taken in 6 school periods.

It is composed of:

Common Core: its curricular lines are oriented to Human Development.

Basic professional core: its curricular lines are oriented to Basic Sciences Applied to Anesthesiology and Didactics.

Professional core: its curricular lines are oriented to the Clinical area and Administration.

Terminal Curricular line: its curricular lines are oriented to Integration and Research.

CURRICULAR MAP:

SPECIALTY IN UROLOGY

MODALITY: Grounded education

CAMPUS: PUEBLA

RVOE: SEP-SES/21/114/04/1979/2017

ACADEMIC PROGRAM PURPOSE

It trains Urology Specialists with an ethical and human sense, who use with precision the physiology, physiopathology, clinical expression, methods of diagnostic recognition, nosology, medical and surgical procedures that attend the alterations of the genitourinary tract, through the integral analysis of the patient, to apply an effective and opportune treatment of the pathologies of urological nature that promotes the recovery and quality of life of the patient.

ENTRY PROFILE

Knowledge

- Identifies basic medical terms in English. presenting a minimum score of 450 points on the TOEFL exam.
- Recognizes the basic methodology of Medical research.

-Recognizes embryological, anatomical and physiological fundamentals.

Skills and/or abilities.

- Performs basic surgical procedures.
- Prepares relevant clinical diagnostic analyses.

Attitudes and/or values.

- Shows service attitude with the patient.
- Acts with human sense and warmth towards the patient and his/her environment.
- Collaborates and works as part of a team.
- Denotes respect towards superiors and colleagues.
- Acts with responsibility.
- Denotes willingness to learn

Habits

- Personal hygiene
- Reading habits
- Proactive work.
- Punctuality

THE GRADUATION PROFILE FOR THE SPECIALIST IN UROLOGY

To intervene the patient with urological disorders or damage, to establish a diagnosis and necessary medical treatment plan.

To apply the clinical or surgical treatments for the care of urological pathologies.

To implement urological tools or techniques in the care of patients facing problems or immediate care situations.

To design prevention plans in the urological field that prevent damage or alterations in patients of any age and condition, making them known by different means.

To direct and develop applied research in the field of Urology, as a means of prevention and care of damage in this health sector.

To use endourological and laparoscopic techniques as minimally invasive surgery.

PROGRAM CURRICULAR LINES

The program has a number of 27 courses that can be taken in 8 school periods.

It is composed of:

Common Core: its curricular lines are oriented to Human Development.

RVOE: SEP-SES/21/114/04/1805/2017

ACADEMIC PROGRAM PURPOSE

It trains specialists in Clinical Laboratory Sciences who manage processes of service, research, organization and administration of clinical laboratories, through the application of national and international regulations and certifications, with the purpose of implementing innovative techniques and strategies in the diagnosis and follow-up of laboratory specimens under a modern assistance conception, with an ethical and humanistic sense.

ENTRY PROFILE*Knowledge*

- Recognizes the theoretical bases of Microbiology, Hematology, Immunology, Clinical Chemistry, Molecular Biology.
- Enunciates the theoretical foundations of human anatomy and physiology.
- Analyzes processes based on applied statistics.

- Identifies the bases of the research process.

- Distinguishes the advances in laboratory science.

Abilities and/or skills

- Manages computer packages.

- Possesses manual dexterity in the handling of clinical laboratory instruments.

- Demonstrates ability in reading texts in English.

- Leads work groups.

- Applies verbal and mathematical reasoning.

- Makes assertive decisions.

- Evaluates laboratory quality standards.

- Demonstrates observation, analysis and synthesis skills.

Attitudes and/or values

- Adheres to medical ethics.

- Performs with vocation of service.

- Acts with a sense of order, organization and initiative.

- Demonstrates sociability and willingness to provide assistance to users.

- Performs with moral integrity.

- Acts with a sense of responsibility.

- Works with empathy.
- Shows willingness to work.
- Generates self-motivation in their performance.

Habits

- Daily reading
- Planning of activities
- Organization and discipline.
- Attention to details
- Cleanliness

THE GRADUATION PROFILE FOR THE SPECIALIST IN CLINICAL LABORATORY SCIENCE

To detect emerging diseases and communicate them to the health authorities.

To establish communication and service networks with health authorities.

To evaluate the possibilities of donating blood and cells for transplants in order to accept or reject them.

To evaluate the quantity and quality of the samples in the collection of blood units and cells.

To evaluate new lines of work and research in the laboratory.

To manage service processes in agreement with health and teaching institutions.

To promote the validation of clinical laboratory exercise with certification, under national and international regulations, as appropriate.

To evaluate computer systems applied to laboratory processes.

PROGRAM CURRICULAR LINES

The program has a number of 26 courses that can be taken in 6 academic periods.

It is composed of:

Common Core: its curricular lines are oriented to Human Development.

Basic professional core: its curricular lines are oriented to the areas of Laboratory Administration, Instrumentation and Basic Chemistry.

Professional core: its curricular lines are oriented to the areas of Pathology, Clinical Correlation and Advanced instrumentation.

Terminal Curricular line: its curricular line is oriented to Research.

CURRICULAR MAP

The propaedeutic courses must be taken according to the results of your placement exams in English, Physics, Math and / or Computing, depending on your chosen academic program plan

The elective courses in the terminal curricular lines must be chosen according to your professional preferences.

SPECIALTY IN NEPHROLOGY

MODALITY: Grounded education

CAMPUS: PUEBLA

RVOE: SEP-SES/21/114/04/1980/2017

ACADEMIC PROGRAM PURPOSE

It trains specialists in Nephrology, competent to meet the demands of society regarding the care of nephropathic patients, who analyze, interpret and evaluate renal pathology from the available clinical information, conducting a comprehensive study of the patient's health, in order to establish the required clinical or surgical nephrological treatment, with a humanistic, biomedical, multidisciplinary and ethical approach with social commitment.

ENTRY PROFILE

Knowledge

- 2 years of Internal Medicine.
- Identifies knowledge of scientific methodology.
- Analyzes basic texts in English. presenting a minimum score of 450 points in the TOEFL exam.

- Evaluates relevant medical knowledge that allows him/her to make decisions.

- Evaluates in an integral way the different areas of knowledge that allow him/her to develop an efficient work in the solution of the prevalent renal pathology.

Abilities and/or skills

- Use diagnostic and therapeutic procedures.
- Basic use of internet.
- Uses basic knowledge of statistics and medical methodology.
- Participates proactively with other members of the health area through teamwork.
- Performs verbal and non-verbal communication that favors dialogue with the patient, family and other members of the health team.

Attitudes and/or values

- Demonstrates ethical principles to clinical practice and research.
- Shows during clinical practice congruence with ethics and professional codes established by society and the medical community.
- Acts with discipline, order and punctuality.

- Is committed to quality and availability to attend patients and their families.
- Shows honesty and respect in his/her actions.
- Demonstrates an entrepreneurial spirit.
- Is aware of responsibility and leadership.
- Attitude of self-improvement and self-learning.

Habits

- Habit of self-knowledge and self-evaluation.
- Habit of reading and reflection for the better development of diagnostic and treatment techniques.

THE GRADUATION PROFILE FOR THE SPECIALIST IN NEPHROLOGY

To act with a preventive approach and not exclusively curative of nephrological diseases.

To promote, maintain and restore the health of patients with kidney disease.

To execute the nephrological medical procedure (kidney biopsies and vascular access placement) and interpret it.

To prepare the diagnosis and treatment of patients with kidney pathologies.

To Develop Health policies concerning Kidney Diseases.

To design and manages research projects in the area of Kidney diseases.

To plans, organize, execute and evaluate health promotion activities aimed at reducing the incidence or progression of kidney diseases

To defend the dignity of the person and the right to life, especially in patients with End-Stage Renal Disease, promoting the right to life, multidisciplinary care and quality of life.

PROGRAM CURRICULAR LINES

The program has 31 courses that can be taken in 6 academic periods.

It is composed of:

Common Core: its curricular lines are oriented to Human Development.

Basic professional core: its curricular lines are oriented to Didactics and Biomedics.

Professional: coreits curricular lines are oriented to the Socio-medical and Clinical area.

Terminal Core: its curricular lines are oriented to Integration and Research.

CURRICULAR MAP

The propaedeutic courses must be taken according to the results of your placement exams in English, Physics, Math and / or Computing, depending on your chosen academic program plan

The elective courses in the terminal curricular lines must be chosen according to your professional preferences.

SPECIALTY IN FAMILY MEDICINE

MODALITY: Grounded education

CAMPUS: PUEBLA

RVOE: SEP-SES/21/114/01/1978/2017

ACADEMIC PROGRAM PURPOSE

It trains Family Medicine Specialists with an ethical and humanistic sense, who provide comprehensive medical care to the individual and his family, through preventive, curative and rehabilitative actions, to support the biopsychosocial well-being of the family.

ENTRY PROFILE

Knowledge

- Distinguishes the basic knowledge in General Medicine.
- Evaluates the global needs of their patients.
- Identifies basic knowledge of bioethics and morals.
- Distinguishes basic knowledge in clinical and para-clinical studies.

Skills

- Communicates effectively with people.
- Works in interdisciplinary teams.
- Discriminates medical information.
- Selects medical literature that contributes to his/her professional field.
- Uses new medical technologies.
- Presents proficiency in the English language (350 points in the TOEFL exam).

Attitudes

- Is inclined to the vocation of service and solidarity.
- Assumes social commitment with his environment.
- Is committed to his work teams.
- Is interested in research in the area of health.
- Is interested in scientific knowledge.

Habits

- Habit of service
- Habit of effective communication
- Proactive reaction to diverse situations

THE GRADUATION PROFILE FOR THE SPECIALIST IN FAMILY MEDICINE

To develop processes of analysis of the health situation of people, families and communities, from a holistic vision and of the family life cycle.

To make diagnoses of the health situation of the person, the family and the community using appropriate technologies.

To provide specialized, comprehensive and continuous medical care and attention to individuals, families and communities, with a biopsychosocial approach.

To propose comprehensive management plans for the care of individuals, families and communities according to the family life cycle.

To participate in the comprehensive management of surgical patients according to the scope and competencies of the work team.

To make decisions for the comprehensive care of individuals, families and communities based on scientific evidence.

To participate in the permanent education of the people, families and communities placed in his care, mediating the learning processes.

To execute health plans, programs and projects, applying active and participatory methodologies with the community.

PROGRAM CURRICULAR LINES

The program has a number of 26 courses that can be taken in 6 academic periods.

It is composed of:

Common Core: its curricular lines are oriented to Human Development.

Basic professional core: its curricular lines are oriented to the Didactics and Bioethics area.

Professional core: its curricular lines are oriented to the areas of Family Medicine, Medical Surgical Emergencies, Administration, Pediatrics, Obstetric Gynecology and Internal Medicine.

Terminal Curricular line: its curricular lines are oriented to Integration and Research.

CURRICULAR MAP

The propaedeutic courses must be taken according to the results of your placement exams in English, Physics, Math and / or Computing, depending on your chosen academic program plan

The elective courses in the terminal curricular lines must be chosen according to your professional preferences.

MASTER'S DEGREE IN NURSING SCIENCE

MODALITY: Grounded education

CAMPUS: PUEBLA

RVOE: SEP-SES/21/114/04/1642/2016

ACADEMIC PROGRAM PURPOSE

It trains Masters in Nursing Sciences with a scientific and humanistic approach that contribute to the solution of the individual's health problems, developing research protocols that help formulate and apply strategies in the models of care, to promote the quality of health systems and services in their context.

ENTRY PROFILE

Knowledge:

- Recognizes the basics of scientific research.
- Identifies informatics tools.
- Points out basic aspects of the current health situation of the country.
- Recognizes the stages of the administrative process in nursing.
- Relates educational strategies and techniques in health.

- Distinguishes the current political, economic and social situation of the country.

Abilities and/or skills:

- Makes decisions in a timely manner.
- Applies the scientific process in the phenomena of study in nursing.
- Collaborates in research protocols.
- Solves problems based on what has been observed.
- Communicates effectively with the work team.
- Proposes treatments to the detected health needs.
- Shows visual and auditory skills.
- Uses new information and communication technologies.
- Participates in health promotion activities.
- Participates in the organization and operation of the nursing service.

Attitudes and Values:

- Is aware of the importance of professional secrecy and handling of confidential information.
- Shows attitude and vocation for service.

- Acts with order, organization and initiative.
- Shows commitment to his/her profession.
- Social responsibility and citizen commitment.
- Is committed to his socio-cultural environment.
- Is inclined to permanent updating.
- Values diversity and multiculturalism.

Habits:

- Reading and consultation.
- Habit of study.
- Habit of observation and reflection.
- Habit of social service.
- Work in a methodical and hierarchical way.
- Efficiency and effectiveness at work.
- Habit of effective communication.

**THE GRADUATION PROFILE FOR THE MASTER IN
NURSING SCIENCE**

To apply the codes of ethics and legal norms, in favor of the physical, mental and social integrity of the person.

To propose solutions focused on health promotion that favor the improvement of Nursing services and the quality of care.

To integrate the principles, models and theories of Nursing in the solution of health problems, considering the human response in the different stages of life.

To generate intervention protocols to promote models of nursing care and respond to health and nursing problems in the workplace.

To accomplish nursing research using different methodologies and frameworks to generate knowledge that strengthens nursing care.

To apply statistics for the development and management of research projects related to nursing and health care.

PROGRAM CURRICULAR LINES

The academic program is made up of 16 courses that can be studied in a flexible curriculum in 4 academic periods.

It is made up of:

General Education (institutional): General Courses, which consist of the completion of five curricular lines such as: Bioethics, Computing Skills, Humanist Training, Entrepreneurship and Languages.

Theoretical Training (basic professional core), which consists of fulfilling courses corresponding to: Psychology, Biology, Basic Assistance, Preventive.

Disciplinary Training (professional curricular line and elective curricular line), which consists of Courses that correspond to the area of Disciplinary Medicine, Teaching, Ethics in Nursing, Care, Administration, Nursing Clinics and Nursing Research

Disciplinary Training (elective curricular line) consists of courses from the following Entrepreneurship, Disciplinary Area, Academic systems of Social relevance and General Education.

Research courses (terminal curricular line), which consists in the research of Nursing Topics focused in the nursing science.

CURRICULAR MAP

The propaedeutic courses must be taken according to the results of your placement exams in English, Physics, Math and / or Computing, depending on your chosen academic program plan

The elective courses in the terminal curricular lines must be chosen according to your professional preferences.

FINANCIAL **AID**

A. LAUDEX CREDIT

In alliance with Santander Universities, Laudex benefits you with a payment plan to study any bachelor's, master's, doctorate or specialty at UPAEP.

Conditions

- Maximum financing line: \$950,000 m.n.
- We reduce your tuition by up to 50%.
- We cover your debt, so you can continue studying.
- We finance 100% of your studies: tuition, seminars, degrees, etc.
- Apply for your student exchange.

Requirements

Solidarity Obligor:

- Over 25 years of age
- Verifiable income

Student

- Minimum grade point average of 7.0
- Good credit history if any.
- Minimum 18 years old

B. SCHOLARSHIPS

UPAEP has several types of scholarships for new and returning undergraduate and graduate students. For more information, please visit: <https://upaep.mx/becas>

How can I apply for a scholarship?

For undergraduate reentry students, the call for applications is published in February each year.

For graduate reentry students, the call for applications is published in October and May.

What grade point average do I need to apply for any type of Financial Aid?

A minimum grade point average of 8.5.

Can I apply for a scholarship increase?

Yes, the scholarship increase process is exclusive for undergraduate students. The call for applications is published in October and April.

What types of financial support does UPAEP provide?

UPAEP awards academic, sports, cultural, seal, leadership, research, excellence and external sponsorship scholarships.

How much support can I receive?

Financial Aid can range from 20% to 100% of tuition, depending on each type of scholarship.

LEARNING RESOURCES

LIBRARY, TECHNOLOGY AND SUPPORT SERVICES, ACADEMIC SUPPORT

LIBRARY

UPAEP libraries offer information services that support research and teaching at our institution. Its bibliographic and documentary collection is a cultural asset that grows and develops with the constant participation of the university community, and provides the possibility of having or obtaining the necessary and pertinent information to the academic curricula that its users require. At the same time, libraries collaborate in the diffusion of the University, through the extension of their services to other institutions of higher education services to other higher education institutions and to society as a whole.

Among the functions of the UPAEP libraries are the acquisition, analysis, organization, classification, dissemination and retrieval of information, that supports the professional and human formation of our students, that helps us to identify the needs and social problems and which allows us to differentiate the alternatives and methods of solution. The information that is consigned in the learning guides of the different study programs, current and pertinent for the development of science, culture and technology.

UPAEP libraries are made up of physical and electronic resources in order to satisfy the information needs of the university community in relation to the institutional academic curricula.

Services

- Book loans
- Interlibrary loans with universities and institutions
- Workshops
- Room consultations
- Newspaper library
- Computer equipment
- Electronic magazines and publications
- Digital library
- Bibliography by subject
- Collections
- Open access repository
- UPAEP Repository
- Theses
- UPAEP Video Library

[Click Here](https://biblioteca.upaep.mx/index#servicios)

<https://biblioteca.upaep.mx/index#servicios>

The UPAEP libraries are made up of the “Karol Wojtyla” Central Library, the Tehuacán campus library “Socorro Romero Sánchez”, Centro de Estudios Guadalupanos, Centro de Estudios de Ciencia y Religión, and the libraries of the different high schools listed below; Santiago 1 Campus, Santiago 2 Campus, South Campus, Angelópolis Campus, Atlixco Campus, San Martín Campus, Cholula Campus, Santa Ana Campus, Huamantla Campus and Lomas Campus.

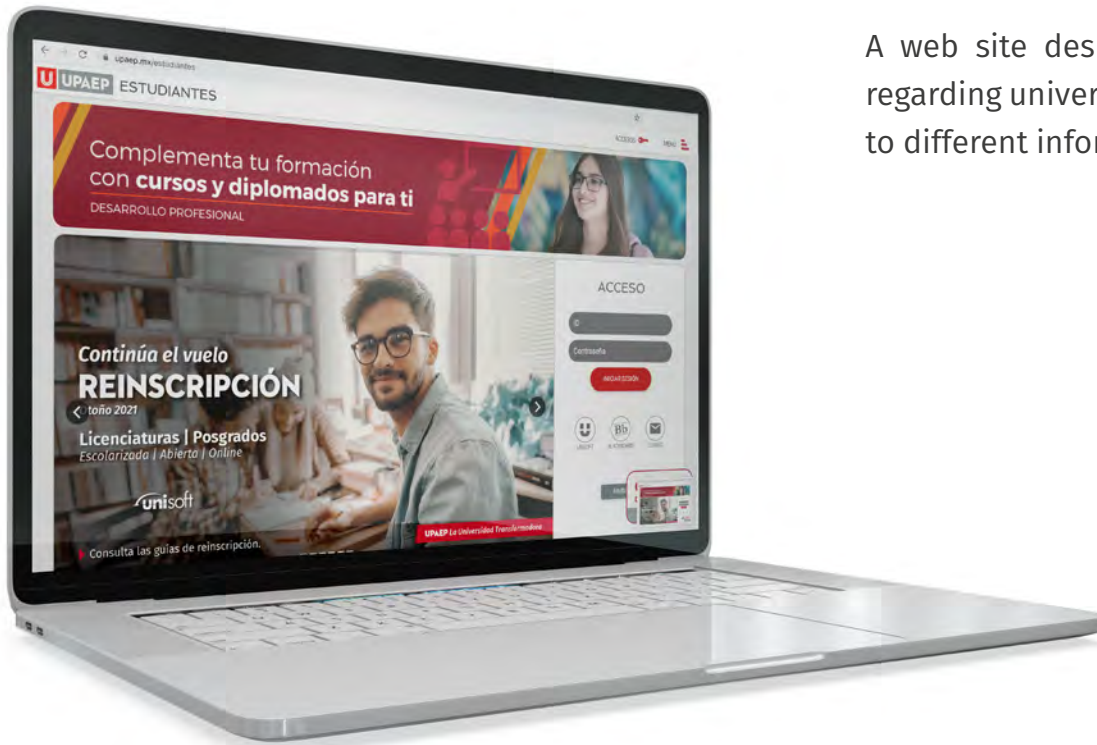

IT SERVICE CATALOG

Online services

Students web site

[Click Here](https://upaep.mx/estudiantes)<https://upaep.mx/estudiantes>

A web site designed to display relevant information to students regarding university procedures and services, information and access to different information platforms and electronic learning resources.

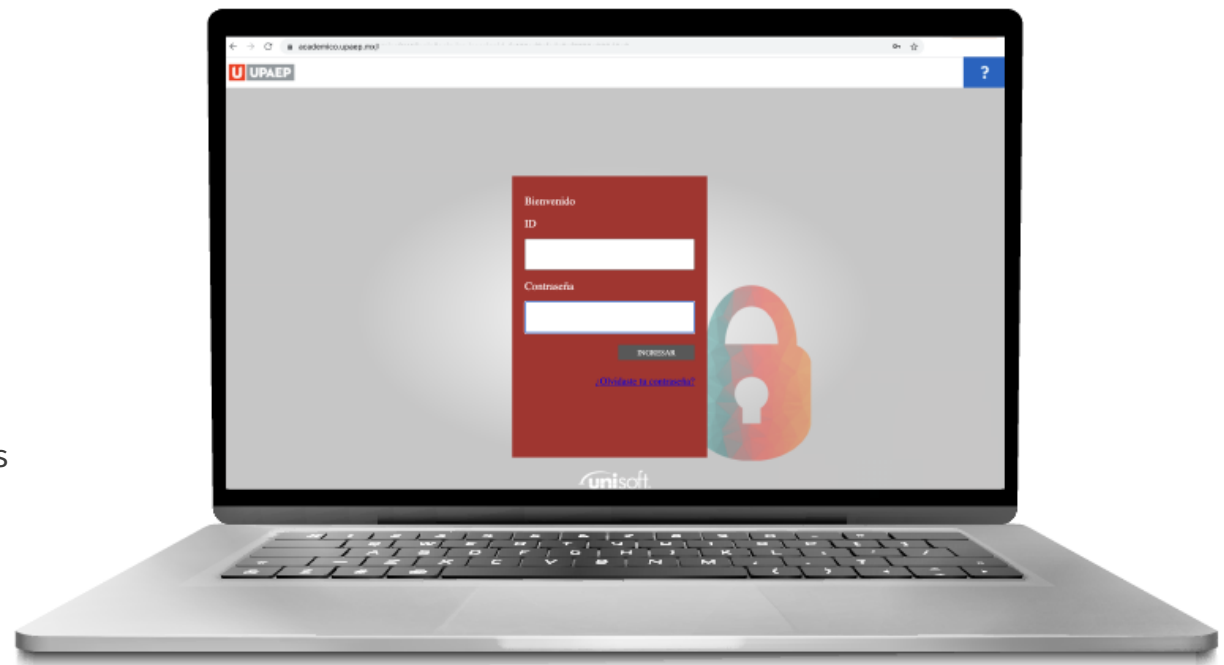

- Students can view information regarding:
- School calendars
- Schedules
- Grades
- Directory
- Account statements
- Payment information
- Events around campus
- Academic advising service
- Academic tutoring service

Normative documents, procedures and additional information
Requirements: active students with ID and password.

Student Information System (academico.upaep.mx)

A web application available to view and request information or services related to student life procedures and services.

- Scholarships
- Scholarship Service Program
- Schedule information
- Campus maps
- Directory of services
- Transcript information
- Enrollment status
- Consultation of courses offered
- Professor assessment
- Request for certificates and documents
- Student credential replacement
- Statement of Account
- Payment information
- Payment services
- Tuition
- Events and workshops

Requirements: every student with ID and password

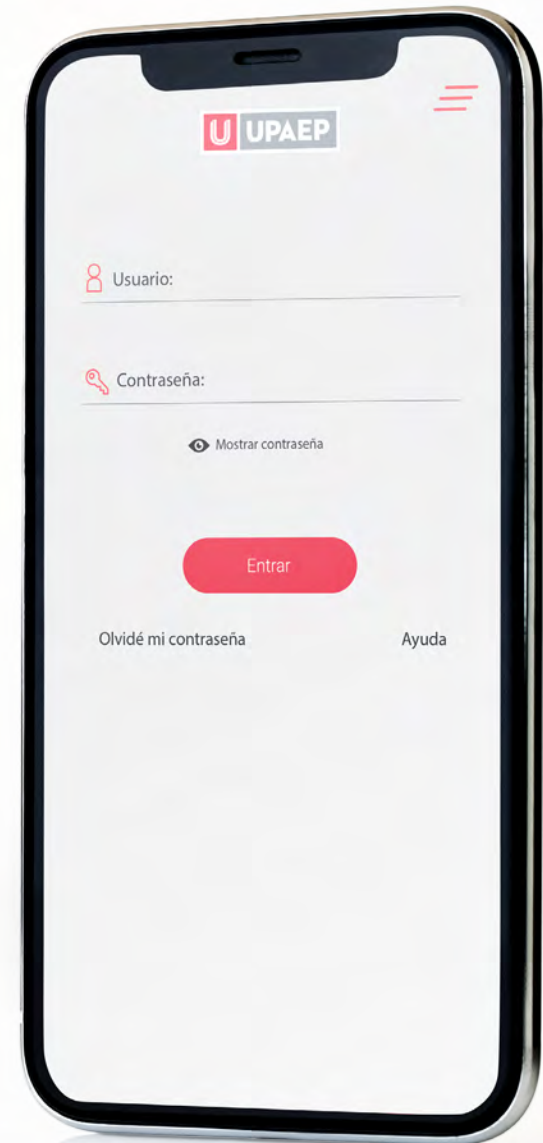

Student app service

Students can have access to information and services related to university life:

- Payment information
- Student bulletins and news
- Academic calendars
- Grades
- Campus maps
- Directory of services
- Events and workshops
- Library information
- Digital badge
- Other services available to students

Support: E-mail: soporte.app@upaep.mx

Requirements: every student with and ID and password

Email and collaboration tools

Through your UPAEP email account, use different online tools for the development of your academic activities.

Google Workspace provides email services and offers collaboration tools:

- Gmail, Calendar, Chat,
- Meet, for conference and collaboration
- Drive, for documents storage online
- Documents: create, manage and publish
Spreadsheets, Presentations, Forms, Sites and

Requirements: to be an active student at UPAEP and have access to your email account.

Google Workspace

Blackboard

Learning platform service

Blackboard is a learning platform that delivers a powerful learning experience to students and enables collaboration and access to information and learning resources related to each academic course in an academic program at UPAEP.

Blackboard platform hosts course materials, manages online assignments, provides collaboration and communications tools that further enable students to engage in learning activities required to achieve success.

Academic content available can be created in different formats as text, sound, video or animations, as well as third-party applications such as content platforms, virtual laboratories, video repositories, library resources, among other services.

Requirements: to be an active UPAEP student with ID and password

Academic software

The university provides a broad range of software applications available through remote access by students and faculty members, or at university facilities in different computer rooms and labs.

You can view available software: academic software 2021.

Questions and support related to academic software access:

E-mail: soporte.software@upaep.mx

Phone: +52 222 229-94-71 +52 222 2299400 ext. 7471

COMPUTER ROOMS AND LABS

University Computer Center (CUC)

The University Computer Center main facilities offer 23 computer rooms and 6 specialized software laboratories, located in 2 buildings. These facilities have capacity to serve 799 students simultaneously, each using a personal computer.

General use room

132 thin clients and 40 personal computers available to students, where users can use any available computer at the time of their request, using their student ID and password provided for this purpose.

Computer rooms at building “E”

23 rooms, with a total of 417 PC computers and 84 workstations. These spaces are used for scheduled classes, but they can also be used by students to practice and as general rooms or as long as they are available.

2 Networks and operating systems laboratories, with 35 PCs.

2 Architectural modeling and animation laboratories, each one equipped with 21 high-performance Workstations and specialized software.

2 CAD/CAM/CAE laboratories, each one equipped with 21 high performance workstations and specialized software.

Computer rooms at building “D”

Department of Language and Culture Studies laboratories, where there are 6 computer rooms with a total of 126 PC computers available to students.

All computers have internet service and access to information systems and learning resources available at UPAEP.

CUC technical support service assists users to solve problems that may arise in the use of CUC computer services or equipment.

Support: CUC offers service to users from Monday to Friday from 7:00 a.m. to 10:00 p.m., and on Saturdays from 7:00 a.m. to 2:00 p.m.

Requirements: in order to access the computers in the CUC, it is necessary to have an account, which in the case of students it is their institutional ID and access code (password)

CUC website <http://ceunco.upaep.mx>.

You are requested to consult the document entitled “Procedure for reservation of use of CUC classrooms”.

Computer rooms and laboratories

UPAEP offers a variety of laboratories and computer rooms for several professions and specialities. These learning spaces are used for scheduled classes and for student practices during the available periods of time.

Support service is offered to computer room users from Monday to Friday from 7:00 a.m. to 8:00 p.m., and on Saturdays from 9:00 a.m. to 2:00 p.m.

Support services

User Service Center (CAU)

The User Service Center (CAU) is the official point of contact to request support for IT services and receive technical assistance. This service is provided by the university community: students, faculty and staff members.

- Users can receive advice and support
- Google service
- Internet service
- Access to LAN and Wifi networks
- Login and access to information systems
- Technical assistance for enrollment systems
- Technical support regarding personal computing or IT services around campus
- Student information system assistance (academico)
- Learning management system general issues
- Telephony services assistance

Business hours:

Monday to Friday from 7:00 a.m. to 9:00 p.m., and on Saturdays from 9:00 a.m. to 2:00 p.m.

Contact information

E-mail: cau@upaep.mx

Phone: +52 222 309-9411 +52 222 2299400 ext. 911

IDD support servicedesk

This support service is available to students for special assistance regarding access and use of Blackboard.

Telephony services

Telephone operators offer a main menu and first contact information to students, as well as access to directory service to reach faculty and staff areas and services available at university.

Service hours:

Monday to Friday, from 8:00 am to 7:00 pm

Faculty and staff services

Online services

Staff members website (upaep.mx/colaboradores)

A web site designed to display relevant information to faculty and staff members regarding university procedures and services, information and access to different information platforms and electronic learning resources.

- Faculty and staff members can view information regarding:
- School calendars
- Directory
- Calendars
- Bulletin and news
- Courses and workshops offering
- Events information
- Library resources
- Laboratories resources
- Normative documents, procedures and additional information

Requirements: active faculty or staff member with an ID and password

ERP system (unisoft.upaep.mx)

A web application available to perform, view and request information or services related to the most important academic and administrative activities.

Unisoft is a powerful platform that orchestrates academic and administrative operations at university.

Requirements: to be an active faculty or staff member with ID and password

Email and collaboration tools

Through your UPAEP email account, faculty and staff members can use different online tools for your academic or administrative activities.

- Google Workspace provides email services and offers collaboration tools:
- Gmail, Calendar, Chat,
- Meet, for conference and collaboration
- Drive, for documents storage online
- Documents: create, manage and publish Spreadsheets, Presentations, Forms, Sites and

Requirements: to be an active faculty or staff member at UPAEP with access to your email account.

Video conferencing service

Video collaboration services that support faculty activities through facilities, video and audio equipment as well as computer systems through which it provides services and resources to leverage learning processes and faculty practice.

The following resources and computing services are provided:

- 131 computers deployed in:
- 7 video conference rooms (14 PCs).
- 6 video collaboration rooms (6 PCs)
- 2 specialized software laboratories with HP Workstation equipment (42 computers).
- 2 specialized software laboratories with Apple computers (42 computers).
- 26 Classrooms (26 PC Teams).

Options available:

- Blackboard collaborate, as part of current modules of Blackboard platform
- Google Meet, included as part of Google Workspace suite.
- Zoom meetings for special events and conferences.

ACADEMIC SUPPORT

Throughout its almost 50 years of life, UPAEP's infrastructure has been increased and modernized according to the circumstances that its own origin, the growth of enrollment, the creation of new programs and its own educational model have demanded.

The main moments of the evolution of the university infrastructure can be consulted in the "Memorial" (located on the first floor of building C of the Puebla Campus). It should be noted that the growth in infrastructure has always responded to an imperative need to support academic life.

The university complies with the criteria set by the different norms and legal references related to educational physical infrastructure:

- General Law of Education (2019)
- General Law of Higher Education (2020).
- General Law of the Physical Educational Infrastructure (2008) (Art. 7, 9 Educative (2008) (Articles 7, 9, 11, 13, 14)
- Regulation of the General Law of Physical Educational Infrastructure (2013)(Articles 34, 35, 37 and 38
- General Law of Higher Education of the State of Puebla (2021)
- Sustainable Urban Development Law of the State of Puebla (Articles 12, 13 and 14) State of Puebla (Articles 12, 79, 92)
- Municipal Program for Sustainable Urban Sustainable Urban Development Program of Puebla (2007)
- Accessibility Technical Manual applicable to constructions in the municipality of Puebla
- Standards and specifications for studies, projects, construction and installations.
- Volume 3, Volume I. Architectural Design.
INIFED
- Guide for the design of sanitary cores.
INIFED
- Mexican Standards NMX

The existing infrastructure includes offices, classrooms, laboratories, library, cultural workshops, computer rooms, videoconferencing rooms, meeting rooms, multi-purpose rooms, conference rooms, bathrooms, residence halls, sports areas, parking lots and, in general, all the facilities necessary for university life.

In the daily work of the university, academic support spaces are essential, from classrooms to the most sophisticated laboratories. There are currently 181 classrooms with a total area of 8,089.79 m² distributed in 5 on-campus buildings and 4 off-campus buildings. Classroom capacity ranges from 12 to 69 seats, with an average of 30 seats and an average area of 44.7 m². All classrooms have computer equipment and wireless internet; 139 have video projectors and 42 have flat screens for class presentations.

There is a total of 2,932.26 m² in conference and multipurpose rooms, including three auditoriums and the Liaison Center.

***The UPAEP has 89 laboratories
in use for teaching and 14 exclusive
for research, located most of them
in buildings L1, L2 and L3.***

The areas into which they are divided are:

- Medical - biological
- Engineering
- Audiovisual Media
- Gastronomy
- Agriculture and Livestock
- Humanities
- Research

The 20 engineering laboratories cover an area of 1,726 m² located

mostly in the L2 building. The School of Business programs have 6 laboratories with a total area of 576 m² located in the L4 building and serve the School of Gastronomy and the Hospitality and Tourism Management program, as well as the Nutrition and Food Technology programs in the health area.

For biological sciences programs, there are 4 practice spaces located on land in the city of Atlixco, with a total area of 32,613 m², mainly serving the needs of the Agronomy, Veterinary Medicine, Environmental Engineering, Agribusiness and Biotechnology programs.

The Psychocognition and Legal-Accounting laboratories serve the needs of the psychology, psychopedagogy, law, accounting and senior management bachelor's degree programs, respectively.

The Dentistry, Physiotherapy and Nutrition clinics are considered laboratories for the respective students, as they provide services to the internal and external community, and deserve special mention. In the case of Dentistry, it has an area of 1,435.2 m² with 8 clinics with a total of 74 dental units and 2 laboratories for 24 people each. While those of Physiotherapy and Nutrition has 1096.55 m² of total built area, in which we find offices, consulting rooms, early stimulation areas, treatment box, mechanotherapy and equipment gym, examination and measurement room, nutrition lab and measurements, nutrition laboratory, multipurpose room, laundry, dining room and garden.

The Tehuacan Campus has 4 laboratories: food, computer, communication and oral trial room.

UPAEP GLOBAL CAMPUS

1. POSTGRADUATE

Virtual programs

Videoconference Graduate Programs

Offering Master's and Doctoral programs in videoconference modality for foreign and Mexican students.

Virtual Exchange

Offering of courses from foreign universities that students can take in virtual mode and revalidate UPAEP courses.

Online Graduate Programs

Offering Master's and Doctorate programs in online mode for foreign and Mexican students.

Webinars and conferences

International videoconferences on topics related to different areas of study.

Online Double Degree

Master's students finish their graduate studies with two degrees, one of them accredited in the United States.

Tailor-made courses

Specialized online courses of a technical and/or academic nature with an international perspective.

Bridge programs

Foreigners obtain a Master's degree at their home university and a Doctorate at UPAEP.

OUTGOING FACE TO FACE PROGRAMS

Double Degree

The double degree is a unique program offered by UPAEP in conjunction with partner universities around the world, which allows students the opportunity to finish their graduate studies with two degrees, one of them accredited by the foreign university and the other by UPAEP.

The main objective of this program is to promote the student in the professional and academic field, as it provides the necessary tools to excel in a world as globalized as the one we live in today.

For a detailed list of Universities, click on the logo of each one of them at:

<https://upaep.mx/posgrados/internacionalizacion#doblegado>.

Faculty Led

Faculty Led programs are short stays (from two to eight weeks) in prestigious universities in different countries around the world, where you can credit up to 2 subjects of your curriculum and complement your stay with extraordinary visits and cultural experiences.

Graduate students of any semester can participate in these programs, as long as it fits their personalized study plan.

Important note

Due to the pandemic caused by COVID-19, most of our programs have had to move to a virtual or hybrid format. Please check their modality by accessing the details of each one. Thank you for your understanding.

Program offerings 2021:

Environmental Engineering
and Sustainable Development

Work and Organizational
Psychology

Strategic Planning and
Technology Management

Management and
Marketing

Clinical Nursing supported
by the Nurse in Barcelona

and management of
educational practice

OUTGOING FACE TO FACE PROGRAMS

Application Process

01

Explore

the program offerings we have planned for 2021 (Section above in red).

02

Make

your pre-registration online at the link found on the page of the program of your choice.

03

Send

your signed and scanned "Regulations" to:

internacionalizacion.posgrados@upaep.mx

When sending it, please put as subject of the email: Faculty Regulations Led_Full_Name_ID. You will find the regulations on the page of the program of your choice.

04

In Order to

reserve your place, make your prepayment of \$4,000.00 mxn on the date indicated on the page of the program of your choice.

05

Make

your registration and registration of subjects in UNISOFT (You will receive a diagram with the instructions once you have made your pre-payment).

06

Take

your medical and psychometric exams.

07

Apply

for or renew your passport and/or VISA (if applicable for your destination program). Remember that the expiration date of these documents must be more than 6 months after your return date for most programs, except for Russia.

08

Make

your payments on time, according to the schedule explained on the program page of your choice.

Exchanges

Exchanges are international stays in which you will be able to take courses with curricular value of up to 6 months of duration at Master's and Doctorate level.

Students may take courses at prestigious universities abroad with whom we have an agreement and revalidate up to 3 subjects upon their return according to their study plan with the approval of their Academic Director.

UPAEP has more than 130 international agreements with universities in 32 countries around the world.

OUTGOING FACE TO FACE PROGRAMS

Application Process

01

Explore

the offer of Universities with which we have an agreement, by placing the "Exchanges" filter and the countries of your preference in our interactive map:

[Click Here](#)

<https://upaep.mx/posgrados/internacionalizacion>

02

View

the websites of the Universities that have been of interest to you and review their curriculum in depth to identify those that are most similar to the postgraduate program you are studying at UPAEP and select the 3 Universities that are of most interest to you.

03

Talk

with your Academic Director about the Universities you have chosen, to know his or her point of view and verify that the curricula of the Universities match with some subjects that could be revalidated upon your return.

Once you have discussed this, please ask him/her to send the Pre-authorization Letter to internacionalizacion.posgrados@upaep.mx confirming that they have jointly reviewed your choices of Universities and that he/she agrees to proceed with the process.

04

Submit

the following information for each of the 3 Universities you have chosen and that your Academic Director has approved: Country, University name, program name. Send the information to internacionalizacion.posgrados@upaep.mx. List the Universities in order of priority and please place as the subject of the email: Exchange_Full_Name_ID.

05

Once

we confirm receipt, please reply on the same email attaching a formal color photograph of yourself from the waist up in JPG format. And your cover letter that will help us to apply for your acceptance to the Universities you have chosen.

We suggest you include in it: the reasons for your interest in being accepted to their University, the line of interest of your program of study, the ways in which your participation can enrich their students and professors, your own experiences and skills that can contribute to the field of knowledge to which you are applying, etc. The letter should be sent in English and Spanish.

Proof of language proficiency (TOEFL IBT or ITP, Delf, German, etc.).

Scanned copy of your passport

Proposed work plan (Example of a work plan here: [Work plan](#))

06

Ask

about the different financing options to verify if any of them may apply to your case.

07

The Postgraduate

internationalization team will contact the Universities you have chosen, in the order of priority you have indicated. We will introduce you to them, make the request for admission and contact you as soon as we receive a response from them. If they respond favorably, we will indicate the requirements and particular admission process that they have indicated that you should follow and you will have to confirm which of them you will decide to apply for.

Note: The application will not be made simultaneously. That is, we will only contact your second or third choice in case you do not get a favorable response with the previous ones.

08

At the same time

that you are in the admission process with the foreign university, you must review again with your Academic Director the study plan and dates of your stay according to the academic calendar of the host university.

Research stays

Research stays are periods of up to 6 months at the Master's level and up to one year at the Doctorate level during which students have the opportunity to carry out research activities at a university abroad.

Students may choose any university in the world that accepts them and is approved by their UPAEP Academic Director.

OUTGOING FACE TO
FACE PROGRAMS

Application Process

01

Choose

the foreign university with which you wish to conduct your research stay. You can choose any educational institution around the world that you consider to have a curriculum, academic faculty, laboratories or specialized systems according to your area of interest.

However, we put at your disposal the Universities with which we have an agreement, which you can consult in our interactive map by placing the filter "Research stays" and the countries of your preference

Click Here

<https://upaep.mx/posgrados/internacionalizacion>

02

You must

indicate the name and contact email of the University of your choice, as well as the email of the person from that institution that you would like to act as your co-supervisor during your stay, according to the research you are interested in doing.

In addition, you must attach the following information in the same e-mail.

Proposal of the purpose of your stay (Maximum one page in Arial 12, 1.5 line spacing, Word format).

Short summary of your thesis work (Maximum 3 pages in Arial 12, 1.5 spacing | Word format).

Personal cover letter: We recommend that you include in it, the ways in which your work can enrich the external collaborator, ways in which your own experiences and skills can contribute to the field of knowledge in which the person you are requesting to receive you as a co-supervisor in the stay. (We provide you with the following format for a Letter of Introduction)

03

The University

must respond by sending a letter of acceptance from the co-tutor you requested. We will keep you informed about the receipt of the letter.

04

Ask

about the different financing options to verify if any of them may apply to you.

05

While

waiting for your acceptance letter, you should review with your Academic Director the study plan and dates of your stay according to the academic calendar of the host university.

Formal color photograph of yourself from the waist up in JPG format.

Proof of language proficiency (TOEFL IBT or ITP)

Scanned copy of your passport

You must send all the above documents in English and Spanish to internacionalizacion.posgrados@upaep.mx . Please put in the subject line of the email: Research Stay_Full_Name_ID

NOTE: Please consider that your application should be made preferably 6 months before the period in which you wish to do your stay.

2. UNDERGRADUATE

Virtual Exchange

Complete virtual modules through UPAEP's and partner foreign universities platforms with which we have collaboration agreements.

COIL

Interdisciplinary collaboration with a foreign teacher to co-create a module in a course together, through the same virtual classroom, generating the integration of both groups of students, to work on a project together.

Mirrored Classes

An international visiting professor provides specific topics for a similar subject at UPAEP and vice versa, the UPAEP professor teaches topics in the subject requested by the foreign University.

Webinars

International videoconferences on topics related to your area of study.

Global Speakers

International or Mexican speakers abroad with extraordinary projects.

Conversations

Panels with specialists who discuss topics in your area of study from different international perspectives.

Seminars

International conference sessions or cycles with work stations and videoconferences with multicultural speakers.

Face-to-Face Academic Offer

Due to the global contingency, the availability of our programs may vary depending on world conditions in the face of COVID 19, international travel guidelines before the WHO and changes in migratory processes at the destination.

Virtual Exchange

Faculty Led

The Faculty Led programs are short stays in prestigious universities in different countries around the world, where you can credit up to 3 subjects of your curriculum and complement your stay with internships and extraordinary cultural experiences.

Double Degree with City University of Seattle

The dual degree is a unique program offered by UPAEP in conjunction with City University of Seattle (CityU), which gives you the opportunity to finish your degree with two bachelor's degrees, one of them accredited in the United States. The main objective of this program is to promote students in the professional and academic fields, as it gives them the necessary tools to succeed and excel in a world as globalized as the one we live in today.

In addition to the dual degree program, CityU also offers two summer programs each year open to all UPAEP undergraduate students, one of which is offered in the city of Seattle and the other at CityU's headquarters located in the beautiful city of Prague, Czech Republic. For those interested only in improving their level of English, CityU also offers the ELP (English Language Program), which is open to anyone in the UPAEP community, both students (high school, undergraduate and graduate) and teachers.

National Exchange with ANUIES

The National Association of Universities and Institutions of Higher Education is comprised of more than 150 universities and institutions of higher education, both public and private, throughout the country.

National Exchange with SUMA

The University System of Academic Mobility is made up of more than 20 private Mexican universities accredited by FIMPES.

3. ARIZONA GLOBAL CAMPUS

Coming soon

4. TUNING

About the project and Sintonía

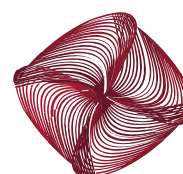

Sintonía was born in 2012 as an UPAEP initiative and as a result of the collaboration with the “Institute of Strategy and Competitiveness of Harvard Business School” with the purpose of turning Puebla in a more competitive region.

In 2001 and 2002, Puebla remained in the positions number 26 and 28 in terms of competitiveness in relation with 32 states of Mexico. Sintonía’s impact has grown around the country and nowadays its expanding through the whole country.

Sintonia boosts competitiveness in 3 ways, Education, Analysis and research and Cluster Intervention in Mexico, it develops and implements economic development strategies.

Sintonía is focused in the Microeconomics of Competitiveness course that is offered as a member of the Harvard Net directed by the “Institute of Strategy and Competitiveness the Harvard Business School” of the Dr. Michael Porter.

Sintonía and the Institute of Strategy and Competitiveness at Harvard Business School, developed the cluster map and calculated the Social Progress Index in a dynamic way in order to reflect the economic and social situation of each state in Mexico.

Competitiveness

About cluster map

The Cluster Map reflects the composition of the employment, value added, investment and payroll of the relevant clusters of each state in the country.

As an example, Puebla the automotive cluster is one of the most representatives compared with others. Puebla's employment has been growing in the last 10 years with 6% of the national total.

Graphics show the cluster performance in Mexican states in terms of employment, value added, investment, and payroll.

The graphic of the automotive cluster, shows that in the last 10 years the state of Coahuila has presented a significant grow in the rate of employment and share market in comparison with the other states in Mexico.

Sintonía is committed to go further than improve the economy of Puebla and the region. In order to promote inclusive social progress Sintonía along with the leadership of Social Progress Imperative calculated Social Progress Index for each municipality in Mexico.

About Social Progress Index

The Social Progress Index (SPI) measures the extent to which countries provide for the social and environmental needs of their citizens. It is a metric that let us know how well a region is doing in order to get the 17 Sustainable Development Goals established by ONU to get in 2030.

SPI combines three dimensions:

- Basic human needs
 - Opportunities
 - Foundations of well-being

For each dimension there are four variables that measures the extent in which a country, municipality or city satisfies basic social and environmental needs of its citizens in a sustainable way.

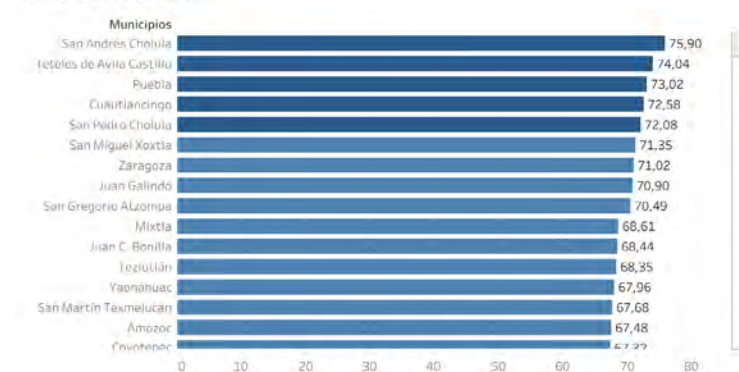

Índice de Progreso Social Municipios de Puebla

Progreso Social	Nutrición y Cuidados Médicos Básicos	Agua y Saneamiento	Vivienda	Seguridad Personal	Acceso a Conocimiento Básico	Acceso a Información y Tecnología
-----------------	--------------------------------------	--------------------	----------	--------------------	------------------------------	-----------------------------------

ENTREPRENEURSHIP

Currently, the entrepreneurship program consists of a transversal, institutional line of training that has a space in the curricula of all grounded education undergraduate programs, with the following educational goals:

- Identify the elements of entrepreneurship and self-knowledge that determine the development of an entrepreneurial project.
- Design innovative, sustainable, and replicable business models with social relevance.
- Value their professional contribution by recognizing social problems to propose solutions with an entrepreneurial attitude.

The entrepreneurship program is supported by additional training activities consisting of conferences, workshops, testimonials, competitions, linkages, etc. All of this with the intention to generate an internal ecosystem and environments that inspire and support the student by reinforcing their integral formation. Since the end of 2019, the business incubator was integrated in to the academy and the spirit of business creation has been brought to the classroom. The student, who so wishes, can create his incubated Company. This is supported with the Emprende Aguila Program that consists of personalized tutoring for entrepreneurship model.

PROFESSIONAL INTERSHIPS

Professional internships are activities that allow students to develop and put into practice specific disciplinary competencies, generating work experience under the supervision of an expert in the field, in a company, organization or institution, while at the same time creating networks of contacts that will facilitate their insertion into the labor market.

General characteristics of Professional Internships:

- They can be carried out by undergraduate or graduate students.
- Their activities are developed around a project that responds to specific needs, with a determined duration and related to their professional career.
- They can only be carried out after having completed 50% of their academic credits.
- The school insurance covers the internship period.
- No employment relationship is established.
- For professional internships abroad you must meet special requirements with your link.

1 Exhibition Hall
Museo Upaep

The Museum is a university space for meeting and communication with the community through various artistic and cultural activities, both inside and outside the museum.

Through temporary exhibitions, social programs and academic programs, it seeks to bring people closer to art and contribute to social welfare.

With its collections, made up of works such as sculptures and paintings from the 18th to the 20th centuries, it generates interdisciplinary research with the collaboration of students, students, academics and researchers.

Every year it organizes the International Meeting of Museums in Puebla, in order to professionalize the work of museums.

The Evocarte program (While memory fades, art evokes it) promotes the participation of older adults in cultural activities, strengthening their cognitive, social and motor abilities through observation and artistic workshops.

Inclusive Museum

The Hospital Museum program seeks to foster the integral development of hospitalized children through cultural, recreational and integration activities.

The Arte Andante program consists of traveling exhibitions of painting and photography that, in collaboration with cultural and educational institutions in the interior of the state of Puebla, bring the plastic arts closer to the population.

The program Relacionarte from the curatorial practice, collaborates with students, teachers from UPAEP and other institutions that generate research on the collections of the UPAEP Museum.

The program Juego y Aprendo, art and culture for all, offers guided tours, cultural activities and courses, for children and young people with disabilities to stimulate the development of cognitive, sensory and social skills.

The program Diagnosticarte, your senses in art, contributes to the formation of humanistic physicians and develops greater sensory sensitivity and acuity through art.

MENTORING

WHAT IS THE PFIE?

The Integral Student Formation Plan contributes to the achievement of our institutional purpose of offering an integral formation for a transforming leadership, recognizing and favoring the co-curricular and extracurricular formation programs that you carry out throughout your university life.

An integral formation that allows you to develop a congruent, committed and transcendent life project.

How does it work?

Through a personalized accompaniment and the training spaces that the university offers you, you will have the possibility to discover, develop and grow in your different dimensions.

The dimensions considered by the PFI.e are:

- Plan and capabilities for life
- Healthy lifestyles
- Arts and Culture
- Global Thinking
- Spiritual Development
- Professional Development
- University life and social commitment

What activities are part of the PFI.e?

Understanding that you live your training experiences in different spaces and dynamics, the PFI.e considers not only the learning processes that take place in the classroom but also everything that contributes and contributes to your transformational leadership.

Leadership and action activities

Boards, student groups, representative teams, social impact projects, research, missions, international experiences, among others.

Training cycles

Cycles of conferences, congresses, growth hours, courses, workshops and diploma courses, among others.

Other complementary activities to train in the institutional learning outcome approach.

Pastoral care of Culture

UPAEP opens its doors to all people of diverse religious confessions and from its Catholic Identity proposes a space for students and professors who share the same faith and people of good will to participate in service and religious activities to strengthen their personal life from a transcendent perspective.

There are several pastoral groups that support the living of faith and service to the needy.

In the Pastoral team there are priests, religious and lay people committed to celebrate the liturgy, for spiritual accompaniment, preparation in the Sacraments and guidance of youth groups.

Activities include missions, pilgrimages, spiritual retreats open to the participation of all those interested in knowing and living their faith life in a more committed way.

Our Archbishop of Puebla, Monsignor Victor Sanchez Espinoza has appointed Father Gabriel Menendez as our chaplain.

In a special way the University is consecrated to Christ the King and the Virgin of Guadalupe. In every campus of the university you will find a chapel for the celebration of Mass and spiritual accompaniment.

SOCIAL SERVICE

Professional internships are activities that allow students to develop and put into practice specific disciplinary competencies, generating work experience under the supervision of an expert in the field, in a company, organization or institution, while at the same time creating networks of contacts that will facilitate their insertion into the labor market.

Pursuant to Articles 52 and 55 of the Law Regulating Article 5 of the Constitution, social service is mandatory for all undergraduate students.

Professional internships are activities that allow students to develop and put into practice specific disciplinary competencies, generating work experience under the supervision of an expert in the field, in a company, organization or institution, while at the same time creating networks of contacts that will facilitate their insertion into the labor market.

Pursuant to Articles 52 and 55 of the Law Regulating Article 5 of the Constitution, social service is mandatory for all undergraduate students.

5° Constitutional of the United Mexican States, social service is mandatory for all undergraduate students, as a prerequisite to obtain a professional degree.

In accordance with Article 53 of the Law Regulating Article 5 of the Constitution of the United Mexican States, "social service" is understood as work of a temporary nature and through formative retribution, performed and rendered by professionals and students in the interest of society and of the State.

The importance of social service in the UPAEP community is explained and supported in point 75 of Chapter IV of our Ideology:

"The primary purpose of our university is to introduce students to the knowledge and analysis of the social, economic and political problems of our homeland, and to create awareness of their responsibility in promoting the common good. For this reason, we consider social service as an essential part of the students' formation, which, while collaborating in the development of the

community, brings them closer to the most needy social sectors, and forms in them a sense of solidarity and service that permeates the future exercise of their profession".

The social service consists of the student having a life experience where he/she collaborates directly for the benefit of his/her fellow man and society, bringing him/her closer to the most needy social sectors and to form a sense of solidarity and service that complements their professional practice and leadership.

The social service must be performed for a period of no less than six months and covering a total of 480 hours.
