

## Engineering Program For International Students

The Engineering Program has been designed for international participants to understand the Industry in Mexico. Because of Mexico's manufacturing power, today more than ever industry and engineering are protagonists of the country development.

In UPAEP we have more than 10 options of engineering programs, including chemical engineering, civil engineering, computer engineering, automotive engineering, among others.

## UPAEP UNIVERSITY

The program includes lectures, practicum in the University laboratories or in a company related to their field, reflection sessions, where students will be able to ask questions to Mexican engineers concerning their practicum.

21 Sur 1103, Barrio de Santiago  
CP. 72410, Puebla, Pue. México

## Lectures & Practicum

Participants will attend to several conferences where they will receive important information about their Engineering field before the practicum.

The type of rotation will be based on the company or the professor needs and will be informed to the students prior to their arrival. Students will be assigned to an engineer, and this person will be in charge of the whole rotation of the students.

## Reflection Sessions

Participants will be assigned to an academic advisor and will attend reflection sessions where they will be able to share their experience with other participants.

An academic advisor will moderate the session and will also answer any type of questions that students might have after the rotations.

## Cost of The Program

To set up a price for the program, please contact the Short Term & Tailor Made Programs Coordinator at UPAEP ([octaviogonzalez01@upaep.mx](mailto:octaviogonzalez01@upaep.mx)) and specify your needs, such as number of credits required, lodging preferences, number of participants and weeks involved in the program.
